Serving The Central and Southeastern Pennsylvania Areas - Also Maryland, New Jersey and Delaware

VOL. 23 No. 40 | Lancaster Farming, Saturday, August 5, 1978 | $6.00 Per Year

Government reminded of co-op's value

WASHINGTON, D.C. – The National Council of Farmer Cooperatives last week recommended that an independent commission study milk marketing and farmer cooperatives, if an Antitrust Review Commission now holding hearings concludes that further study is necessary in these areas.

Testifying before the Antitrust Commission, NCFC Vice President General Counsel Donald E. Graham said that members of such a study commission should be selected from among responsible consumer, farmer and middlemen interests, and not from the Federal Trade Commission, Agriculture or Justice Departments.

Graham also advocated implementation of a 1955 national antitrust committee recommendation for more formalized coordination between the Secretary of Agriculture and government antriturst agencies concerning complaints and investigations pertaining to agricultural cooperatives.

He further suggested that the 1955 recommendation be broadened to include market orders.

Graham said that the NCFC "isn't opposed to a full study of federal market orders, nor are we opposed to a full and complete reexamination of the need for the limited immunity provided for farmers by the Capper-Volstead Act."

But he noted that not one person on the Antitrust Commission, including its advisors and staff, has any credentials in agricultural economics. "This is a flaw so serious it calls into question the work of this body," Graham asserted.

The NCFC attorney pointed out that the Commission staff person heading up agricultural exemptions and immunities is an economist with the Justice Department. He added that for more than four years this staffer has engaged in activities attacking farmer cooperatives and milk market orders, as well as being one of the principal government witnesses in a recent Justice action against a dairy cooperative.

Furthermore, added Graham, two of the congressmen appointed to the commission previously introduced bills which, if enacted, would seriously weaken farmer cooperatives. He also noted that one of the attorneys appointed to the commission

The Arthur Hershey family of Cochranville, complete with a Dairy Princess they can call their own, were the outstanding exhibitors at the 1978 Goshen Fair Holstein Show, held Thursday night near West Chester. From left are Mrs. Hershey (Joyce), Julie, 8; Chester County Dairy Princess Beverly, 19; Brad, 15; Art Hershey, and Duane, 17. The family captured the Premier Breeder banner, had both the grand and reserve grand champion, and won numerous other titles and blue ribbons as well. A total of 18 exhibitors vied for the honors.

Art Hershey wins major dairy titles

WEST CHESTER — The Arthur Hershey family of Cochranville, owners of Ar-Joy Holsteins, captured major titles, banners and ribbons at the Goshen Fair on Thursday night. Exhibiting both the grand and reserve grand champion, the family went on to win the Premier Breeder banner and captured several other major first prizes as well, including Dairy Herd, Produce of Dam, Best Three Females, and Senior Get honors.

Premier Exhibitor honors went to Donald Eastburn of Toughkenamon who had eight animals entered in the competition, which was judged by James Shaw of Linden Loch Holsteins, Oley.

Among 4-H and FFA entries, animals shown by Oxford's Ed Breckbill stood as champions.

The Hersheys, Eastburn and Breckbill accounted for most of the blue ribbons handed out at the show.

Following are class placings:

Senior Calves - 1. Ed Breckbill, 2. Susan Pepple, Oxford; 3. Donald Eastburn, 4. Dean Yarnall, Oxford; 5. Ed Breckbill.

Junior Yearlings - 1. Ed Breckbill, 2. Nancy Yarnall, Oxford; 3. George Lamborn, Nottingham; 4. Lynn Eastburn, Toughkenamon; 5. Alice Mark, West Grove.

Senior Yearling - 1. Ed Breckbill, 2. Nancy Yarnall, 3. Ed Breckbill, 4. Ed breckbill, 5. Darrell Guest, Pottstown.

Junior Champions - Ed Breckbill.

Junior Get of Sire - 1. Ed Breckbill, 2. Tom Roth, Pottstown.

Two Year Olds - 1. Donald Eastburn, 2. Ed Breckbill, 3. Donald Eastburn.

Field day reveals new technology

LANDISVILLE — The possible return of the potato as a major cash crop for Pennsylvania, how to reduce disease, insect and weed problems in tobacco; the advantages of anthracnose resistant varieties of alfalfa; likely fertilizer cost savings as a result of an advanced soil analysis, and the promise of better combining with low-growing soybeans were just a few revelations farmers were told about at this year's Open House at Penn State Univeristy's research farm near here.

Well attended despite rain for much of the day, visiting farmers were treated to numerous lectures and discussions by agronomy specialists from Penn State. Wagon tours gave each visitor the opportunity to inspect fields and test plots while professors explained their meaning, and made themselves available for questions concerning problems farmers may be experiencing on their home farms. The expertise represented during the day-long event ranged from soil scientists to plant pathologists and crop specialists.

Amog the highlights of the

(Turn to Page 33)

Dr. Richard Fox, assistant professor of soil sceince at Penn State University, is experimenting with trials to determine exact Nitrogen fertilizer needs in crop production. The corn leaf he's holding shows evidence of Nitrogen deficiency by way of a brownish-yellow inverted "V" stripe. Fox believes the savings in fertilizer costs could be very significant once the Nitrogen analysis test is perfected.

Strong prices seen for dairy farmers

ALLENTOWN – Dairy farmers whose milk prices are established by the Federal Milk Marketing Order 4 "Mid-Atlantic Market" are likely to reach over $11 per hundredweight before the end of the year according to John C. York, vice-president, Member Relations, Lehigh Valley Cooperative Farmers, Inc.

The support prices to be announced by the U.S. Department of Agriculture for October 1 of this year could conservatively be $9.65 per hundredweight for 3.5 per cent fat milk compared with the present support level of $9.21. The support prices are tied to changes in the cost of production. The index of costs has increased nine per cent since October of 1977. An increase in the support price will help bolster farm milk prices and stabilize the erosion of net dairy farm income according to York.

The government's support price level will raise the Minnesota-Wisconsin milk prices for milk used in manufacturing uses. The Minnesota-Wisconsin milk price is the basic price currently used in establishing prices to

Lancaster Grain

Friday, August 4, 1978

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Friday, August 4 are as follows:

	Bid+	Offered+
Ear Corn	71.00	81.00
Shelled Corn	2.50	2.70
Barley	1.75	1.92
Oats		
Local	1.32	1.55
Western	1.68	1.83
Wheat	——	——
Soybeans	5.80	——
Soybean Meal		233.65

HUBBARD WHITE MT BROILERS

From calf to cow, we formulate feeds and feeding programs with your profit in mind.

Are you in the dairy business to stay?

Are you ready to devote an hour or so of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say

Unlike many other feed companies we develop *custom* feeding programs for each individual dairy

It all starts with a Pennfield man reviewing your total operation with you Your goals Your records The health and overall condition of your milking cows and young stock. Your management practices. Your roughage feeding program. And other factors that have an effect on your profit potential.

We also conduct laboratory analysis of the roughages you feed to determine their nutrient content.

With the aid of computers, we then design a *balanced* feeding program specifically tailored to *your* operation and goals—a program that can improve your profits by reducing expenses increasing production, or both

For example while using a Pennfield customized feeding program, 30 herds this past year averaged 1,688 lbs. more milk and 64 lbs more fat per cow than the previous year

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us Do it today.

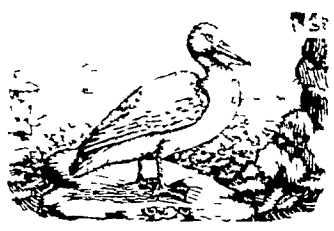
THE OLD FARMER'S ALMANAC

AUG 7-13, 1978

Scudding clouds and rain shrouds

Hay fever season begins this week Submarine *Skate* passed under North Pole Aug 11 1958 First quarter of the moon Aug 11 Average length of days for the week 14 hours 5 minutes Watch for falling stars from 11th through 13th Small present size dollar bills issued Aug 7 1928 *Do as you would like to be done by thinks Lamsalt so*



Ask the Old Farmer She dressed up in her best bib and tucker What's a tucker? Sl Seattle

Those pieces of fabric often called chemisettes could be tucked into and over the collar of a dark colored shirt or blouse They were designed to make a female wear — and with the males often combined with the bib

Home Hints Wear your slip inside out to prevent it from creeping up while wearing synthetic garments

OLD FARMER'S WEATHER FORECASTS

New England Fair and warm with scattered rain north to start then rainy and cooler at midweek weekend sunny and warmer

Greater New York-New Jersey Warm with light showers first part of week then cool with scattered showers

Middle Atlantic Coastal Hot with thunderstorms to midweek remainder of week rainy and much cooler

Piedmont & Southeast Coastal Clear and very hot to start then hot with light showers and chance of thunderstorms by Sunday

Florida Sunny and hot with some showers then end of week partly sunny with more showers

Upstate N Y -Toronto & Montreal Partly cloudy showers with hot to mild temperatures all week

Greater Ohio Valley Week begins rainy and hot then cooler but some showers in east

Deep South Seasonal with showers south and east for most of week then sunny and very hot

Chicago & Southern Great Lakes Intermittent rain and partly sunny throughout the week

Northern Great Plains-Great Lakes Moderate to heavy showers throughout week seasonal temperatures

Central Great Plains Scattered showers cooler to midweek sunny and very hot for rest of week

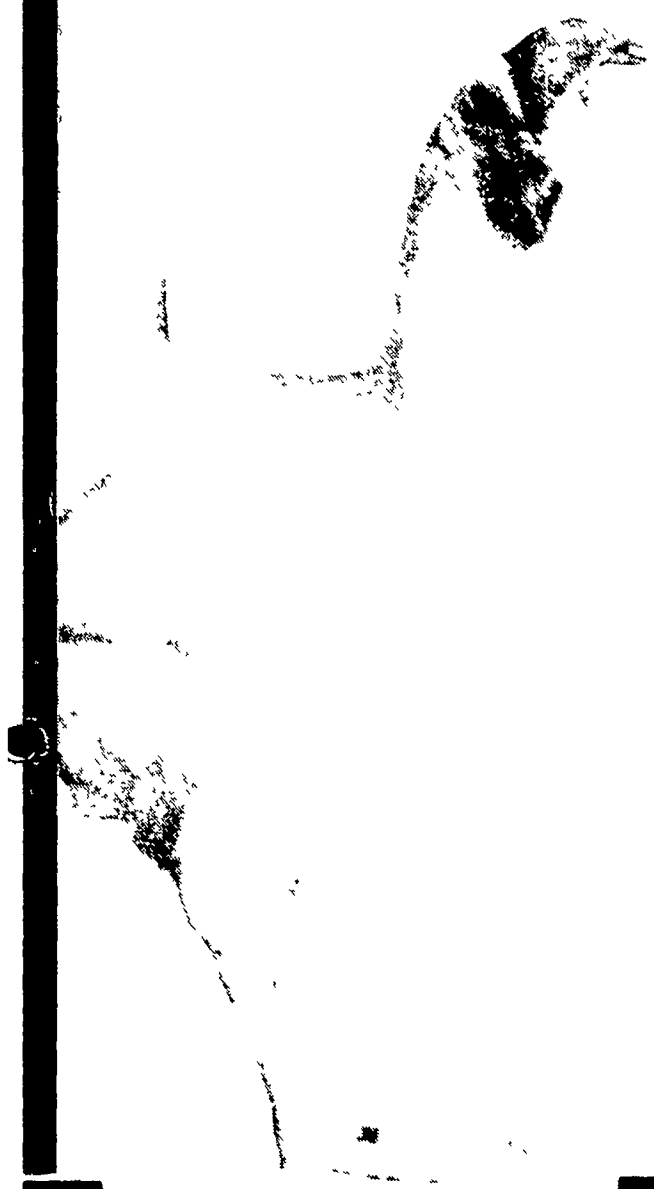
Babcock's B-300V:

The layer that's never been beaten in Pennsylvania Random Sample Testing.

What characteristic do you look for in the layer you buy? High production numbers or efficient feed conversion? Large eggs or low mortality?

Why not pick the layer with the balanced performance that means profit for Pennsylvania egg producers — the Babcock B-300V.



In her very first year of testing, Babcock's B-300V swept the 20th Pennsylvania Random Sample Test, with the highest IOFCC for both divisions - cage **and** floor.

Test results below confirm field reports we've been receiving on the B-300V's outstanding performance - top egg production, great livability, competitive feed conversion, legendary resistance to stress, **plus** strong, beautiful shells.

STRAIN[3]	IOFCC[1]	HEN-HOUSED PRODUCTION[1]	% LARGE & X LARGE[1]	LBS FEED/ LBS EGGS[1]	% MORTALITY[1]	BODY WT LBS[1]	SHELL BREAKING STRENGTH LBS[2]
BABCOCK B-300V	6.41	265.9	99.0	2 35	2.05	4.1	9.6
HISEX	6 24	263.6	96.9	2 49	5.60	4 1	8.5
DEKALB XL-LINK	5 91	264.5	95.5	2.51	2 55	4 2	8 7
SHAVER SX-288	5.90	259.3	100.0	2.44	4.10	4.7	8 9
HUBBARD	5 23	244 5	93.4	2.46	6.60	4.4	NA

EDITORIAL COMMENTS By DIETER KRIEG, EDITOR

There's no winning against a 4-year old

The lifestyle of a newspaper reporter can be such at times that it leaves precious little time for the family So, I'm frequently taking one or two of my three children along to field days, fairs, banquets or even meetings That was the case Tuesday when my son, Karl, and I headed south for a Holstein field day As always, I was happy to have one of my little buddies with me and it didn't take long before we had a nice conversation going

Some 35 miles away from home and in the midst of an August evening's splendor I took pride in announcing to my youngster that we would soon drive past the place where I lived when I was a boy

"You were a boy?" the little fellow asked with his squeaky inquisitive voice

"Yes I was a boy," I answered, never looking at him as I made my right turn in the little village of Union

"Were you a boy like me?" the dear little voice returned

"Yes, I was a boy like you," I answered

"Did you grow up faster?" Karl continued

"No, I was a boy for a long time," I assured him

"Like me and Paul?"

"Yes, like you and Paul," I continued as the car meandered its way around the twisty road to the eastern edge of southern Lancaster County

Obviously somewhat puzzled, my little companion finally charged "You did so grow up faster You beat us, that's why you're big and Paul and me are still a boy!"

"You'll be big someday too, Karl," I comforted the little man, who by now was seeking security from the two fingers he was nursing on

"But, Daddy, I can't wait," he pleaded "I can't wait 'cause I want to drive a combine "

I drove on and we soon reached the crest of the hill from which we could look down on the beautiful farmland below "This is where I lived when I was a boy," I told Karl He stretched his little neck and peeked through the glass, not saying a single word

I kept talking, telling him a little bit about the place and how much I enjoyed growing up on a farm As I made the final turn and the farm buildings came into closer view, I looked towards the old brick home and nodded "That's where I lived "

Karl was apparently looking out the opposite window towards the barn as he questioned quite seriously "Daddy, were you a cow?"

I stepped on the gas and kept my mouth shut for the remainder of the trip There's absolutely no winning against a 4-year old It's great

Some fair information

With local fairs in Lancaster Farming's prime coverage area now underway, and many more getting ready to put up their tents, we find it necessary to comment on the importance of cooperation between the news media and fair chairmen and publicity directors

We want to take this opportunity to advise fair chairmen to maintain records of their show results which can be readily available to **Lancaster Farming's** staff A copy of the show catalog is most desirable

If pictures are to be taken make sure show winners and their animals are ready That is another prime ingredient for good publicity

When good coverage is obtainable, both in pictures and words, then chances are good for an attractive layout in the paper

You can help us do a better job and help yourselves in getting the kind of coverage you'd like and deserve

Thank you

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

THINKING WITH EMOTIONS

Lesson for August 6, 1978

Background Scripture:
Acts 21 17 through 25·27
Devotional Reading:
Psalms 118 6-9

A friend of mine, A Palestinian (Arab) "Christian" with a history of heart disease, is forced to do hard labor in an Israeli prison The crime of this man with no previous criminal record: he made the mistake of following the lead of many of his Israeli neighbors and began work on an addition to his house before his permit had been approved Fined an enormous sum of money and sentenced to hard labor, he was not permitted a Palestinian lawyer to defend him A normally peaceful, law-abiding citizen, it is difficult for him to manage his anger

They Supposed

Another friend of mine is an Israeli professor For several years he risked his life posing as an Arab to bring Jewish children safely out of lands where they faced persecution. He has lost many friends in battle and he never knows when his wife goes to the supermarket or department store whether she will be the victim of an Arab guerilla bombing. He too, normally a peaceful and civilized man, is frustrated and angry

One is a Christian, the other a Jew both of them are thinking with their emotions! Both are letting anger and frustration cloud their ability to think and their capacity to live by their own religious principles It is impossible to reason with these men A little bit of truth and a lot of emotion are holding sway

It is hardly a novel situation we find in Acts 21 with Paul in Jerusalem and, as usual, in trouble as well! The ingredients of the trouble are familiar First, there are troublemakers who "stirred up all the crowd." (Like the "poor," I suppose, we always have with us the troublemakers) Secondly, we have a little bit of truth which is greatly distorted They had seen Paul in the Temple and they had seen him with Trophimus, an Ephesian Greek, so "they **supposed** that Paul had brought him into the temple."

Because Of The Uproar

Manipulating the prejudices and emotions of the people, the troublemakers provoked such an uproar that the tribune "could not learn the facts." Nothing is more helpful when you're on the wrong side of the facts than a good, old-fashioned uproar

Finally, as so often happens, we have a situation completely out of hand. Stirring up the crowd to oppose Paul and threaten him, the troublemakers now have a mob on their hands that wants to kill Paul. When we think with our emotions someone is going to get hurt, perhaps even die.

Despite a Lord who taught the primacy of love and a Savior who gave himself on a cross, Christians have all too often been numbered among the mobs and armies who, thinking with their emotions, have allowed the cross to continue as a symbol of man's shame

NOW IS THE TIME

By Max Smith, Lancaster County Agricultural Agent
Phone 394-6851

TO BE ALERT FOR JOHNSON GRASS

This agressive sorghum-like weed should not be given a chance to multiply on any farm We have mentioned this fact in previous articles but am fearful that too many farmers ignore the plants until they get too thick This grass will grow six to eight feet high and have thick flesh-like roots It can be mistaken for sudan grass or sorghum plants

At this time of the year the plants should not be permitted to go to seed, where they are a few plants or small patches If the area is too large to cut by hand, then it should be marked in order to treat the exact location next spring Details about the control of Johnson Grass are available at any County Extension office Don't let this weed take over the farm

TO FLUSH EWE FLOCK

Sheep producers in this part of the country should be planning for the 1979 lamb crop The starting place is to have healthy ewes and a good ram The practice of "flushing" the ewe flock several weeks prior to the breeding season is suggested in order to get more twin lambs

This refers to the feeding of extra grain, or the ewes having access to lush grass-type pasture in order to get them into a gaining condition Ewes that are not thrifty at breeding time will be more likely to throw only a single lamb The control of internal parasites should also be given attention prior to the breeding season

TO PLAN FOR CORN STORAGE

In this part of the state another good corn crop seems to be in the making For dairy and beef cattle producers the silo is one of the best storage places for any corn crop To grain producers, there may not be space for another good corn crop on the farm

Extra bins or storage arrangements are needed on many farms Some government assistance is available on corn storage bins through the local ASC office We urge some attention to this situation so that the storage will be ready when the crop is mature

TO BEWARE OF FEEDER CATTLE PRICES

No doubt the price of r placement beef cattle this fall will be affected by the higher prices of market cattle I'm not in a position to know when is the best time to buy feeder cattle, but over the years many good buys have been made during August or early September before all corn growers are looking for cattle

When a feeder has decided on the weight and grade of cattle he wants to feed, then he should follow the markets closely and try to get the best bargain This may take some time and effort but we feel that to become better acquainted with the market would be very timely The day the cattle are purchased is still a very important t in the feeding operation

Omaha Cattle

August 3, 1978

Weekly 51 – cattle – compared with the previous week's close – closing prices on slaughter steers and heifers were 25-50 cents lower in reflection of bearish conditions prevailing in the carcass beef trade at the wholesale level Cows were 3 00-4 00 lower, instances 4 50-5 00 off in a generally dull trade Bulls were 1 00-2 00 lower

Four day receipts 13,700, compared 13,000 previous week and 13,900 a year ago Fed cattle prices were fairly stable on the opening session but downward pressure developed as carcass prices declined Buyers were generally cautious and selective as they sought to maintain a reasonable ratio between live prices and carcass realizations, and usually were not aggressive for numbers beyond immediate requirements Much of the steer and heifer supply was good to average-Choice with a modest showing Choice and Prime included Slaughter steers made up approximately 39 per cent and heifers 32 per cent, cows comprised 13 per cent and feeders 12 per cent

STEERS The forepart of week, four loads Choice and Prime 3-4 1104-1283 lbs 55 35-55 50 At midweek, five loads Choice and Prime 3-4 1140-1200 lbs 55 00 Choice 2-4 1000-1300 lbs closed 53 50-54 75 Mixed Good and Choice 2-3 975-1250 lbs 52 50-53 50 Good 2-3 50 00-52 50, Holsteins 47 00-50 00 Standard and Good 2-3 45 00-46 50

Average of ls 214, detailed quotations, for Choice 900-1100 lb steers this week 53 92 Choice 1100-1300 lbs 54 52 Average weight steers first three days 1120 lbs as compared 1144 lbs previous week Average weight heifers first three days 968 lbs as compared 962 lbs previous week

HEIFERS Early, three loads Choice and Prime 3-4 997-1022 lbs 53 25-53 50 At midweek, two loads and part load same grade 3-4 960-1035 lbs 52 75-53 00 Choice 2-4 875-1050 lbs 51 00-52 50 Mixed Good and Choice 2-3 825-1000 lbs 49 00-51 00 Good 2-3 45 00-48 50 Small lots Standard and Good 2-3 43 00-44 50

AGRI-KING
KEY TO PROFIT

SILO HEAT LOSS

SILO HEATING CAUSES SEVERE ECONOMIC LOSSES IN CORN-SILAGE, GRASS-SILAGE, HAYLAGE AND HIGH MOISTURE CORN.

WHAT ARE THESE LOSSES?

+LOSS OF ENERGY (CALORIES) **HEAT IS ENERGY!**
+LOSS OF VITAMIN A D E K AND OTHERS MOST **VITAMINS ARE DESTROYED** IN TEMPERATURES ABOVE 100 DEGREES UNTREATED SILAGE WILL RANGE FROM A **MINIMUM 130 DEGREES** TO A **MAXIMUM OF OVER 200 DEGREES**
+LOSS OF DIGESTIBILITY OF PROTEIN THE **HOTTER THE SILAGE GETS** THE **LOWER THE PROTEIN VALUE**
+LOSS OF PALATABILITY BY POOR FERMENTATION CAN EASILY **REDUCE RATE OF GAIN OR MILK PRODUCTION BY 25 PERCENT**
+LOSS OF SOLUBLE NUTRIENTS BY SEEPAGE **HEATING RELEASES JUICE** IN THE SILO IN THE **SAME WAY AS** *COOKING MEAT AND* **VEGETABLES**
+SILAGE *UNLOADS* **HARDER** AND **SLOWER** BECAUSE **EXCESS JUICING MATS IT DOWN AND ALSO RESULTS IN HARDER FREEZING**

WHEN DO THESE LOSSES HAPPEN?
IMMEDIATELY AFTER FILLING THE SILO THE FIRST **3 TO 7 DAYS ARE MOST CRITICAL** DURING WHICH TIME THE **HEATING REACHES ITS PEAK**

WHAT CAUSES THIS HEATING?
OXIDATION FROM THE AIR THAT IS **BLOWN INTO THE SILAGE** AND **TRAPPED** DURING FILLING AND THE OXYGEN CONTAINED IN THE PLANT THE **DRIER THE SILAGE** THE **COARSER** (AND **HARDER**) IT CHOPS THE **POORER IT PACKS** THE **MORE AIR IS TRAPPED** AND THE **HOTTER IT GETS**

WHY?
OXYGEN IS WHAT **CAUSES ANY FOOD TO SPOIL** AND IT **MUST BE ELIMINATED** FROM THE SILAGE **BEFORE PRESERVATION** CAN TAKE PLACE IN THE NORMAL PROCESS OF ELIMINATION A CHEMICAL REACTION OCCURS IN WHICH OXYGEN COMBINES WITH READILY AVAILABLE STARCHES AND SUGARS TO **LITERALLY BURN ITSELF OUT**

DOES OXYGEN FREE SEALED STORAGE PREVENT THIS?
OXYGEN FREE STORAGE **IS NOT OXYGEN FREE** UNTIL **AFTER THIS OXIDATION PERIOD IS OVER COMMON SENSE TELLS YOU** THAT **JUST AS MUCH AIR IS TRAPPED** DURING THE FILLING PROCESS **REGARDLESS OF TYPE OF STORAGE** THE **SAME THING HAPPENS** AS EXPLAINED ABOVE THE DIFFERENCE IS THAT ONCE THE FILLER OPENING IS CLOSED AND THE **SILO IS ACTUALLY SEALED** NO ADDITIONAL AIR CAN ENTER SURFACE SPOILAGE AND SILO LEAKAGE IS NOT A PROBLEM

STOP THESE LOSSES USE SILO KING

WHY DOES SILO-KING WORK?
SILO-KING CONTAINS A *POTENT COMBINATION* OF THE *SAME ANTI-OXIDENTS* USED TO *PRESERVE HUNDREDS OF FOOD ITEMS* IN OUR SUPER MARKETS SILO-KING ALSO CONTAINS A *POTENT COMBINATION* OF *FOOD GRADE EXZYMES* AND *FLAVORS*

THIS *COMBINATION OF ANTI-OXIDANTS AND ENZYMES* RESULTS IN A MUCH GREATER PRESERVATIVE EFFECT

THEY *ABSORB THE ATMOSPHERIC* AND HYDROLYTIC OXYGEN ENERGY IN THE SILAGE TO *PREVENT THE INITIAL OXIDATION* WHICH CAUSES THE *HEATING AND THE LOSSES*

THEY ALSO *UTILIZE MOISTURE* AVAILABLE IN THE SILAGE TO HELP *SYNTHESIZE MORE SOLUBLE SUGARS* WHICH HELP PRODUCE A *HIGH QUALITY, SWEET SMELLING* SILAGE WITH *EXCEPTIONAL PALATABILITY*

BY *REDUCING THE LEVEL OF OXIDATION,* TEMPERATURE OF THE SILAGE IS MAINTAINED IN A *RANGE OF 100 TO 110 DEGREES*

THIS IS THE *IDEAL TEMPERATURE FOR FERMENTATION* THIS RESULTS IN A *HIGHER PH [LOWER ACIDITY]* AND A *SILAGE OF VERY HIGH QUALITY*

Wednesday, August 2

Reported receipts of 96 cows, 74 heifers and 4 bulls

Load of Northeastern Pa , fresh 850-1100, load of Western Pa , fresh cows and springers 850-1000, local springers and fresh cows 600-900, springing heifers 550-825, open heifers 300-450, few registered open heifers 500, bulls 300-400, purebred bulls 500-625, shortbred heifers 500-650, several local fresh heifers 600-850

Preparations are underway for the Lebanon Fair's livestock shows, which begin Monday.

Boar Sale set for August 23

HARRISBURG – Pennsylvania Secretary of Agriculture Kent Shelhamer has announced the state's First Performance Tested Boar Sale, to be held at the Department's Meat Animal Evaluation Center at University Park, August 23 at 7 p m

The center has been conducting progeny testing for swine for the past ten years, but this is the first time the center is conducting a performance test on boars

"Performance testing is the most important tool available to the swine industry to measure the genetic merit or breeding value of potential breeding animals," the Secretary said "A performance test is faster than a progeny test and more desirable for traits that are high in heritability"

Average daily gain, feed conversion, fat thickness, loin eye area, per cent lean cuts as well as a soundness score will be available on all boars sold "This is an excellent opportunity to purchase boars that are genetically superior for these economically important traits which are so important to buyers of breeding stock," he said

The genetic flow' of animals that have been b... in superiority for these traits starts with the seedstock producer A few influential breeders, by identifying genetically superior animals, can have a large pact on progress in the swine industry"

At present there are Chester, Duroc, Hampshire, Landrace, Spotted and Yorkshire swine test Approximately the top 75 per cent will sell Each boar will be indexed at the end of the test and the highest indexing boars will sell first

The testing program is sponsored by the Pennsylvania Department of Agriculture in cooperation with the Penn State and the Pennsylvania Po... Producers Council

Figure it for yourself.

You're money ahead when you feed Milk Replacer No. 22.

Trying to figure a way to get calves off to a healthy start at less cost?

You're money ahead when you feed Milk Replacer No 22 This high-energy product contains 20% fat and extra levels of milk sugar along with just the right balance of vitamins, minerals, and milk proteins — plus antibiotic

For every 50 lb bag of No 22 you feed, you sell an extra 600 pounds of milk

That's extra money in the bank, and your figures will prove it

Build your own starter for less.
After two or three days on Milk Replacer No 22, your calves will be ready for an 18% protein starter

By using your own grain, soybean meal, and Vigortone's Kalf Ayd No 23, you grind and mix your own starter for a lot less than commercial products

Not only will your 18% starter ration be fresher because it's homebuilt, but it'll be highly fortified with vitamins, minerals, trace elements, and antibiotics — thanks to Kalf Ayd No 23

Your calves will do better, and your farm record book will, too

Now is the time to compare.
See your Vigortone dealer soon He's ready to compare the performance of Vigortone's low-cost dairy feeding programs with any other you name

VIGORTONE
PRE-MIXES It's Time To Compare!

USDA looks for better ways to measure yields

WASHINGTON, D.C. – Back in the 1950's, USDA's first-of-the-season corn production forecasts missed the mark by an average of 6.6 per cent. During the past three years this margin narrowed to 2.9 per cent.

Part of the reason: Over the years, the Crop Reporting Board has added in-field plant counts and measurements and sophisticated sampling methods to supplement the crop information it gathers from farmers

Changes like these originate in the Statistical Research Division, which continually seeks new and improved methods of collecting and providing crop and livestock information. Better acreage estimates, improved yield forecasts before harvest, and more precise estimates of harvested yield form the basis for more reliable crop production data.

Wendell Wilson, head of the Division's Yield Assessment Section, sees his research work falling into two main categories. "First," says Wilson, "we monitor current data gathering procedures to see what works well and what doesn't so that we can fine tune our current methods for better results.

"Our second goal is to develop new techniques that can be added to our program for determining crop yields"

This type of research covers a gamut of commodities ranging from fruit and citrus crops in Florida and California, to tart cherries in Michigan, pecans in Mississippi and papayas in Hawaii. The larger projects, however, center on major field crops - corn, cotton, wheat, and soybeans.

To make timely forecasts for each of these crops, the Crop Reporting Board relies on both subjective and objective data. The first stem from farmers' judgements of crop conditions and are often subject to certain observational biases.

Objective methods refer to the actual plant counts and measurements made in sample fields throughout the growing season by trained enumerators. These first-hand observations are designed to produce factual yield indications that are not based on judgement.

"Together the two systems have served us well," Wilson relates, "but we continually strive for refinements and adjustments to improve results."

"This year, we plan to examine a new method of collecting objective data for soybeans, which we call 'destructive counting'. We anticipate running this study along with out regular objective yield work in Illinois"

In experimental plots within each sample field, enumerators will make the usual plant counts and measurements, but after they've clipped off the plants at ground level. This will help determine if removing a few plants for closer examination will give more accurate indications of plant characteristics than current methods in which the plants are left intact.

Also, during the August and September field visits, leaves from experimental plots will be mailed to Washington, D.C., to be analyzed for total dry matter and nitrogen content. "We expect to find out," says Wilson, "if leaf dry matter and nitrogen content - which we can only get by destroying the plants - are useful indicators of soybean yields, especially for the early season forecasts."

Another chief area of research focuses on developing forecasting methods that more closely reflect conditions within the current year Right now, crop forecasting "models", or formulas, are based on relationships determined in previous crop seasons.

In years when crop growth and development are unusual, these relationships may shift and forecasting accuracy is likely to suffer Since the need for reliable forecasts becomes even more acute in unusual years, Wilson's group is giving high priority to building within-year growth models to project yields based on crop growth and development within the present season

The within-year models relate the growth of grain dry matter to some measure of time after a distinct change in plant development occurs near the time of pollination and fertilization. For corn, this has been the time after silk emergence or silk drying, and for wheat, the time following head emergence or flowering.

Generally, the models reflect a slow period of initial growth, followed by a rapid increase in the growth rate, and then a gradual tapering off until all development stops at maturity. Based on observations up to a forecast date, the model can project the amount of dry matter at maturity, and expand that information to project yield per acre.

"We've worked previously with corn growth models in Iowa, Nebraska, South Dakota, Texas, and Missouri; and with wheat growth models in North Dakota and Kansas," Wilson reports.

This year the within-year growth model for wheat will be studied in 24 small test plots in each of four Kansas wheat fields. Enumerators will determine a flowering date for each of the 100 tagged stalks that do flower in each plot

Field personnel will also clip a random sample of heads each week based on flowering date and forward the clippings to a laboratory where dried head weight will be determined Shortly before harvest, they'll clip nearby heads to determine dry kernel weight This will provide a factor for converting head weight to kernel weight at 12 per cent moisture - the standard moisture content at which grain yield and production are reported Field measurements of harvest loss will be used to adjust to a harvested yield basis

"We'll check the model's accuracy after harvest," says Wilson, "by comparing the indicated yield with the actual yield as measured by delivery of the grain to local elevators.

"This year we are also conducting a Corn Yield Research Project that will involve testing a within-year growth model and seeing if combining various weather data will strengthen early and mid-season yield forecasts.

"The first part of this project will be to evaluate a yield model developed at the University of Missouri that uses only a minimum of weather and biological data, planting date, tasseling date, availabe soil moisture at planting, and total weekly rainfall and average maximum temperature for a 10-week period starting 6 weeks before the crop has fully tasseled. Enumerators will carry out this part of the project in 20 Missouri corn fields.

The project's second goal is to come up with in-field and laboratory measurements of plants and environmental factors that are closely tied to final yield and can be used to estimate yields at the field level Data will be collected to run the within-year growth model as well as forecast yields using the regular objective yield procedures. These efforts are being made in 8 of the 20 corn fields

"After the crop is harvested, we'll compare the forecasts and final yield estimates generated with field output measured at elevator delivery. This will show us how all the indications we've gotten from regular objective yield procedures, growth model projections and the University of Missouri model - stack up against the actual yield."

Another system under study is called GOSSYM (taken from the scientific name for cotton). This is one of the more detailed crop growth and development models available. It's one of the few, for example, that accounts for rooting zone and other below-ground conditions and attempts to relate them to factors above ground.

"To more fully evaluate various crop yield-weather models, we're continuing to develop weather simulation capabilities," explains Wilson. "This is essential in using weather/growth models to forecast crop yields

"The crop growth simulation models must 'grow' the plants all the way to maturity until the one thing we're interested in forecasting - the grain or fruit - has been completely produced.

"Because we don't know what the weather will be like from a forecasting date until plant maturity, it's difficult to plug weather data into a forecasting system. We could simulate plant development until maturity by using long-term average weather conditions, but this has all the 'bad' qualities of an average - it's a little bit wet and cold and a little bit hot and dry at the same time and very different from

The familiar story

"GIVE US A MARKET and remunerating prices and we can raise an amount of produce that will astonish the world."

Does this sound like something a modern-day mechanized farmer might say as he makes his cropping plans in the 1970's?

Actually the statement was made well over a century ago by a farmer in Scottsville, N.Y.

It illustrates that incentive was always a major consideration in the minds of farmers in planning their agricultural production levels.

The New York State farmer went on to say that he was gratified to see a better system of farming taking the place of the old, careless and slovely method previously followed in Western New York

"This is to be attributed chiefly to the liberal prices obtained for our produce for the last few years, thereby producing in the farmer a stimulus to exertion, which he does not often feel when prices are so low as barely to pay the cost of production," he said.

His comments were echoed by another farmer from Dorchester County, Md.

"The last 10 years have been marked by decided reformation in the farming operations of this country," he wrote.

He cited how the most primitive agricultural implements have been replaced by equipment, such as the dragharrow Manuring was then looked upon as an idle loss of time and money, he said

"But now, how things have changed. Every farmer is striving to outstrip his neighbor in the largest yield of crops, in manuring and in all the improvements in farm machinery"

Today, as the American farmer is again called upon to play an ever larger role in helping to feed a hungry world, these words of a century and a quarter ago are more timely than ever

As back in the 1850's, the farmer is ready to do the job that needs to be done All he needs is the incentive in the form of a fair and unbalanced return for his increased effort.

Grain stocks way up

WASHINGTON, D.C - The world is in the 1978-79 crop year with near record grain stocks Wheat stocks, while down about 10 per cent from 1977-78, are still ample and course grains stand at their highest level since 1970 Stocks continue heavily concentrated in the U S , the Agriculture Department revealed last week, adding that this country holds nearly two-fifth of both world wheat and course grain stocks

With world-wide weather expected to be favorable, another sizeble buildup in already substantial world grain stocks could occur, USDA officials say However, unfavorable weather could draw those stocks down to levels comparable to those of 1973-75

Couples attend Pa. conference

Mr. and Mrs. Donald Ranck of Paradise R1, who served as resource persons and advisors to the recent Pennsylvania Association of Farmer Cooperatives Couples Conference held in Chambersburg, discuss program details with Harold F. Doran, right, associate professor of agricultural education at Penn State and coordinator of the conference. At the meeting the two assisted 35 farm couples from throughout the state in determining ways they can play a vital leadership role in local agricultural cooperative affairs.

Mr. and Mrs. J. Howard Kopp, Middleton, who took part in a Pennsylvania Association of Farmer Cooperatives Couples Conference July 18-19 at Chambersburg, discuss program details with Harold F. Doran, right, associate professor of agricultural education at Penn State and program coordinator of the conference. The two attended the event under the sponsorship of Lancaster Cooperative Council.

At Chambersburg they studied ways in which they can play a vital leadership role in local agricultural cooperative affairs.

National leadership conference traini

Two FFA'ers that attended the conference in Washington were Todd Cary and Jim Tretter, from Lehigh County.

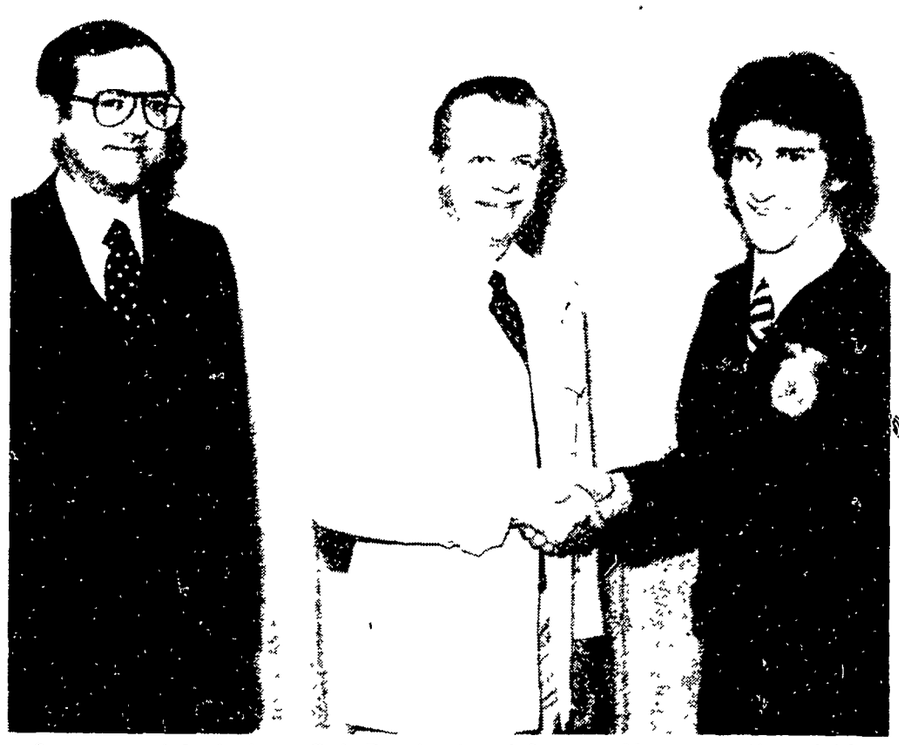
WASHINGTON, D.C. – Several FFA members from the **Lancaster Farming** area have attended a National FFA Leadership Conference in Washington, D.C., this past week. The week long conference was held at the Olde Colony Motor Lodge and the National FFA Center near the nation's capital.

Some of those attending the conference include: Todd Cary, the son of Mr. and Mrs. James M. Cary, New Tripoli; Jim Tretter, the son of Mr. and Mrs. James Tretter, Whitehall; Jeffrey Stoltzfus, the son of Mr. and Mrs. Harold Stoltzfus, Atglen; David Lantz, the son of Mr. and Mrs. Ernest Lantz, Coatesville; and Russell C. Redding, the son of Lawrence C. Redding, Gettysburg. Redding had been elected the state wide vice president of the Pa. FFA Association this past June.

The FFA Conference program is designed to improve leadership skills, develop an understanding of the national heritage, and prepare FFA members for more effective leadership roles in their chapter and community. The Conference is also a forum for the exchange of FFA Chapter activity ideas among members from across the nation.

Besides the training sessions, the 1978 program includes visits to Mt. Vernon Plantation, the National Archives, Smithsonian Institution, Arlington National Cemetery, and several other historic monuments and memorials in and around the Capital.

President Carter, in remarks to FFA leaders assembled in the White House Rose Garden, recalled his own involvement as an FFA member in 1936, as Secretary of the Plains FFA Chapter.



Secretary of Agriculture Bob Bergland and General Motors youth activities coordinator Ronald O. Woods (left) greet Russell C. Redding, state wide vice pres. of the Pennsylvania FFA Association during the recent Future Farmers of America State Presidents' Conference in Washington, D.C., sponsored by General Motors Corporation.

"I began to learn how t make a speech, I learnec how to be a leader in a smal group, and I began to realiz how important it was t broaden my area of persona interest beyond the confines of my small town."

Carter said that his responsibilities were closely interrelated with the state presidents because of the common responsibilities they share and the leadership qualities and personal attitudes they must possess to lead FFA members across the country, as he leads the country.

Following the President's comments, National FFA President, Ken Johnson, thanked the President and presented him with a copy of the FFA At 50 History Book, which was published to mark the FFA organization's Golden Anniversary in 1978.

The meeting with President Carter followed a breakfast on Capitol Hill for Congressmen and Senators from every state. Over one hundred congressmen and senators attended the eleventh annual breakfast and many more were represented by staff members. The breakfast, tabbed the largest in its eleven year history, was an opportunity for state officers to visit informally with their elected representatives and was a chance for Congressional leaders to

tors youth activities ing, state wide vice t Future Farmers of D.C., sponsored by

"I began to learn how to make a speech, I learned how to be a leader in a small group, and I began to realize how important it was to broaden my area of personal interest beyond the confines of my small town."

Carter said that his responsibilities were closely interrelated with the state presidents because of the common responsibilities they share and the leadership qualities and personal attitudes they must possess to lead FFA members across the country, as he leads the country.

Following the President's comments, National FFA President, Ken Johnson, thanked the President and presented him with a copy of the FFA At 50 History Book, which was published to mark the FFA organization's Golden Anniversary in 1978.

The meeting with President Carter followed a breakfast on Capitol Hill for Congressmen and Senators from every state. Over one hundred congressmen and senators attended the eleventh annual breakfast and many more were represented by staff members. The breakfast, tabbed the largest in its eleven year history, was an opportunity for state officers to visit informally with their elected representatives and was a chance for Congressional leaders to discuss government with young leaders of the future.

In a brief address to the nearly 400 FFA and Government Leaders, Roger B. Smith, vice president of General Motors Corporation, commended the Future Farmers of America for their outstanding contributions toward training citizens for an active role in the decision-making processes of our democracy.

Smith reaffirmed General Motors commitment to support programs like the FFA which prepare young people for leadership roles in both Government and business. "Business is no more the enemy of Government, than Government is to its citizens...our goals are similar, but our roles are different." He added that both business and Government are in reality allies, seeking to "make our country the best it can be."

The busy week in Washington for the FFA officers began with registration and the opening session outlining the conference activities. Congressman Wes Watkins, Oklahoma, opened the Monday morning session. Drawing upon his experience as a former State FFA President, he said, "When I participated in FFA Judging Contests, they taught me a lesson I still rely on today – to look for the best in people, instead of dwelling on the negative factors."

A panel on the issues facing "The Industry of Agriculture" briefed the group on new trends in financing U.S. Agriculture, Agriculture's effect on the U.S. economy, the World Food Outlook and energy concerns. The discussion was presented by representatives of the U.S. Chamber of Commerce.

In a special flag raising ceremony at the National FFA Center on Monday, each of the 51 State FFA Associations presented their state flag, and cited their specific contributions to the National Organization since its inception in 1928.

Capping off a day of visits to Congressmen and Senators on Capitol Hill, the State Presidents met with Secretary of Agriculture, Bob Bergland. The Secretary said he looked toward their leadership involvement in agriculture. "The future is bright, but it won't be an easy task for anyone without a background in agricultural leadership."

Bergland predicted a turnaround in farm and beef prices within the next three years; this due in part U.S. contributions to the world hunger cause. "We are using our food surpluses and agriculture technology to stablize their agriculture economy, and reduce our amount of food aid."

He commented that at present, our food economy is able to feed millions of hungry consumers, but is even more interested in improving food production for these countries. "Eventually the poor need to be able to earn enough to buy from us."

The visit also included the signing of a Memorandum of Understanding with the Farmers Home Administration for their support, assistance, and promotion of FFA's Building Our American Communities Program.

Jim Thorton, Assistant Director of FmHa was on hand to commend the State Presidents for their involvement and contributions as citizens representing

(Turn to Page 22)

National leadership

(Continued from Page 21)

rural American communities "Rural development is situated at the entry level point of American agriculture, providing leadership and financial support and FFA goes hand in hand with this development process through the BOAC program"

Carol Tucker Foremen, Assistant Secretary for Food and Consumer Services, explained the Food Stamp Amendment Act now before Congress and its implications for farmers and ranchers "Food Stamp Programs contributed about 2 4 billion dollars last year to our nation's Farm Economy and is a vital concern to both consumer and producer

Outlining the Act, she explained that it included tighter regulations and financial support for prosecution of stamp fraud, reduction of administration costs through simpler program guidelines and placing an absolute upper income limit on stamp recipients

Activities included an indepth look at how the National FFA Alumni Association operates, and how each FFA member's dues money is used to provide educational and support services for some 510,000 FFA members across the nation

During the week the state officers also visited the National FFA Center located south of Alexandria, Virginia, near Mt Vernon, the home of George Washington They heard members of the FFA organization staff tell about FFA award programs and new items available through the National FFA Supply Service They also had an opportunity to visit informally throughout the week with National Officers, FFA staff members and others involved in the vocational agriculture/agribusiness and FFA programs across the nation

The week concluded at the Conference Banquet hosted by General Motors and featuring an American buffet with foods from across the nation The evening's program featured "The Young Columbians," an enthusiastic theatrical touring company The 18-voice singing group portrayed a Salute to Hollywood

Veterinarians needling for nat'l disease report system

SCHAUMBURG, Ill – The levelopment and implemen*ation of a National Food* Animal Disease Reporting System in the U S Department of Agriculture was encouraged by the American Veterinary Medical Association's (AVMA) House of Delegates during the 115th annual convention in Dallas, Texas (July 17-20)

The AVMA Council on Public Health and Regulatory Veterinary Medicine, which introduced the resolution, recommended that the reporting system should be administered, funded, and staffed by USDA's Animal Plant and Health Inspection Service, Veterinary Services

According to the Council resolution, the need for the system is based on the fact that existing local, state, and federal food animal disease reporting systems are not integrated and lack uniformity in comprehensiveness and utility Studies by the National Academy of Sciences and other agencies have documented the need for a system and point to cost-beneficial advantages

Representatives from 65 constituent and allied organizations make up the House of Delegates, governing body for the 29,607-member national professional association

Horace Backus

Backus to address Dauphin dairymen

MIDDLETOWN — The Dauphin County Holstein Club will hold its annual wilight meeting this coming Monday at the Howard Kopp Farm, near here Scheduled to begin at 7 p m , the program will feature Horace Backus as guest speaker Backus is well known throughout North America for his expertise in pedigrees

The Kopp farm is located at 1597 Colebrook Road

Refreshments will be served

How and When to Treat Septic Systems

If the septic system has required pumping as often as once a year the probability is that grease and solids have been going out into the seepage area thus clogging or partially clogging the surrounding soil and restricting drainage

Even where pumping has not been necessary if the system is more than two or three years old the probability is that some grease and solids have escaped into the outflow and trouble is not far off So the treatment schedule listed below will be applicable in either situation

FOR EVERY 4 PEOPLE USING THE SEPTIC SYSTEM

1 Start the MEDINA ACTINA program by flushing one pint ACTINA into any drain leading directly into the septic tank
2 Two weeks later repeat the above treatment
3 Thereafter use one half pint each month Treat regularly

If the septic system has a distribution box between the septic tank and the seepage area treat with ACTINA in the distribution box as follows

1 For every 50 people using the septic system pour 1 gallon ACTINA into the distribution box
2 Three weeks later repeat the same treatment

This low cost preventive maintenance program will help to preserve the useful life of the investment in the septic system and will reduce the necessity to pump out solids to an absolute minimum When you consider the high cost of replacing the septic system or any part of it the investment you will be making in ACTINA should reduce costs and show a worthwhile dividend

Young Farmers compete in plowing contest

By KENDACE BORRY

MARIETTA — The weather may have been a little threatening on Wednesday but that didn't stop five northern Lancaster County farmers from their day's plans. Members of the Elizabethtown Young Farmers Association gathered at the Paul Hiestand farm, Marietta R1, for the group's first plowing contest.

The tractors gathered early in the morning and lined up at the rectangular plots which had been staked out in an open field. Then they began the job on which their skill was judged.

There were two divisions in the contest-the mounted plow division, with one entry, and the semi-mounted or large plow section, in which four farmers competed.

Winner in the smaller competition was Brian Risser, who scored 185 points out of a possible 200 perfect score He used a John Deere 4000 tractor The dairy farmer from Bainbridge R1 related that he farms about 450 tillable acres on his farm

In the larger division, first place honors were given to young Steve Kauffman, with his score of 187 points. Steve, who works on a dairy farm along with his father Robert Kauffman near Elizabethtown, used a 7030 Allis Chambers tractor for his plowing.

Second place honors went to Don Mowrer, Marietta R1, who just happened to farm the land that was used for the plowing contest. He

(Turn to Page 37)

Showing his style in the plowing contest, Donald Mowrer, Marietta R1, takes his Massey Ferguson 1155 through the plot. He scored 185 points out of a possible 200, taking second place in the semi-mounted, large plow division.

Winners in the Elizabethtown Young Farmers plowing contest included from left to right, Steve Kauffman, Elizabethtown R1; who won the semi-mounted, large division; Brian Risser, Bainbridge R1; who won the mounted plow division; and Don Mowrer, Marietta R1; who placed second in the semi-mounted large plow division.

WINTER **NEWS LETTER** 1977

DECEMBER 1, 1977

It's the time of the year when cows head into the barn for the winter. It is a long six months for those cows on uncomfortable, cold, hard concrete Concrete under cows costs dairymen millions of dollars a year in injuries, cow turn over, lost milk production and veterinary bills Mother Nature never intended for cows to be on concrete — man did this to his cows and has been paying the bill ever since I've always said if you take stress away from man he'll do better, it's the same for animals Put "Red Barn" cow mats on top of concrete or in concrete and watch the results.

Here's a "result" report from an excellent "Red Barn" dealer in eastern Wisconsin. "We installed 108 "Red Barn" cow mats for a customer in a free stall barn this past summer and his first full month on mats showed the dairyman an amazing 500 pound increase in milk production **per day**." We can't guarantee this kind of results, but we know if you eliminate the stress you get results and it's a big help to the pocketbook I'm sure this dairyman is as happy as a new bride in a fully furnished new home, which he should be Just imagine 500 pounds per day at $9 00 cwt is $45 00 per day or $1350 00 per month or $16,200 00 per year If he paid list price for the mats he's still over $10,000 00 ahead profit wise for the year That sure doesn't hurt the pocketbook! This 108 free stall barn was built several years ago and the stalls weren't cemented out Instead, a clay base was used and we know today how cows really dig it up Not only is this uncomfortable for cows but the holes and pockets enable the cow to get under the divider and can't get up Laying downhill is common in these situations. Did you ever see a cow laying downhill out in the pasture, no way, it's just reverse. So, this 108 free stall barn was cemented out and matted and the result story is in. Thanks to John Reinke, our dealer, for this result story

Realtors claim steady demand for raw land

WASHINGTON, D.C. — Despite high costs, the uncertainty of profit prospects and governmental policies and regulations, there still is a general attitude of optimism about investment in raw land, says the National Association of Realtors.

The association's Department of Economics and Research reports in its annual Spring market survey that the demand for finished lots and acreage with utilities available is strong, and is expected to continue strong with land prices outstripping the rate of inflation.

Complex zoning ordinances, slow- or no-growth policies, and environmental regulations have not lessened the demand for land, the report indicates

The survey is based upon responses from a panel of realtors across the nation who specialize in the sale of non-farm land.

Risks involved in investment in raw land for some time have led traditional lenders to be wary of financing these purchases And, in today's tight mortgage credit market, lenders are even less willing to make land loans Forty-five per cent of the respondents described land investment credit as "tight" and 14 per cent said it was not available

In view of the reluctance of conventional sources for credit, the report says, financing by the seller is often the answer to land purchase funding

Although the seller has to settle for a mortgage rather than cash, he can offer a greater flexibility in conditions of the transaction A higher loan-to-value ratio may be presented, and lower interest rates and longer mortgage terms may be negotiated than with an institutional lender

Additionally, the realtor economists point out, the seller can minimize his tax liability by qualifying the transaction as an installment contract

Despite mortgage credit obstacles to land sales, the demand for residential development land is strong, although it varies with location and zoning requirements, the report says. Eight-one per cent of the respondents reported a substantial or moderate increase in the demand for such land from a year ago

An increase in demand for commercial sites was claimed by 70 per cent Land destined for industrial development, recreational use or held for speculation showed a lesser increase in demand, with from 41 to 48 per cent of the areas surveyed indicating an increase

The volume of land transactions this Spring in all categories was holding up well, the report notes, with nearly three-quarters of the respondents reporting that residential site sales were up either moderately or substantially

Nearly two-thirds said the same for commercial sites, and more than 40 per cent indicated increases in land transfers for industrial, speculative and recreational sites In none of the categories did more than 11 per cent report a decline in sales

Price increases reflected a similar pattern, the report says, with residential land prices up about 12 per cent, commercial sites up 9 per cent and the other categories showing about a 6 per cent increase.

Dauphin Co. pig roast held

Members of the Upper Dauphin County Beef and Pork Club held a pig roast last Sunday, cooking a 100 lb animal for the event Don Sunday, here seen on the right, supervised the roast, getting some help from host Jim Fair on the left, and Merrill Crone, from the York Co Extension Service. The pig was donated by the Sweigard's, of Halifax R3 Over 50 people attended the event

Toss those old caps in the can, boys

. . . your new red, white and blue ones are ready now.

It seems like when you get that old hat off your head you can think more clearly And this is thinking time not buying time

Your Jacques dealer should be by soon with your free gift for not buying now. If not, just flag him down the next time you see him. It is a gift we want you to have. And of course it will also remind those other salesmen that you'd just as soon wait to buy until this fall when all the facts are in.

For a goodly number of years now we've been holding our salesmen back and telling them they can't sell early like those other companies do We found most of our customers like the idea of not being asked to buy before they know how their varieties did this year And by waiting, you will receive the results of our 412 Field Shelling Trials, before you order.

We're really kidding about throwing away those old hats. Keep yours to wear while you're on the farm. That will keep that pretty red, white and blue one nice and clean to wear to town.

Jacques . . . Just say Jake's

Showers, humidity slowing fieldwork

HARRISBURG – State Agriculture Secretary Kent Shelhamer says development of crops on Pennsylvania farms continues to lag 1977, as showers and high humidity are breaking up fieldwork activities.

According to the Pennsylvania Crop Reporting Service parts of five days were considered suitable for fieldwork during the week ending July 31, but scattered showers held down field activities. One third of the to the Crop Reporting Service that soil moisture supplies are short, with the rest reporting soil moisture as adequate.

Early apples and peaches are now being picked in the state. Snap beans are available in good volume, while the current supply of tomatoes, sweet corn, and cabbage is somewhat light for this time of the year. The grape crop appears good but damage is evident from Japanese beetles.

Pennsylvania's corn crop is now rated 56 inches tall, ten days behind the 69 inch height a year ago. Development is very uneven, with some areas reporting ear formation while other fields nearby have not yet tasselled. The corn in the north stands at 50 inches, central counties are 58 inches and the southern counties show 62 inches.

In some areas, the crop was hurt by severe rain and hail storms Japanese beetle damage is reportedly severe in some southern corn fields. Reporters express hope that recent rains will alleviate wilting.

Soybeans are looking good, along with tobacco and potatoes Japanese beetle damage was noted in soybeans and potatoes. Some black shank has been noted on the tobacco crop where topping has begun on a small scale. A few early potatoes are being dug.

With 75 per cent combined and another 15 per cent ripe, barley lags last years 83 per cent by ten days. Combining is virtually complete in the south, 81 per cent in central counties and 48 per cent along in the north

Wheat is now 49 per cent combined with an added 35 per cent ripe. This is six days behind the 57 per cent combined a year ago. The north is 23 per cent done while central and southern counties stand at 44 and 80 per cent combined, respectively.

Oats, at five per cent harvested and one-quarter ripe, also are behind last year's progress which stood at 23 per cent combined at this time. Combining in northern and central counties is under five per cent, but the south is 13 per cent completed.

Hay quality slipped last week due to over-maturity and being moistened before pick-up Reports of good and fair quality are now about even. Clover-timothy first cut is now 94 per cent done, about two weeks behind 1977 progress Alfalfa second cut is 52 per cent along, twelve days behind last year. Feed from pastures is rated mostly average to somewhat below average. Alfalfa is showing damage from leaf hopper and leaf blotch minor.

Unique land use plan developed by Lebanon's Millcreek Township

LEBANON — Millcreek Township of Lebanon County last month adopted a unique land-use plan which set up an Agriculture-Industry District It is the product of five farmers in the area who worked closely with the County Planning Comission in order to come up with a workable land preservation and development plan

The provisions which were incorporated into the plan allow farmers to have a voice in the destiny of the AID program Keeping prime farmland in production is a primary objective Also since industrially zoned parcels of land allow only industrial development, it was noted that the same should hold true for agriculture, which is also an industry

The planners envisioned that the soil map should become as important as the zoning map, and soil productivity charts are included in the ordinance Certain restrictions on intensive livestock raising operations are included in order to avoid future nuisance ordinances

A provision is included which would require impact evaluation statements under such circumstances as a public utility setting up an energy park, etc The effect on the farming community will be given special attention

Another unique feature requires that subdivisions of prime farmland are allowable only as farm land Land designated as not prime may be subdivided for possible retirement or children's residences

Cows cited

PETERBOROUGH, N H — Two registered Guernsey cows in the herd owned by Raymond and Louise Witmer, Willow Street, have produced over 100,000 pounds of milk each in their lifetime on DHIR They are Meaflands Nibbs and Penn Del Brilliant Connie, reports the American Guernsey Cattle Club

Royalty visits Goshen Fair

Royalty visits the Goshen Fair each year. For 1978, the Fair's official hostess, Mrs. Bobbie Everhart of West Chester, right, and the recently crowned Miss Goshen Fair, Ruth Ann Supplee, left, welcomed two young princesses from the Pennsylvania State Grange. Second from left is Grange Princess Cindy McCullough, 20, of New Galilee R1, Lawrence County. She is the daughter of Mr. and Mrs. W. Paul McCullough and represents the Grange at many functions throughout the Keystone State. To her left is 14-year old Carol Rennard, daughter of Mr. and Mrs. Harold Rennard of West Chester. She is the Junior Princess of the Pennsylvania Grange. Miss Supplee -- The First Lady of the 1978 Goshen Fair -- is the 16-year old daughter of Mr. and Mrs. Tom Supplee of West Chester.

250 attend Lancaster Holstein field day

Cindy Martin gained a new friend at the Lancaster County Holstein field day this week. She won the calf which was purchased by the Club from Lititz area Holstein breeders Ken and Nelson Stoner.

By SALLY BAIR
Staff Correspondent

LANCASTER – Tuesday wasn't a good day for field work, but it was a good day for visiting with neighbors, and nearly 350 Holstein breeders and their families took advantage of the rainy weather to participate in the annual field day sponsored by the Lancaster County Holstein Association

Host for the event was the Jay Landis family, whose Pataja Farm is located just south of Millersville along Short Lane Although the drizzly weather forced the judging contest to be held in the barn and caused the chicken barbecue lunch to be moved to a pavilion at nearby Circle M Ranch, most dairymen had a chance to look over the facilities at Landises. They own about 120 acres of land, with 70 tillable, and rent another 70 Last year the herd average was 15,400 pounds of milk, with 597 fat They have a 103 9 BAA. Landis said they are trying to concentrate on four cow families, and find that their better cows keep coming from these families.

The big winner of the day was eleven-year-old Cindy Martin whose name was drawn from 50 eligible entries to receive a January calf purchased by the Association from Ken and Nelson Stoner, 196 West Lexington Road, Lititz.

Top scorers in the judging contest of the Holstein field day were, left to right, Mrs. Tom Zartman, Darryl Mills and Jim Charles, winning the ladies, youths, and men's divisions, respectively. Charles was high over all.

Cindy and the calf, a big, well-grown heifer, seemed to take well to each other on first meeting, and Cindy held her firmly for picture-taking. Cindy said, "I couldn't believe it when they called my name. Taking care of her will be an experience." The daughter of Nelson E. Martin, Ephrata R1, Cindy said she works on her father's farm by helping to feed the cows. She will join the 4-H dairy club and will

AGWAY

Worms Are Stealing Your Milk

Break the worm cycle with

BAYMIX FROM AGWAY

More than ninety percent of all dairy cows are worm-infested It s true Researchers have found worms in nine out of ten dairy cows inspected With these odds chances are your herd has worms (internal parasites)

Worms can cost you money by reducing...

- milk production potential
- feed efficiency
- growth of replacement animals

BAYMIX is the "Dollars and Sense" wormer. Here's why:

- There is no milk withdrawal with Baymix so you can worm the whole herd at one time milking cows dry cows calves and replacements
- Only by worming the whole herd at one time can you effectively break the worm cycle and reduce internal parasitisms on the whole farm
- Easy and convenient to feed No handling or restraints to stress animals Just topdress on feed for six days

Let Agway check your herd for worms...

- using a fecal test kit Agway can tell if worms are present in your herd If worms are present a Baymix worming program can be started now The recommended Baymix program to reduce parasite levels on the whole farm is a worming in the Fall and again in the Spring

Start using Baymix and stop worms from stealing your milk

Make an appointment for a herd fecal survey today

'Vacuum bottle calf' born in West Germany

The first calf ever born of an embryo exported from the United States was born in June in Germany, it has been announced last week by the Genetics Division of Carnation Company Only four months earlier the same company reported the birth of the first U S calf to come from a frozen embryo

The export story began last September when an embryo was recovered from a registered Holstein by the embryo transfer team at Carnation/Genetics in Hughston, Calif Embryos are regularly recovered and transferred to other cows at the Genetics facility, but this embryo was selected for shipment to Germany

It made the trip riding in a special fluid inside a straw, like the ones used in packaging semen for artificial insemination The straw was then placed in an insulated vacuum bottle to maintain a suitable enviroment for the embryo

This unusual incubator was carried from Modesto, Calif , to Frankfurt, Germany, by Joe Aguirre, regional director for Carnation/Genetics' International program As soon as he arrived in Germany, Aguirre hurried to Neustadt/Aisch where technicians were waiting at an A I and embryo transfer center. Within 14 hours of its recovery in California, the embryo was planted in a Friesian recipient cow by Professor J. Hahn

The birth–nine months later– of a Holstein heifer proves the feasibility of shipping genetically superior embryos around the world

The donor cow belongs to the Diamond S Ranch of Waterford, Calif , owned by Wes and Tom Sawyer.

Bambi, a healthy Holstein calf, was conceived in Hughson, California, and born of a Friesian foster mother in Neustadt/Aisch, Germany. Bambi made her international trip as a tiny embryo snuggled in a vacuum bottle.

Celebrating our 20th year in business

1 OUT OF 3 DAIRYMEN ARE WORMING THEIR HEALTHY-LOOKING COWS. SOON IT'LL BE 1 OUT OF 2.

HERE'S WHY.

More and more profit-minded dairymen are convinced their healthy-looking, high-producing herds are infected by worms Even in cold northern states.

They're convinced that worms can slow growth of young stock and delay maturity of heifers

They're convinced worms cut milk production in their milkers

What makes them think so?

Large-scale trials, demonstrations, and experiments in Wisconsin and elsewhere have shown how widespread and damaging worms really are The figures are convincing (Data on request)

More dairymen are worming because they are *learning* about worms how they reproduce and do damage, and how worm control with TBZ®, the Pre-Freshening Cattle Wormer, can help pay off

Knowing is believing

Once the facts are known, it isn't hard to believe that 9 out of 10 herds have worms Or, why milk losses can be high Or, why a worm-control program can pay for itself many times over

Get the facts

Get the facts for yourself Send for this 16-page, easy-to-read, illustrated booklet on worming of dairy herds It's free it's helpful, and it may give you some of the most important management information you'll get this year Why not sit down and send for it now

Milk sales are up

WASHINGTON, D.C. — Sales of milk and dairy products were up more than four per cent (2 billion pounds milk equivalent) during the first five months of 1978, according to the latest (July) Dairy Situation Report from the United States Department of Agriculture.

Strong gains in cheese and butter sales and small increases in fluid sales have led to overall gains. While the rate of increase in dairy sales probably will slow down in coming months, demand is expected to remain strong.

Even though income conditions for dairymen have remained favorable, milk production has weakened considerably since last Fall, say USDA spokesmen. Economists here suggest this may indicate a slight downward readjustment after the very sharp boosts of the preceding two years.

Later this year, milk production is expected to stabilize at a level below last year's accelerating output and the 1978 total may be about one per cent below 1977's 123 billion pounds, USDA concludes

Ag exports set record

WASHINGTON, D C — Agricultural exports set a new record in May of this year when over $2 7 billion worth of U S farm products moved abroad That's up sharply from previous monthly highs and well above a year ago, reports the U S Agriculture Department Grain and oil seed shipments accounted for most of the increase.

Exports of farm commodities thus far this fiscal year, totalling nearly $17.9 billion, are running almost five per cent ahead of last year Agriculture's trade surplus - exports less imports - totaled $6 5 billion, up from $8 billion this same time last year.

VAN DALE® SHAKER FEEDER

GET THE SHAKER FEEDER FEATURING THE ALL NEW STAINLESS STEEL TROUGH WHICH GIVES YOU THE 3-IN-1 PACKAGE. THE TROUGH, THE FEEDER AND THE NECK PAIL TO RETAIN ANIMALS. DESIGNED TO FEED EVERYTHING FROM A COMPLETE RATION RIGHT DOWN TO GREEN CHOP OUT OF THE FIELD — EVEN BALED HAY.

Here's the feeder that brings you economy and simplicity of operation unexcelled anywhere by any feeding system That's because VAN DALE shaker feeder is a feeder, a bunk, and a guard system all in one

There is no auger no chain no belt It all means you have fewer moving parts to worry about than with most feeding systems You can use any feed mixture you want, even baled hay It can be of any cut any quality, and quantity Whatever the mixture is, it will be distributed uniformly the entire length of your feeder

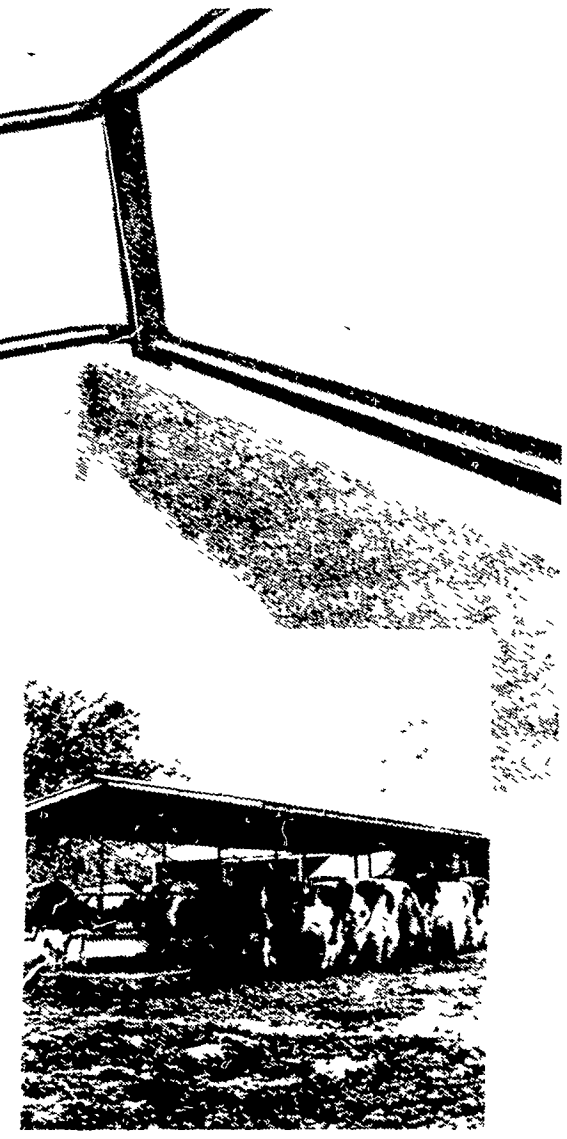
You'll find this a low maintenance feeder due in large part to the stainless steel trough you see above The trough cleans itself and is polished mirror bright by feed movement Adds good looks to your farm

With its combination feeder, bunk and guard system, The VAN DALE shaker feeder offers the most economical way to put a bunk and feeder to work for you At the same time it offers complete safety and protection features

Also available are other features to make your shaker feeder more valuable For instance there's an in-line connector that lets you join additional section lengths to get continuous trough installations over 82'

There's a hay slide so you can feed both low moisture silage and hay As hay falls on the slope the end of the slide is raised to let silage go underneath

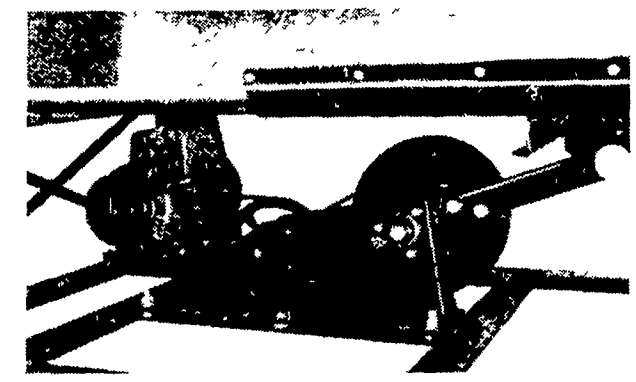
There's provision for installing a bunk roof to protect your animals Van Dale supplies supports so roof can easily be added by purchasing stringers and sheeting locally



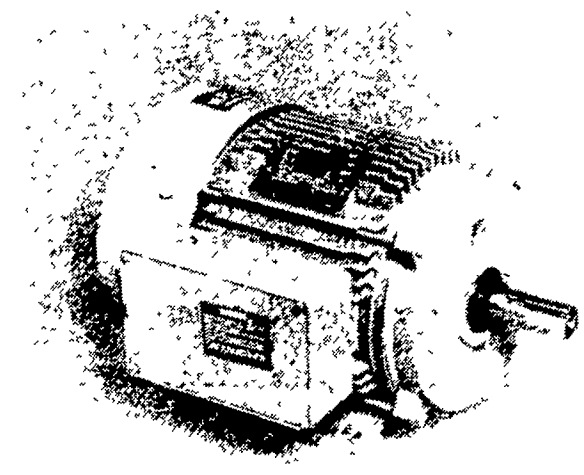
82' Shaker Feeder with Bunk Roof.

SPECIFICATIONS

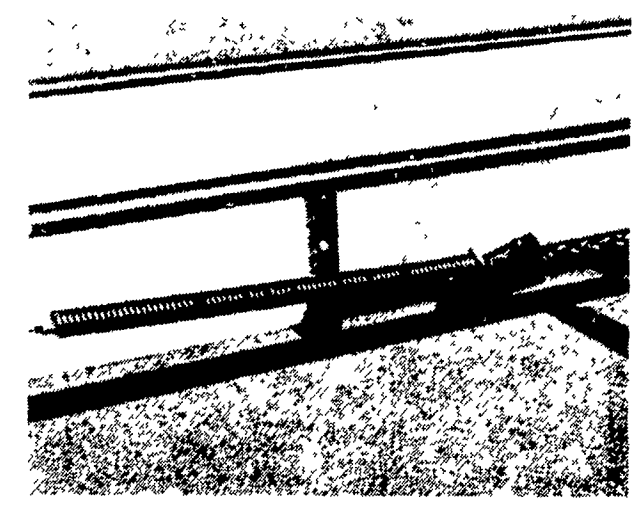
Shaker Feeder	
Maximum length	82' per drive
Maximum horsepower	3 hp 240V per 82'
Section lengths	10'
Trough material	Stainless steel
Height/base to top trough	30"
Trough width	33½"
Trough depth	12"
Power transmission	Belt and chain drive
variable speed 230 to 300 strokes/min	
Stands and rub rails	
Height of stands	55"
Overall width assembled	42½"
Rub rail spacing	19"
Rub rail material	1 7/8" OD pipe
Roof support (optional)	
Normal height above feed floor	86"
Height/eave to ridge	Add 18¼"
Overall width	184½"



Feed slowly or quickly Variable speed drive lets you change delivery and travel speeds Simple heavy duty drive means minimum maintenance Shielded drive unit located safely beneath trough



Dependable 3 hp motor Here's all the power your shaker feeder needs for 22' to 82' lengths Heavy duty sealed ball bearings bring hundreds of hours of trouble free service Use tandem drive units to achieve virtually any length you want



Uniform feed distribution Unique shaking action distributes feed evenly yet without separation Action comes from combination of crank and pitman on outward stroke with heavy spring shown above on the return

Karl Brown, 6, son of Mr. and Mrs. Joel Brown, Oxford R1, wasted no time befriending the calf he won during the Chester County Holstein Club's field day.

Chester County Holstein Club holds field day with 200 in attendance

COATESVILLE – William H Pettit of Huff 'N Puff Farm, Juliustown, N J was the main speaker at the Chester County Holstein Club's annual field day, held Tuesday evening at the Donald Hostetter farm, near here.

Pettit discussed his family's recent milking herd dispersal, emphasizing promotion and advertising as essentials for a successful sale, and noted that testing and classification records strengthen sales.

Clarence Stauffer, HFAA program director, discussed several programs available through the Holstein-Friesian Association of America.

Junior members met with Linda Kauffman of Elizabethtown. The junior awards program was her main topic

Three classes of cattle were judged by participants with Pettit as official judge. Top judge of the evening was Steve Snyder with 146 out of 150 points. He chose a unit of Hilltop Apollo Ivanhoe semen as his prize

In the men's division Lester Eby, Earl Stauffer, and Merle King tied for first place, followed by Richard Breckbill and Ed Kulp.

Placings in the women's division were 1 Barb Stauffer, 2. Helen Zimmerman, 3. Susanna Umble, 4. Anna Stoltzfus, and 5. Sandy Lusby.

Youth division placings were 1. Snyder, 2 Neal King, 3. Marilyn Stoltzfus, 4. Nancy Yarnall, and 5. Tom Snyder

Judging contest prizes included semen donated by Atlantic Breeders, ABS, Carnation Genetics, Neba, Curtiss, and Donald Hostetter Other prizes were donated by Harvestore, Brown & Rea, and Lloyd E. Kreider.

The registered heifer calf, Pep-L-Lea Job Bess, a daughter of Hillhaven Standout Job, was won by Karl Brown The calf was donated by Robert E. and Jane C. Pepple.

Refreshments were enjoyed by about two hundred people in attendance.

Soybean meal exported

WASHINGTON, D.C. — Exports of soybean meal rose 19 per cent - to 3.8 million tons - during May of this year, according to an export activity report issued by USDA last month.

Other oilseed products showing gains on the overseas markets were sunflower seeds, peanuts and vegetable oils.

QUEEN ROAD REFRIGERATION

AUTHORIZED DISTRIBUTOR FOR

VM Diesel

"THE DIESEL WITH A DIFFERENCE"

Cuts your power costs because it's way ahead of its time on all points.

AVCO-VM diesel engines are world-proven money-savers They deliver maximum power efficiency immediately, under any sudden load or climate variation Their higher power to weight ratios mean NO REDUCTION IN HORSEPOWER to qualify for pollution standards

They're stingy on fuel, too Many users report fuel consumption CUT IN HALF — and more — compared with gasoline engines In some installations, our diesels are delivering more than TWICE the hours of operation per gallon of fuel

Faultless performance is the norm, rather than the exception A choice of 27 premium quality air-cooled Avco-VM's (5 to 670-hp) means there's one that's right for your application

Modular, unitized construction means fewer specialized parts, lower weight per hp, lower maintenance costs, 70% parts interchangeability — and they'll fit the tightest space

Congratulating Premier Exhibitor of the Goshen Holstein Show, Donald Eastburn of Toughkenamon, second from left, are Chester County Dairy Princess Beverly Hershey, Jim Shaw, official judge and Holstein breeder from Oley, Berks County; and Stan Guest, right, who served as show chairman of this year's show.

Top exhibitor among 4-H and FFA Holstein entrants at the 1978 Goshen Fair was Ed Breckbill of Oxford, showing the grand and reserve grand champion in the youth division. He holds the champion while his father, Richard, is at the halter of the runner-up.

Art Hershey

(Continued from Page 1)

Three Year Olds, Milking - 1 Art Hershey, 2 Art Hershey, 3 Susan Pepple

Four Year Olds, Milking - 1 Richard Breckbill, 2 Art Hershey

Dry 3 and 4 Year Olds - 1 Donald Eastburn

Aged Cows, Milking - 1 Dean Yarnall

Aged Cows, Dry - 1 Beverly Guest, Pottstown.

Best Udder - 1 Art Hershey, 2. Art Hershey (with the grand champion and reserve grand champions, respectively), 3 Ed Breckbill, with his grand champion in the youth division

Senior Get - 1 1 Art Hershey, 2 Ed Breckbill, 3 Donald Eastburn

Best Three Females - 1 Art Hershey, 2 Ed Breckbill, 3 Darrell Guest

Dairy Herd - 1 Art Hershey, 2. Ed Breckbill, 3 Don Eastburn

Produce of Dam - 1 Art Hershey, 2 Dave Weaver, 3 Dean Yarnall

Dam and Daughter Pairs - 1 Richard Breckbill, 2 Nancy Yarnall, 3 Ed Breckbill

Hershey's champion was Ar-Joy Triune Complete Noreen II, a 3-year old daughter of Paclamar Triune Complete His reserve champion was another 3-year old, Five Forks Elevation Pamela, a daughter of Round Oak Rag Apple Elevation.

Breckbill's champion was a senior yearling sired by Round Oak Rag Apple Elevation

In showmanship competition among junior entrants, Nancy Yarnell, Darrell Guest and Tom Roth placed 1-2-3, respectively The senior placings were: 1 Susan Pepple, 2 Ed Breckbill, and 3 Donald Eastburn

Top fitters among the juniors were 1 Nancy Yarnall, 2 Cindy Hohl and 3 Darrell Guest Among the seniors, the top three were Susan Pepple, Ed Breckbill and Lois Mark

John Yocum, superintendent of Penn State's research farm near Landisville, points out how farmers can best control insects and weeds in their tobacco fields.

Dr. Elwood Hatley reviews soybean production techniques with Lititz farmer Raymond Bucher.

Field day

(Continued from Page 1)

program was the revelation by Penn State's Dr. David R. MacKenzie that a high-yielding russet potato which has many of the desirable features of the more commonly grown Kennebec variety, could put Pennsylvania back into competition in national potato production The new variety of potato MacKenzie and others are experimenting with would be a dual-purpose one which could be used for both table and potato chip markets.

Dr Richard Fox, assistant professor of soil science at Penn State, is now in his third year of experiments cncerning Nitrogen fertilizer availability The study promises to save farmers dollars n fertilizer costs once it is perfected. According to Fox, no reliable, quick, routine test is presently available for Nitrogen presence in the soil He and his associaties hope to develop one before too long and when that happens farmers will know much more precisely how much Nitrogen they need to put into their soils.

"It'll be a great breakthrough if it works," the researcher commented, adding that so far the study looks very promising.

Fox has been working with the program for three years and has had Nitrogen studies in progress here for two years. Last year, he noted, his experimental fields yielded an average of 155 bushels of corn per acre even though the plants were given Nitrogen in the starter fertilizer only. The experiment showed that the plants did not respond to additional Nitrogen.

The conclusion so far is that Nitrogen oftentimes does not need to be put into the soil The result would be tremendous savings in fertilizer costs and a reduced demand for natural gas, the basic component from which Nitrogen fertilizer is produced

Other news Fox made availabnle to the visiting farmers included the fact that urea and diammonium phosphate in starter fertilizers can be detrimental to growing plants, especially if they are growing slowly, as they would during cool weather

Explaining, Fox said the urea and diammonium phosphate form toxic ammonia during colder weather spells when the plants are not growing as well.

John Yocum, who is known all over the Northeast and Middle Atlantic area for his expertise in tobacco management, discussed virus, insect, weed and disease problems with interested tobacco growers. Noting that aphids are generally a major problem, he suggested that proper aphid control requires at least two sprayings. The problem has not been as bad this year due to frequent rains which often wash the tiny insects off the tobacco leaves Yocum is superintendant of the Landisville research facility

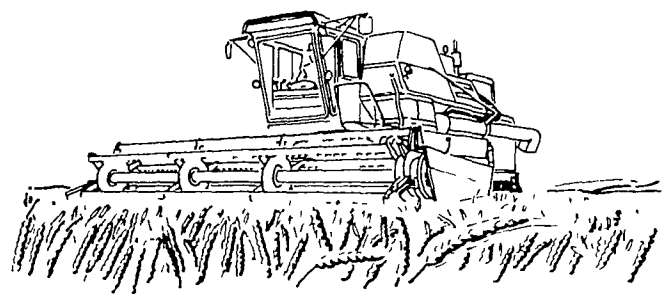
This year's soybean crop looks excellent to Penn State's Dr. Elwood Hatley, who hosted visitors to the soybean fields. Pointing out that a new variety from the Midwest is showing great promise as a high-yielding, upstanding plant, he described yield and management trials to numerous farmers from the area. The new variety, named Elf, stands about 21 to 22 inches tall, compared to 34 to 36 inches for more traditional varieties. It has a determinate growth habit, meaning that at a certain stage of its development it puts all of its energies into reproductive growth while halting vegetative growth This accounts for its smaller size and differentiates it from the more commonly grown varieties such as Williams Hatley and others recommend that the recently developed Elf variety be grown in 24 inch rows.

According to research findings thus far, Elf stands nice, poses no lodging problems during harvesting, has high yields, and is of the same maturity as Williams

Farmers making the tour here were also told of the advantages of growing anthracnose resistant varieties of alfalfa According to Yocum, non-resistant varieties show only 15 to 25 per cent of their original stand after the second year while the newer disease resistant varieties have outstanding longevity

LOOKING FOR BETTER WHEAT YIELD IN '79?

PLANT Hart!



HERE'S WHY:

★ HART topped the 1978 Penn State Agronomy Research Trials outyielding all the standard varieties and the new varieties S76, Logan, Ruler, and Potomac.

★ HART has the greatest resistance to wheat Spindle Streak Mosaic Virus which causes 10-30% Yield loss in other varieties.

★ HART Repels DEER and BIRDS.

★ HART drys down fast after physiological maturity as the beard acts as a wick, drawing out moisture.

★ HART described as medium short in height produces good straw because the disease resistant plants produce many tillers.

★ HART responds to high fertility and is clearly adapted to Pennsylvania conditions.

weather extremes in the real world.

"What we've developed, and continue to refine, is a procedure for generating, through computer simulation, sequences of daily weather data. By developing many independent sequences of weather from a forecasting date until crop maturity, we can study the extent of uncertainty about yields due to our lack of knowledge about future weather. This may ultimately help us determine the best times for forecasting yields and crop production

tar," claims Wilson, 'have been highly encouraging We expect that we can develop a simple and relatively cheap model to p daily sequences based meteorological

Hereford field day honors farmer

ITHACA, N Y – The New York Hereford Association and the New York Junior Hereford Association held their Summer Field Day recently at the Cornell University Livestock Teaching and Research Center with more than 200 persons present.

A highlight of the program was the honoring of Harold Smith of Highlawn Farm, North Rose for the more than 30 years of service to the Hereford breed and the Hereford Association. Bud Snidow, assistant secretary of the American Hereford Association, read a citation naming Smith a "Master Breeder" This is an honor that is given only to a selected few persons for their dedication.

Robert Sullivan of Dundee, president of the New York Hereford Association presented Smith with an honorary life membership in the state organization and cited Smith for his leadership Mrs Smith was presented with a bouquet of roses

Another highlight of the day was the tour of the teaching and research center with an explanation of the research projects by Dr Dan Fox, Prof Michael Thonney and Mark Semlek.

One of the research projects concerns the management of beef cows to rear two calves An overall objective was to gain a better understanding of maternal behavior in the beef cow since the most important part of the cow-calf operation is the production of a weaned calf from each cow.

Another research project is measuring the effect of creep feeding on the growth rates of nursing calves and the effect of nutrient intake of the cows

One of the research projects that drew quite a few comments and interest of the cattlemen attending the Field Day was that of forage management. This research is being conducted on a 100 acre hillside site just east of the Research Center

There was a judging contest in the morning and awards were presented during the afternoon program Judy Shaver of Livingston Manor was winner of the women's division and Earl Muck of Emerald Haze Farm, Clarence, was the winner of the men's division

Junior winners in the order of placing were Jeff Schonberg of Illion, Tim Swiler of Cameron and Chris Peters of Hancock Junior team winners in the order of placings were Patty Joyce of Penn Yan, Peter Andersen of Long Eddy and Christine Malm of Demark; the Swiler Brothers of Cameron; and Priscilla Peters of Hancock; Ron Finewood of Marion, and John Kriese of Liverpool

Lisa Kriese won the Public Speaking contest with her talk on "Marketing Herefords" Priscilla Peters was second, Ron Finewood third, and Mary Sullivan, fourth

Anna Andersen was selected to be the 1978-79 Hereford Queen She is the daughter of Mr. and Mrs August Andersen of Long Eddy Miss Andersen was also presnted the 1978 achievement Award

Cattle, calves down

WASHINGTON, D C — According to the United States Department of Agriculture's Crop Reporting Board, all cattle and calves on hand in the U S as of July 1 were estimated to be down seven per cent from a year earlier, and nine per cent below July 1, 1976 levels

All cows and heifers that have calved, at 48.5 million head, are down seven per cent from a year ago and 10 per cent below two years ago

The 1978 calf crop is expected to be 44 1 million head, off four per cent from the 46.1 million head counted in 1977 and 13 per cent less than the record high of 50 9 million head of 1974

Strong milk prices

(Continued from Page 1)

dairymen in this region as well as other federal orders across the country

According to York, the membership of LeHi for the first six months of 1978 received slightly less than the market administrator's announced weighted blend price, the reason being that farmers are charged hauling and cooperative marketing assessments Lehigh's membership faired well since the average member's return was $10 per hundredweight, he noted Variation in returns to members depends on hauling rates and each producer's base excess production Those producers without an established base average slightly less - $9 70 for the same period of time Producers are now in the base building period to become effective March 1, 1979

John York

Milk supplies are alikely to become shorter during the last half of 1978 as the production pattern follows the downward trend in producer numbers Dairy farm numbers in the Mid-Atlantic market are down by eight per cent in June from a year ago and five per cent amongst the three federally regulated markets in the Northeast

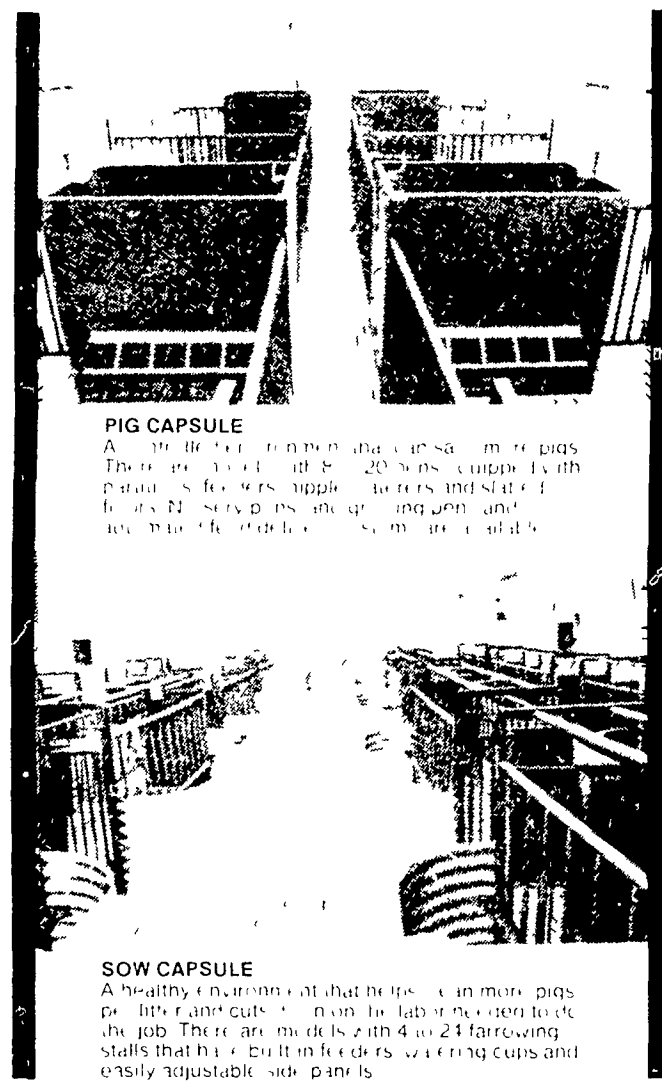
Make plans for a swine confinement building that is right for your operation.

What an AG Best Capsule will do for you
• Provide uniform air distribution No drafts • Provide 2 environments within one environment for sows and pigs • Reduce feed wastage and cost • Reduce your labor and time • Reduce stress to a minimum • Provide comfort for the operator • Provide heavy insulation for less energy use • Provide all the tools needed for good management
There are many Pig Capsule models for farrowing growing and finishing So plan on a building that is made right to do the right job for you



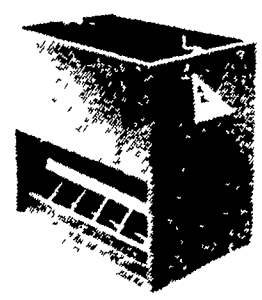
PIG CAPSULE
A [illegible] pigs The [illegible] with [illegible] feeders supplies [illegible] and starter [illegible] Nursery pens [illegible] and [illegible]

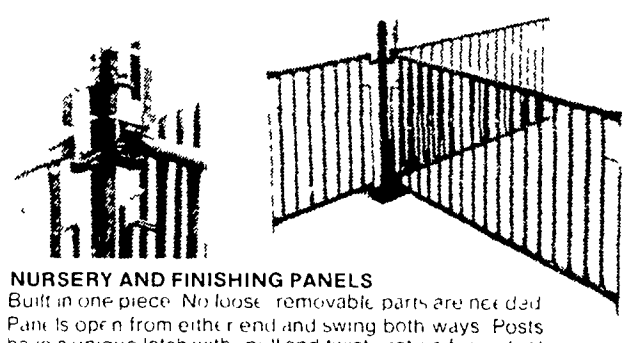
HOG CAPSULE
Clean dry and comfortable hogs can gain faster minimum feed [illegible] less disease and are more [illegible] 8 or 10 pen models have vertical steel tube partitions a dry feeder and 2 supplicators in each pen Automated feeding available

SOW CAPSULE
A healthy environment that helps [illegible] more pigs per litter and cuts [illegible] labor needed to do the job There are models with 4 to 24 farrowing stalls that have built in feeders watering cups and easily adjustable side panels

SOW PIG CAPSULE
A good farrowing system for medium or small operations A farrowing building is combined with pig nursery pens You have choices of models from 4 farrowing stalls with 2 nursery pens to 16 stalls and 8 pens

The Ag Best nursery feeder has an expanded throat that helps eliminate packing and bridging An easy top adjustment regulates feed flow A step back feeder design keeps manure from dropping in the trough Five part molded feeding space on each side Capacity is 11 bushels Construction is 14 gauge welded [illegible]





NURSERY AND FINISHING PANELS
Built in one piece No loose removable parts are needed Panels open from either end and swing both ways Posts have a unique latch with pull and twist action for instant release or positive catch (patent pending

Conservation leadership school experienced by FFA'ers

NEW HOLLAND – Five Garden Spot students, all members of Grassland FFA, attended the Pennsylvania Conservation Leadership School at the Stone Valley Recreation Area near Penn State Participating in the two week school were ninth grade environmental agriculture students Lee Bachman, Lori Engle and Wanda Steffy, ninth grade production agriculture student Brian Martin, and tenth grade environmental agriculture student Steve Eberly.

Local Sportsmen's clubs sponsored each of the students and made monetary contributions to help defray the cost of the two week resident camp Beartown Sportsmen's Association sponsored two students at the full stipend, while Penn Dutch and Northeastern Lancaster County Rod and Gun Club sponsored the applications of the other students and made contributions In addition two of the students were awarded short course scholarships amounting to $50 each provided by the Lancaster County Vocational Agriculture Teachers Association.

The school, which was initiated in 1948, has as its goal promoting an understanding of good conservation practices. It is hoped that the students gain ideas that can be utilized when they return to improve the environment of their local communities

Lori Engle whose application was sponsored by Penn Dutch summed up her experience "Everything we did taught us how to work together, working together is the most important part of leadership It helped bring out leadership skills I didn't know I had, she continued "It taught me how to listen to other peoples ideas as well as how to think for myself "

Lori related that she especially enjoyed the forest inventory skills and biotic and abiotic stream survey because "I'll be able to use them in my wildlife conservation project for ag class, and I like getting wet."

Northeast Rod and Gun sponsored Lauschtown resident Lee Bachman who enjoyed the game management aspects of the school. "We saw not only the hunter or sportsmen's view but also the anti-sportsmen's view of things" He said the idea that reamains foremost in his mind after attending the school is "that we are responsible for the condition of our environment We learned the ways to destroy our evnironment through the years, we must also learn the management techniques that will undo some of the problems and improve our environment." Lee said he liked not only the practical knowledge they gained through field experiences but also the many new friends he met at the school through social activities and special events.

For Brian Martin, who is the son of Penn Dutch president Raymond Martin, the highlights were visiting the deer pens and studying wildlife habitat. He added that he enjoyed going caving because "it was exciting and a little dangerous". He also enjoyed taking part in the foresters' meet "where I placed first in bolt splitting" (splitting a lot into qaurters)

Wanda Steffy of East Earl was sponsored by Beartown and enjoyed the challenge of working with different people "We all enjoyed the competition in the outdoor olympics and the foresters' meet. We were able to get to know a lot of knew people and make new friends."

"Probably the most impressive part for me," she continued, "was a field study we made of the Alan Seeger Natural Area It's the only virgin stand of hemlock in Pennsylvania and it was exciting to see."

Steve Eberly, the second student sponsored by Beartown said it was hard to pinpoint any single experiences as being highlights. "I enjoyed the whole two weeks, I thought just about everything we did was worthwhile. I did enjoy caving a lot, probably because I got stuck." Steve pointed out that he felt the staff did a "really good job of helping to make us aware of alternative energy sources and made us think about our energy resources."

Robert Lauffer, an environmental agriculture instructor at Garden Spot commented that "experiences like the Conservation Leadership School are just what our young people need more of. The students that had this opportunity are bursting with enthusiasm and new ideas for community projects We have worked with various sportsmen's

DON'T LET YOUR COWS FRESHEN!!

UNTIL THEY HAVE HAD "DAY FRESH" DAIRY WORMER with TBZ®

LOOK FOR THESE BENEFITS IN YOUR HERD

Improved Feed efficiency
Higher yield of Market Milk
Increased resistance to disease & stress.
Improved growth and maturity in Young Stock.
PLUS: "Day Fresh" Dairy Wormer is safe, sure, economical, and conveniently packaged to worm each cow individually.

Deworming is the answer, and deworming before or at the time of freshening is the best time to do it.

And now... new from Pennfield... is the one most effective and convenient product to use - DAY FRESH DAIRY WORMER with TBZ® .

Pennfield Dairy Nutritionists have combined DAY FRESH Dairy Wormer with high levels of vitamins and minerals to help your fresh cows get off to the best start ever and maximize your profits.

Pennfield DAY FRESH Dairy Wormer with TBZ® is available in a convenient pouch, sufficient to treat an average 1,400 lb. cow.

TBZ® (thiabendazole) is a registered trademark of Merck & Co , Inc.

STARLINE

Md. farm to be rebuilt in one day

LANCASTER – For those landowners who have been thinking about installing soil and water conservation practices on the farm, but have put off their plans until they could study examples of conservation practices, here is the chance they've been waiting for

The Lancaster Conservation District is sponsoring a bus field trip on Saturday, August 19 to Frederick County, Maryland where a run-down farm will be completely renovated on one day

Practices will include establishing 2100 feet of diversion terrace, 3,000 feet of drain tile, 79 acres of strip-cropping, and 7,625 feet of fence Also, 18 acres of alfalfa, and 23 acres of hay will be seeded, with 37 acres of pasture renovated, and 85 acres of woodlot improved

Two livestock drinking troughs will be installed along with one walk-in drinking facility and four crop structures In addition, improvements will be made on the farmhouse and barn

All the labor and equipment to do this work will be supplied by local contractors

Since room on the bus is limited the first 40 landowners who call will have a place reserved for them, with a maximum of two persons per family or farm

If one wishes to reserve a seat, he should call the Lancaster Conservation District at 717-299-5361, between 8 a m and 4 30 p m

Transportation on the field trip will be free of charge Those who attend can either bring their lunch or purchase food at the event

Delaware dairy tour planned

NEWARK, Del — The Cooperative Extension Service of the University of Delaware's College of Agriculture, here, will be sponsoring a dairy tour to Pennsylvania on August 10-11.

Delaware dairymen who would be interestd in going by air-conditioned bus to the Hershey area of the Pennsylvania Dutch Country should contact Kent County Extension Agent David Woodward at Box 340, Dover Del , 19901 The price per person is $34 50 That includes travel expenses and lodging accomodations, but not meals

Those going on the tour will be picked up by bus on August 10 at any of three locations The Milford Shopping Center, behind Hardees, at 7 a m., The Department of Agriculture parking lot, Dover, 7 30 a m , and Agriculture Hall parking lot, Newark, 8 30 a m The return time the following day will be at about 8 p m

Dr George Haenlein, Extension dairy specialist from the University of Delaware, made the arrangements for the tour Reservations are limited to 50 people

Break Your Butterfat Barrier With Our Yeast?

Young's Live Yeast Culture may add new life to your feeding program Many top dairymen use it to improve butterfat tests, increase production, cut down on feed waste and improve palatability They've had **surprisingly happy results.** It's not a winner in every case, and we don't know how to predict the results But we suggest you give it a try It can't hurt, and may be just what the herd needs Young's is the Yeast Culture with **billions of live yeast cells in every bite.** And you'll get it MILL-FRESH from your Young s Feed Management Consultant

Young Farmers

(Continued from Page 23)

scored a total of 185 points, placing close behind the first place winner The tractor he used was a Massey Ferguson 1155.

Headed by advisor Larry Garber, the event was sponsored by the Elizabethtown Young Farmers who gave prize money to those involved Called the "brainstorm" of the group, members related that they entered the contest for fun and the fellowship that the contest involved

Other entrees included Jay Bixler, Marietta R1, and Irwin Engle, of the same address

Judges of the contest were Bernie Linn, an ag teacher in Lancaster County, and Abner Hausnecht from the Lancaster office of the Soil Conservation Service They commented that the contest was an extrememly close one, with the top and low scores only differing a few points

The plowing contest was judged on four main categories with each one worth 50 points Included in the judging was the examination of the opening furrows, the main furrows, the finishing furrows, and the tilled surface.

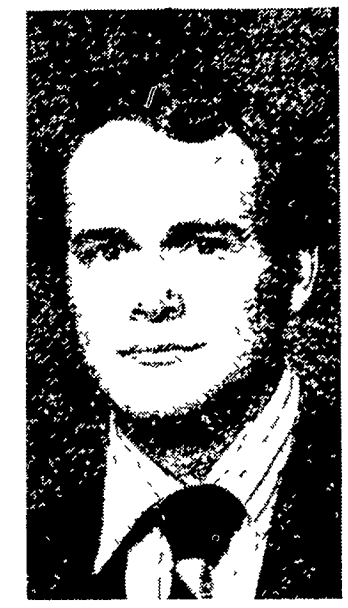
Some of the points that the judges looked for included quick penetration of the furrows, the furrow straightness, uniform depth, clean furrow walls, smooth and level furrow bottoms, the depth of the finishing furrows and the pulverization of the tilled surface

They also checked to see that the boundries of the plots were adhered to, thal all the land in the finishing furrow was plowed, leaving a smooth, level, and clean furrow bottom, and that trash, plant growth, stubble, and sod was completely covered

Those who competed in the event seemed to enjoy it and hope to see another contest in the next year, hopefully with more entrees and stiffer competition.

James Garthe appointed Extension ag engineer

UNIVERSITY PARK – James W Garthe was appointed July 1 to The Pennsylvania State University's Cooperative Extension Service staff as Extension agricultural engineer



James Garthe

Dr. Harold V Walton, head of the Penn State Department of Agricultural Engineering, points out that Garthe is providing leadership in developing Extension education programs involving agricultural power units, and tillage, planting, and harvesting equipment for forages, grains, and forest products

A native of Danville, N.J he received a bachelor of science degree from Clemson University in 1971 and master of science degree from the University of Idaho in 1974, with majors in agricultural engineering.

Prior to his appointment to the Penn State faculty, Garthe served as project engineer for the FMC Corporation and was a graduate research assistant at the University of Idaho.

He also served as an officer in the U S. Army.

The agricultural engineer is a member of the American Society of Agricultural Engineers, Society of Automotive Engineers, and the Nash Car Club of America.

He is married to the former Patricia Bonnet, of West Orange, N J.

show the calf next year. Cindy smiled, "I think I'm going to like to show her." Greg Landis, junior project committee chairman, said 50 eligible entries is the largest number ever.

Jim Charles, Columbia R1, had the highest overall score in the judging contest, as well as being the leader in the men's category. This was the first year he judged, saying he never bothered to enter before. Second place in the men's class was John Brubaker, Jr., and third was Dennis Kulp, Manheim R1.

Mrs. Thomas Zartman, Ephrata R1, took first place honors in the ladies category, with Mrs. Ray Bollinger, Stevens R1, placing second and Mrs. Earl C. Stauffer, Ephrata R1, placing third.

In the youth class, Darryl Mills, 1343 Gypsy Hill Road, Lancaster, placed first. John Petersheim, Morgantown R1, was second and Susan Hess, Robert Fulton Highway, Quarryville, was third.

Maryland breeder Bill Kepler served as official judge and prizes in the three categories were donated by Show-Ease Stall Co., Penn-Jersey Harvestore and Pennfield Feeds.

Lancaster County Extension Agent N. Alan Bair told the group that coliform mastitis is the most difficult control and the most serious of mastitis forms because the toxins produced by the cow are so damaging. He urged dairymen to keep their cows clean, saying "It is a lot easier to keep mastitis under control with clean cows." If problems are present in a herd, Bair told the breeders they should get the cows out of the present area they are using, even if it means putting a temporary enclosure in another area. "Getting cows out of a dirty environment may save cows," he said. Dairymen should wash and care for cows properly, especially in weather now being experienced which causes muddy, unsanitary conditions. He said teat ends should be checked and teat dip used regularly.

In cows with serious mastitis problems, Bair explained, "One of the best ways to treat mastitis is to keep the cow in and milk her several times daily." He also urged dry cow treatment with the supervision of a veterinarian.

Bair briefly discussed land use problems, and suggested to the dairymen that they work hard at maintaining the good image they presently enjoy. He suggested that they be considerate of urban neighbors they may be acquiring and consider the neighbor's reactions.

Clarence Stauffer, fieldman for the national association, asked dairymen to consider participating in the young sire program of the association, stating that it is important to sample young sires in a systematic manner. In the program, Stauffer said, three hundred ampules of semen are offered for sampling, with ten available per herd. If the semen is used within six months, dairymen are eligible for a $25 rebate. Stauffer said that sires being sampled are owned by "dairymen like you" and mentioned that it costs from $1500-$2000 to sample a bull.

He urged dairymen to use every tool available to them in making their animals more marketable. Advertising in regional breed magazines and newspapers is one way of reaching potential buyers. Stauffer said, "Cattle are in demand - there are breeders hunting good cattle." He said that in Pennsylvania only about 8.9 per cent of the registered Holsteins are classified, "so we haven't scratched the surface."

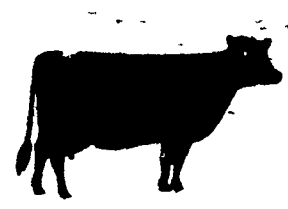
Robert H. Kauffman, state director, said that memberships are at an all-time high, with 5,395 members statewide and 602 in the county. Kauffman told of export activity within the association, and invited breeders to visit the export facility at Middletown where a new Butler metal building has been added. He also encouraged breeders to take advantage of a new service being offered by the Dairy Herd Improvement Association which would compile 365-day official records on cows. He added that this record would be advantageous in advertising.

Lancaster County Dairy Princess Joyce Stoltzfus said she was proud of living on a dairy farm where she can be a part of producing milk. She asked all breeders to assist her as she begins her reign and to promote milk by using the product and serving it in their homes.

Junior Club President Linda Kauffman announced that the junior association will be touring four Maryland herds on August 15. She welcomed any breeders along on the tour, which is now being organizaed. Any young person between the ages of 9 and 21 who owns a Holstein cow is eligible to join, she said.

Numerous door prizes were donated and distributed throughout the program. Donors were: Steven's Feed Mill, Atlantic Breeders Cooperative, Curtis Breeding, Vigortone, Penn Jersey Harvestore, Robert Groff, Spangler & Sprenkle, Inc., John J Hoober, Inc., Carnation Genetics, American Breeders Service, Sire Power, Animal Medic, Grumelli Farm Service, Young's Mineral, Chemgro, Shenk's Farm Service, West Willow Farmers Association, Agway, Lancaster County Unit, John Kreider Show-Ease Stalls, Landis Brothers, L.H. Brubaker, Red Rose and C.B. Hoober. Purina Feeds donated ice cream; Agway donated the milk and Atlantic Breeders Cooperative provided the chairs and the public address system.

Field Day committee chairman was John Barley, with members J. Wilmer Eby and Sylvan Ressler.



Conservation leadership school

(Continued from Page 35)

clubs in the past and are looking forward to more cooperative efforts in the future."

Lauffer explained that the Pennsylvania Federation of Sportsmen's Clubs sponsors the school. "The Federation and especially our local sportsmen's clubs should be commended for their concern for and support of our young people."

is plantiff counsel in a case against a dairy cooperative in which some of the matters considered by the commission could be at issue.

Turning to a discussion of the Capper-Volstead Act, the basic enabling legislation for cooperatives, Graham acknowledged that it grants immunity for farmer-producers to organize together. But he stated that the Justice Department or other federal agencies aren't inhibited from proceeding against a cooperative which appears to be acting to the detriment of the public interest.

"The courts have held that cooperatives may not monopolize trade, restrain or suppress competition, or engage in predatory practices, and the Department of Justice has been quick to act in bringing complaints against farmer cooperatives," said the NCFC general counsel.

On the subject of cooperative growth, Graham cited figures from a U.S Department of Agriculture study issued July 1, 1978. He said the study of seven selected industries underscores the fact that farmer cooperatives are still relatively small when compared with their non-cooperative competitors.

As an example, Graham indicated that while cooperatives' share of total dairy products marketed at farm level increased from 48 per cent in 1950-51 to 77 per cent in 1974-75, their processed level share was only 28 per cent and their retail level share was less than one per cent as recently as 1973.

In the fertilizer and lime markets, said Graham, cooperatives increased their market share from 15 per cent in 1950 to 30 per cent n in 1975. But when compared to the four largest fertilizer companies, he noted, the four largest cooperatives' fertilizer and lime sales were 69 per cent, net margins 28 per cent, assets 13 per cent, and net worth 7 per cent.

Graham also said that cooperatives' share of the farm petroleum market increased from 21 per cent in 1950 to 31 per cent in 1975. But when compared to the four largest petroleum companies, he added, the four largest cooperatives' total sales were only 3 per cent, assets 2 per cent, and petroleum sales, net margins, and net worth were less than 2 per cent.

The NCFC attorney concluded that if the Justice Department were truly interested in fostering effective competition in food marketing, it would encourage farmers to use cooperatives more, since that would inject more competition to the benefit of producers and consumers alike.

"Instead," he asserted, "Justice seems to be attacking cooperatives because it receives a distorted vision from its limited exposure rather than for sound economic reasons."

Duke to speak at poultry conference

ARLINGTON, Va. -- Astronaut Charles M. Duke, Jr., a former member of the NASA space team and one of the few who can boast of walking on the moon, will be the featured speaker at the Poultry and Egg Institute of America's Membership Breakfast at the Fact Finding Conference, September 15 in Houston.

Col. Duke will entertain Fact Finders with his anecdotes of space training, experiences as a member of the Apollo 16 and 17 space crews and hopes for the future of the American space effort. Col. Duke spent over 71 hours on the lunar surface as the module pilot on the Apollo 16 mission, the longest amount of time any man has spent on the moon.

Col. Duke is now retired from NASA and has a number of business interests in the San Antonio area.

PUBLIC SALE

On the farm located at 9820 Oak Hill Road 2½ miles northwest of Woodsboro (turn off the Woodsboro-Creagerstown Road), in Frederick Co., Maryland.

COMPLETE MILKING HERD DISPERSAL MONDAY, AUGUST 14

11:00 A.M.

100 GRADE HOLSTEIN COWS 100

25 HOLSTEIN SPRINGING HEIFERS

Tested for Interstate Shipment - Pregnancy Checked.

Plenty of Base Milk! A very high percentage of the herd is recently fresh or springing; in fact, nearly all are fresh or due between June 1 and late fall. Registered bulls have been used for thirty years with excellent bloodlines. Cows have good udders and size, and show much dairyness. There are many young cows. Ten are first-calf heifers fresh since July 21. A number are second and third-calf cows.

THE HEIFERS

A fine lot of home grown heifers that will be due shortly after the sale. Well grown, in nice condition, with very nice udder promise.

HERD HEALTH

Milk from this herd is shipped to the Baltimore Cooperative, and the herd was awarded the Golden Award for low bacteria count during the past year. The herd health is excellent!

Only because of Mrs. Offutt's health is the herd being dispersed.

Terms: Cash Sale in tent Lunch available

Freshening and breeding dates, results of pregnancy check will be announced sale day.

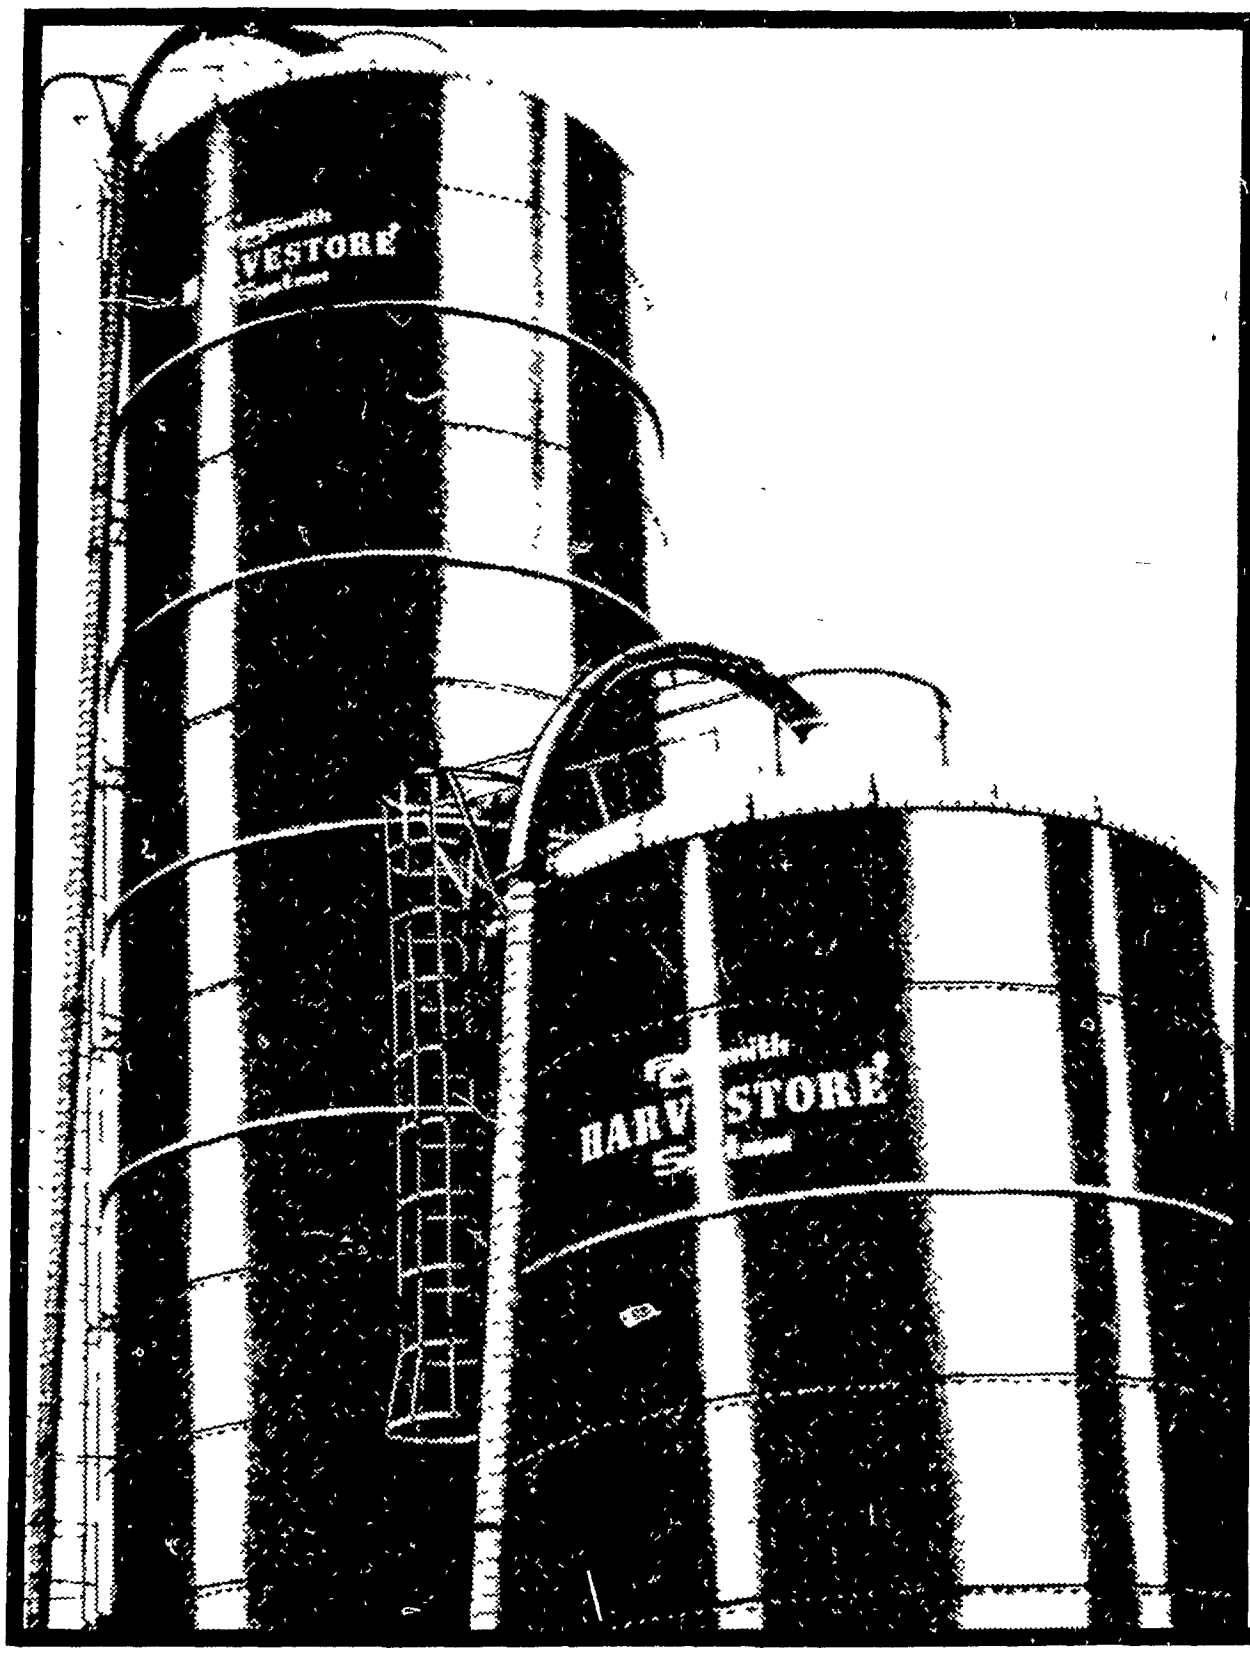
YOUR BEST BET... FEED IT WET!



energy saver.

When we say "energy saver," we're talking about two kinds. . the kind you use, and the kind your dryer uses. With Harvestore® limited-oxygen storage, there's no need to dry your grain at all, if you plan to feed it. Numerous studies have shown that high moisture grain makes excellent livestock feed and is highly palatable.

By storing grain at high moisture content you've not only saved the costs and effort of putting it through a dryer, but you have the start of a completely automated feeding system. That can really save you a lot of time and energy.

Best of all, a Harvestore automated feeding system is not only an excellent investment, but one that pays for itself - with interest - usually in five years or less Why not get in touch and get all the details.

Look at Harvestore® this year.

USDA lists top bulls for colored breeds

When the USDA sire summaries came out in June, a Brown Swiss bull was tops over all breeds for the third consecutive time The Brown Swiss bull, Nakota Pavanne Evilo, is also the only sire among all breeds to have a predicted difference in dollars which exceeds $200 Also noteworthy is that the colored breeds have 42 sires among their ranks who have predicted differences that exceed $100.

Following is a list of Brown Swiss, Ayrshire, Jersey and Guernsey bulls who have a predicted difference of $50 or more. It should be noted that listed bulls aren't necessarily in service or that semen is available from them Dairymen are advised to check with the bull stud at which the sire is located to find out whether the bull's semen is still available. The first column after the bull's name is the stud code number, as assigned by the National Association of Animal Breeders. They're identified as follows

01—Noba, Inc. Box 607, Tiffin, Ohio 44883
03—Eastern A.I. Cooperative, Box 518, Ithaca, N.Y 14850
07—Select Sires, Inc., Box 126, Plain City, Ohio 43064

NEW MILKER

bodmin nu-pulse the non-conventional milker

DAIRYMEN:
Check List To A Simplified Milking System
Would You Like A Milker That:
- [ ] Uses a one hose hookup (No vacuum pulsation line needed)
- [ ] Eliminates pulsation service calls
- [ ] Has no electrical connections (Convertors, stall cocks, pulsators)
- [ ] Requires less vacuum (Lower hp. pumps)
- [ ] Reduces operating costs up to 70%
- [ ] Eliminates vacuum differential and reduces teat cup crawl (Equalized pressures)
- [ ] Does not flood out on high producers (No falloff)

See The Bodmin Nu-Pulse

The "Non-conventional Milker" with the non-conventional vacuum graph. Bodmin Nu-Pulse creates new milker standards.

DAIRYMEN:
- Are you ready for a no nonsense approach to milking cows?
- Do you feel you are getting the results you would like from your present milker?
- Would you like the improved efficiency of a modern milking unit that can reduce new installation costs by up to 30%?
- Wouldn't it be nice not to listen to squalking teat cups, and to avoid the injury to cows by machine falloff?

We Are Capable of Conducting A Limited Number of FREE DEMONSTRATIONS To Interested Dairymen.

THE SYSTEM

Tool up here for a great future in the hog business

Producers planning to stay in the hog business are tooling up to squeeze more pork from their feed and their labor -

If you're one of them, chances are you ll appreciate the built in feed and labor efficiency of AGSTAR equipment

Sensible feed saving design features — like preci sion TIP TOP feed flow adjustment on AGSTAR feeders

Great labor saving ideas — like self cleaning watering cups with smooth Porcelainized Steel surface and fully automatic feeding and ventilation equipment

We think you ll also appreciate the ruggedness and durability of every piece of AGSTAR equipment

You can buy AGSTAR equipment and install it in your own buildings Or you can get it already installed and ready to use in one of our new factory built modular hog production buildings for sows pigs or finishing hogs

The equipment samples in the photo are arranged to demonstrate as many of our 40 types of hog equip ment as possible For full details on this and our other equipment for confinement open lot or pasture — as well as cattle sheep or horse equipment — contact your AGSTAR dealer

A. Modular 24-ft. wide farrowing finishing, & gestation buildings.
B. Modular 12-ft. wide farrowing nursery & gestation buildings.
C. Lot or pasture fountains.
D. Hog lot gates & partitions.
E. Heavy duty hog & cattle waterers.
F. Big capacity feeders.
G. Ventilation equipment.
H. Round feeders.
I. Feed delivery systems.
J. Galvanized vertical pen partitions.
K. Hog troughs.
L. Porcelainized Steel slats.
M. Rotary feeders.
N. Porcelainized watering cups.
O. Baby pig feeders.
P. Farrowing stalls & pens.
Q. Pig heaters.
R. Nipple waterers.
S. Space-saver nursery feeders.
T. Flex auger systems & feed bins.
U. Gestation stalls & buildings.

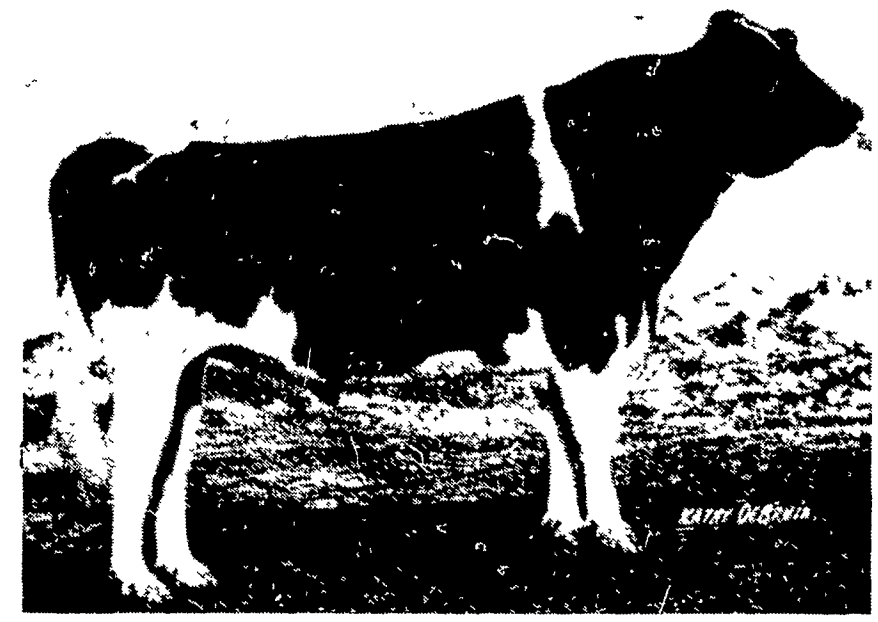
ELEVATION'S GREATEST SON



29H2811 Le-Del Elevation CHRIS, GP-81

USDA, 7-78;
PD +$161 +2,156M −.25% +37BF 63% Rpt.
HFA, 7-78 +0.98 PDT +490 TPI (unofficial)

Bred for production, and bred for type, that's CHRIS. Sired by Elevation from one of the great Bootmaker daughters, with records to over 25,000M, CHRIS is putting it all together. On the January 1978 summary CHRIS showed a PD of +1,423M on 16 daughters in 15 herds for a repeatability of 41%. On the July 1978 summary CHRIS showed 40 daughters in 30 herds for a repeatability of 63%, with the highest milk proof of any bull on the July summary. CHRIS made this production proof without the help of his great daughter in the Rau Dairy, California. At 2 years 2 months this CHRIS daughter made 34,050M 3.3% 1,110BF in 336 days. Through a mistake in identification this cow WAS NOT INCLUDED IN CHRIS'S CURRENT PROOF. CHRIS is already a hot item, by the time you read this he will be hotter!

The latest proofs on other "Elevation" sons at ABS:

Channeldrain®: the panel of experts.

Farm building professionals agree: Wheeling Channeldrain roofing and siding panels give you a dollar-tight, weather-tight building.

- Tough, pre-painted galvanized steel lowers maintenance, protects your investment.
- Extra-wide 38" panels mean fewer panels and fasteners, save material costs.
- Patented drain channels run water off.
- Wide panel overlaps assure leak-proof joints
- In stock - white, green, & galvanized.

Call Or Stop By For Information On:

- Channel drain
- Clay doors
- Roof ventilators
- Lawrence Brothers Track & Assc.

Insecticide controls webworms

The mimosa webworm is an insect pest capable of serious defoliation of honey locust, moraine locust, and mimosa trees, says Louis M. Vasvary, Extension specialist in entomology at Cook College, Rutgers University.

Damage is not noticed when the caterpillars have hatched from pinkish eggs and begin to feed on foliage of host trees The caterpillars spin their webs on flowers and leaves. They eat the surfaces from one side of the leaf causing damaged leaves to become dry and finally die. Leaves of mimosa turn grayish, and those honey locust and moriane locust trees turn brown.

To control mimosa webworm apply an insecticide during mid-July and again in late August.

Thoroughly spray the foliage with diazinon 25 per cent liquid concentrate at the rate of two teaspoonsful per gallon of water or two tablespoonsful of carbaryl (Sevin) 50 per cent wettable powder to each gallon of water for satisfactory control, advises Dr. Vasvary.

Penna. geography is a game of names

When mapping the day's geography lesson, Pennsylvania teachers have found they must allow their pupils a bit of latitude.

Here's a scene from a typical classroom· "Where's California? the teacher asks. The hands shoot up and one pupil proudly proclaims, "It's south of Pittsburgh. My brother goes to the state college there."

The teacher shudders and lowers her pointer, staring blankly at the U.S map on the wall. She understands the problem; it's nothing new. "OK," she says, "how about Indiana?"

Again, hands wave in the air. One student, thrilled at knowing the answer, blurts out: "That's east of Pittsburgh. My sister goes there to Indiana University of Pennsylvania. We just went for a visit last week."

The teacher, undaunted, tries again: "Well," she hesitates before asking, "what about Wyoming?"

She turns and scans a nearby map of Pennsylvania, spots Wyoming County in the northeast corner of the state and sends the class to recess.

It's true, Pennsylvania's geography is a name game. From one end of the Keystone State to the other, the names of cities, towns and counties have the ring of familiarity. Thought Akron and Columbus were in Ohio? Actually, there's an Akron in Lancaster County and a Columbus in Warren County. Everyone knows that Bangor is in Maine, but there's also one in Northampton County.

And Schuykill County boasts two famous names – Shenandoah and Palo Alto. And the list - Bridgeport, Bristol, Canton – goes on and on.

Pennsylvania is known for its miles of beaches along Lake Erie, but there's also Jersey Shore, located in Lycoming County far from the water.

But the names just don't end with the map of the United States. The Grand Tour of Europe begins in western Pennsylvania with the towns of Paris and Florence near Pittsburgh. And sprinkled throughout the Commonwealth there's Athens, Corsica, Dublin, Geneva, Hamburg, Luzerne, Berlin and even East Berlin, not to mention Versailles.

But it's Britain's influence which stands out on the state's map. There's the War of the Roses along Route 30 where the white rose of York decorates the west side of the bridge over the Susquehanna River at Columbia and the red rose of Lancaster takes it place on the east side. Of course, Lancaster is now famous for the Pennsylvania Dutch, and York is noted as the site of the Continental Congress during the writing of the Articles of Confederation.

In Pennsylvania one also can find Oxford, Reading and there's even a Scotland in Franklin County, site of a school for veterans' children.

And Biblical cities are well represented in Northampton County in the eastern part of the state. Here there is find Bethlehem, "the Christmas city," and Nazareth. Both are noted for Moravian sites and museums, and Bethlehem is the home of Lehigh University.

But the confustion doesn't end here. The variations on names also can be quite taxing. Try for example Avon, Avondale and Avonmore. Or how about Beaver, Beaver Falls, Beaverdale and Beaver Meadows or Clarks Green, Clarks Ferry and Clarks Summit? There are even two towns called State Line, one in Erie County greeting travelers coming from New York and one in Franklin on the Maryland border.

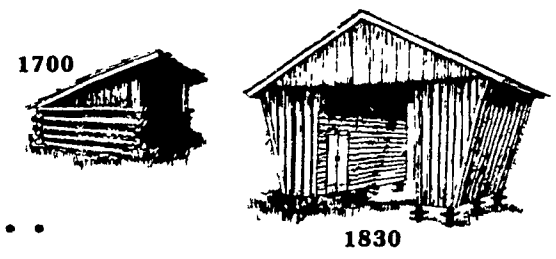
And to baffle one's sense of direction, there's a town called Lawn in Lebanon County and another called West Lawn, about 20 miles EAST in Berks County.

No one should let the geography block the road to touring Pennsylvania. The state is packed with things to do, places to go and sites to see. There's a lot to explore in the "world" within Pennsylvania.

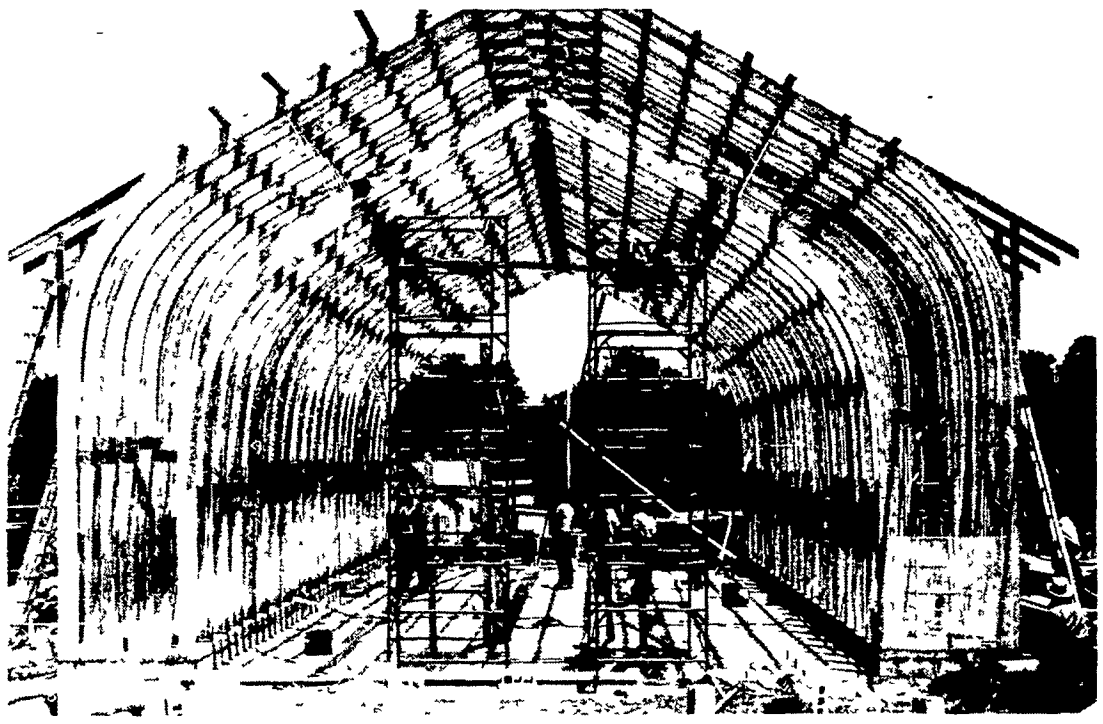
Pennsylvania even provides extraterrestrial friends with Star Junction in Fayette County and Mars, just a short saucer flight from Pittsburgh.

For more information on things to do and see in Pennsylvania, persons should write to the Bureau of Travel Development, South Office Building, Room 206, Harrisburg, Pa. 17105.

A building with almost unlimited possibilities . . .



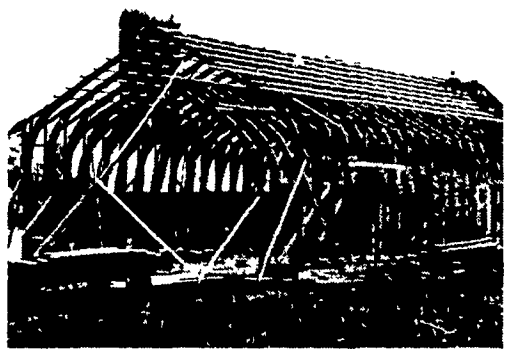
The Evolution of the American Corncrib



1977

Laminated Uni arch design makes all inside space useful — even close to walls, and permits economical installation of roofing and siding materials

Large Volume Grain and Storage Implement Building



A building with almost unlimited possibilities

- Over 5,000 bushels ear corn storage
- Sheltered area to load and unload
- To hold against price fluctuations
- Convenient feed-preparation space
- Large equipment storage flexibility
- Up to 1,440 sq. ft. for other crops

Beginning with the earliest American farms, corn on the cob was seasoned and dried by allowing air to flow around it; this kept away mold. From simple, square cribs of alternately piled logs, covered by a sloping roof, the corncrib evolved to the drive-in crib. The sidewalls always slanted outward at the eaves. On a great many mountain farms this was the beginning of barn architecture, for by adding doors in the driveway wall, you have the simplest American barn.

Today, a much more efficient structure for the storage of corn — along with large farm implement storage — is provided by the imaginative use of the Laminated Rafter. The exceptional strength of this aesthetically pleasing arch may be readily combined with simple construction, requiring a minimum amount of materials and erection time. It is a structure that permits great flexibility, because all inside space is useable, offering so many possibilities for a variety of farming needs.

The Tractor Specialist sells more "up-time"

case

When the land is ready a farmer's tractor had better be ready to go That's why a Case dealer franchise just makes good common sense

As a Case dealer you're a tractor specialist Everything you do — selling, servicing, parts — has one target the best in farm power You and your tractors are backed by an industry 'first' a sound marketing program Assured Availability It tells your customers that if, for any reason during warranty the tractor they bought from you isn't ready to go, they'll have a free replacement And Case backs you up!

Case backs you up with other strong marketing help including the Demo/Rental and Commitment to Quality programs

If the franchise is open in your territory you may also be eligible to sell and service light construction power For information on the full potential of a Case franchise in your area write or call

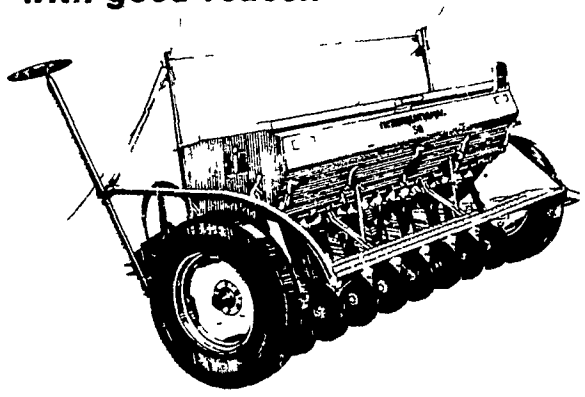
THIS WEEK'S SPECIALS

Long-time favorite with good reason!



International 510 Grain Drill

Farmers continue to choose this drill for the best reason of all Performance You can buy it with plain grain hoppers or with combination grain and fertilizer hoppers the plain one holds 2 4 bu of grain per foot Wide choice of openers and attachments make it the most versatile unit available

- 9 models from 7'8" to 13'4" choice of 6 to 10" spacings
- 21 x 7 model plants six 28" rows of soybeans maize, other row crops
- IH feed cups are unexcelled for accuracy regardless of seed size
- Patented drop bottom fertilizer hoppers makes clean-out extra simple

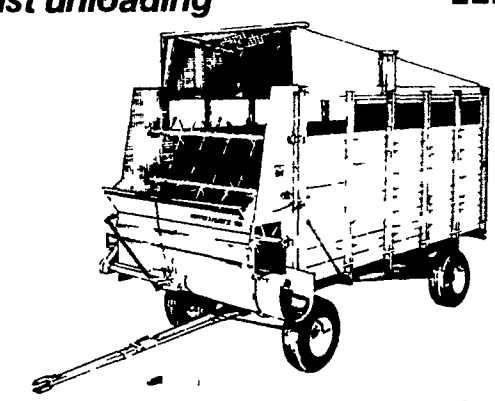
Let's arrange a demonstration. Finance plans available.

18 DISK 7 INCH OPENING, PLAIN

NOW ONLY **$3150.00**

★ See us for special Low Prices on other models.

Big field capacity, fast unloading



International 110 Forage Box

This big box holds up to 6 tons of silage to keep you on the move in the field, then unload fast at the front end once you get to the silo

- Choice of box sizes 7 x 14 or 7 x 16 ft with 4 or 6-ft high sides
- Extra-strong quality wood and steel construction, including thick tight-fitting flooring
- Big 16-in cross conveyor auger dumps material fast, is not susceptible to breakage as with chain conveyors
- For safety boxes have sensitive trip bars that shut off mechanism if anyone climbs on the side of the box
- Many options attachments available including adjustable metal roof

★ 16 Foot with Roof & Three Beaters.
★ 8 Ton Wagon Gear.
★ 11Lx15 - 8 Ply Tires.

NOW ONLY **$3200.00**

INTERNATIONAL MODEL 570 SPREADER

The 570 is rated at 271 cu ft heaped capacity (295 bu) and is ideal for large feeding and dairying operations with daily spreading chores

For the large dairyman and the big feeder here is the capcity you need to cope with big volume manure handling Heaped load capacity of 271 or 312 cu ft (295 and 340 bu) ranks these tandem axle models among the biggest spreaders on the market And yet both have the same improved Bear Claw design and the straight through underframe that greatly reduces strain on the spreader box All are equipped with double aprons and pintle chains to move bigger volumes with ease Both are equipped with two speed mechanical drive Bogie axles and tandem wheels take on humps and ditches with little twist or dip Off center mounting lightens weight on front wheels providing better cornering and less rutting in soft ground

The beater assembly on both models has 20 Bear Claw paddles across six foot interior width Bottom and sides of the 570 and 580 are constructed of rugged pentatreated ¾ inch marine type plywood reinforced with steel

NOW ONLY **$4600.00** WITH HYDRAULIC ENDGATE

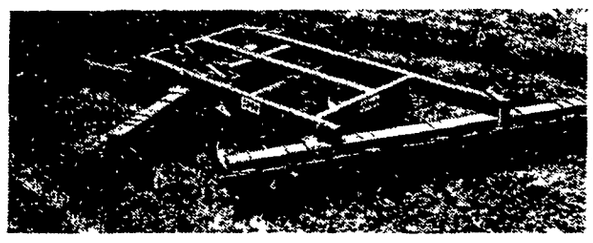
case® RP Series Offset Disk Harrow



Plows deep and level

- Heavy total weight permits disking to full plowing depth For example, the 14 foot model weighs 5650 pounds, or 403 pounds per foot of width
- Massive, rugged frame made from 4x8x¼ inch high tensile tubing
- Large, long-life bearings are 4 inch OD regreasable type with cast iron housings
- Spring loaded leveling device lets you adjust the disks parallel to the ground at any height or depth, or set rear gang to cut deeper Spring tension acts as a shock absorber in uneven ground
- Pivoting hydraulic cylinder mount, built in swivel hitch jack and clevis positioner permit easy one man hook up
- Lockout on cylinder assures handy, trouble free transport
- Moldboard type scrapers, formed of heavy 3/16 inch steel, are mounted for simple adjustment
- Heavy 1¾ inch gang axles are made of high strength steel
- Built like the strongest, priced with the lowest

New 10'6" Disk Harrow, not set up **$3395**
New 10'6" Disk Harrow, set up. **$3595**
New 10'6" Disk Harrow, Demo. **$3195**

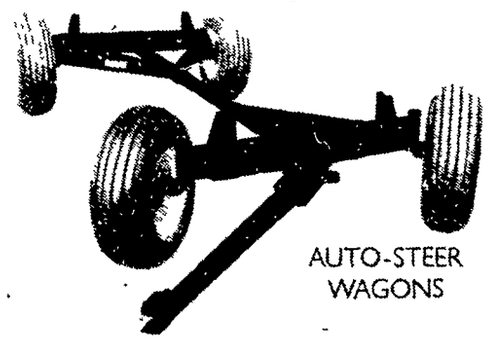
ELECTRIC WHEEL WAGONS - 8,000, 12,000, 16,000 lbs.



A Forged steel steering rod ends coupled with new oil impregnated sintered iron bushing in steering arm assure years of dependability
B Full contact, full swivel coupler is a special feature of medium and heavy duty ELECTRIC wagons You get straight through pull on reach and steel collar for added strength
C Heavy spindles are stronger on ELECTRIC wagons Due to less spindle overhang the inside of the hub is snugged up close to the spindle gusset for extra strength
D Short turning radius for maneuverability in those tight places around the farm and in the field
E Higher ground clearance needed for rough fields and unusual places is another feature of ELECTRIC wagons
F Wide track stance for stability and balanced load on all types of farm ground

Congratulations to Tom Good, Lititz, for showing Champion Market Hog at '78 FFA Show. The champion was sired by a Dutch Valley boar.

When you treat bloody scours (swine dysentery), you're only fighting part of the problem

Bloody scours is a cyclic disease Treatment with Lincomix® (lincomycin) will disrupt the cycle and bring it under control

But once treatment stops, bloody scours can, and often does, break out again even among animals you thought had recovered

Protect against bloody scours all the way to market with Lincomix.

For effective control of bloody scours all the way to market, start your herd on Lincomix at the first signs of the disease The treatment level is 100 grams of lincomycin per ton of feed After three weeks at this level, or following disappearance of symptoms, *continue* medication at 40 grams lincomycin per ton of feed up to six days before slaughter

And on those farms with a history of bloody scours, feed 40 grams lincomycin per ton of feed to keep outbreaks from recurring, even though symptoms are not apparent

See us today Lincomix belongs in your hog rations!

Lincomix—THE HEAVYWEIGHT feed additive for the treatment and control of bloody scours from start to finish.

Look for lincomycin on the feed tag at the following dealers:

EXCELLENT OPPORTUNITIES

• DAIRY FARM - 106 VERY FERTILE LEVEL ACRES! 14 stalls with Boumatic pipeline milking system, 515 gallon bulk tank, 54 free stalls, 44' bunk with slant board feeding system, 16x65 Negley-Miller silo with Clay ring-drive unloader - room for expansion. Nicely remodeled house, spacious kitchen with fireplace, living room, dining room, 4 bedrooms, 2½ baths, game room with fireplace, oil-hot-water heat. This farm in Juniata County can be bought for $215,000. Cows and equipment can also be purchased.

• A BEAUTIFUL 21 ACRE FARMETTE IN NORTHERN BERKS COUNTY - with well kept buildings. Barn, implement shed, workshop, 2 small chicken houses, corn crib, house with 4 bedrooms, modern kitchen with all conveniences, root cellar, swimming pool, 2 small streams, large pond. Very impressive! Reasonably priced at $92,500.

• 23 acre farmette in northern Lebanon Co. A very unique and secluded 200 year old log farm house is nestled among mature trees and lawn. The 4 bedroom house is very tastefully remodeled. A very nice kitchen, formal dining room, living room with exposed logs. Large family room with open beamed ceiling and Franklin stove. New oil-fired hot water heating system, plumbing and electrical wiring. A large barn in good condition. Spring and stream add value to the property. All this for only $135,000.

• 160 acre farm, presently a hog and beef operation, which can easily be adapted to a dairy enterprise. 32 acres of pasture with stream, 128 acres of fertile tillable soil. A good cheerful 4 bedroom home with a large farm kitchen, lots of cabinet space, dining room, living room with open stairway. Oil-fired hot water heat. Large barn and other necessary bldgs. to compliment the operation of 400 fattening hogs and 100 steers. 3 story poultry house, automated. Assumable Contract to grow butterball turkeys. Also assumable land rental contract of 210 acres. A farm with very little waste land and an exceptionally nice setting. A real farmer's farm. Priced to sell $250,000.

• An attractive 22 acre farmette with potential of varied possibilities. Good buildings, Large barn, corn barn with hog stable attached, small poultry house. New 4 bay garage, 1 bay with 12 ft. clearance doors and work shop. 2nd floor of garage can easily be finished for living quarters. A pleasant home with 4 bedrooms, large living room, family room, large eat-in kitchen, center hall-way, Oil hot water heat. Alfalfa fields and fenced pasture with stream. Take a look at this neat, attractive property priced at $115,000.

• 150 acre Farm, Productive, good bldgs., $225,000.

• 33 acre farmette with barn, 3 bedroom home, stream, wooded and tillable acres, $64,500.

• 10 acre wooded mountain top along hard road near Route 309, West Penn Township, Schuylkill County, $16,900.

• 10 acre hill side field, Clay Twp., $35,000.

• 2½ acre stone home and horse barn near Bowmansville, $89,900.

We need 100 to 150 acre, 50 to 60 stall dairy farm. Also have interested buyer in leased purchase.

Patty Devoe

Farming makes her world go 'round

By SUSAN KAUFFMAN
Staff Correspondent

Doing what comes naturally is a catchy line from an old song, but it appropriately sums up 19-year old Patty Devoe's occupation as a dairy farm employee for the past two years.

Patty, the daughter of Joseph and Marie Devoe, Oxford R1, chose to work fulltime for Bob and Jane Pepple on their registered Holstein dairy farm in Lower Oxford Township. This decision was a natural consequence of having worked for the Pepple's during silo filling for several years while Patty was in high school.

In addition to having already worked with her present "bosses" before making this move, Patty was well-schooled in all the aspects of dairying because her father had been milking cows for many years for Shannon Pepple, Bob's father.

Patty said of her two employers, Bob and Jane, "They don't seem like bosses to me. I have known them all my life. They are more like friends than bosses. I am glad to be working for them."

And of farming as a career Patty emphatically stated, "This type of work on the farm is always different. Every day there is something new to do. It is so much better than working in a factory where you do the same job over and over again."

Since she was a little girl, Patty helped out at home with the farm chores. She grew up with cows and tractors and long hours and six day work weeks and Sunday milkings. Patty helped feed the cows and calves while she lived at home. The cows were milked in a stanchion barn. Now that she works for Jane and Bob Pepple, she helps Jane milk in a parlor. Patty prefers the parlor set up because in her estimation the heifers come into a parlor easier than into a stanchion jack and cannot kick as easily in a parlor as in a stanchion.

"The milking seems to go faster in a parlor than in a stanchion barn," Patty remarked.

Although Bob does most of the feeding of the cows, Patty feeds calves in the afternoon. Since her earlier beginnings in calf raising, one aspect has changed to her liking. Patty feels the calf hutches are an improvement in housing.

"The calves raised in the hutches are very healthy." "They are out in the open air and that is good for them." When asked about the necessity and possible inconvenience of going out of doors in the Winter to feed the calves, Patty replied: "There was only one time this last Winter when the calves could not get out of their hutches and we had to shovel them out. But going outside in the cold to feed them is not that bad. I don't mind it at all."

The Pepples use peanut hulls for bedding in the hutches and have wire mesh enclosure attached in front of the hutches to give the individually housed calves exercise room. The hutches are moved to a new location when a new calf is transferred to them.

Although Patty started working at Pepple's farm only during silo filling time unloading ensilage, her jobs have increased in number since she began working full time.

Patty said she puts in 40 or more hours a week with Sundays off doing just about any job that appears on a dairy farm. She still feeds calves and unloads silage and helps Jane with the evening milking. But added to these tasks, depending on the season, she performs a number of other jobs.

Patty said the hardest job she does is unload hay in very hot weather! "None of the jobs on a farm are that hard, really," she added. "But hot weather and unloading hay are hard enough," she said.

Having driven tractors for many years, Patty finds field work no problem for her. She rakes hay, mows meadows and hauls manure as a matter of routine. The day **Lancaster Farming** interviewed Patty she and Jane were going to clip a heifer in preparation for the Chester County Dairy Show.

For four years Patty showed her own 4-H animals. Jane and Bob purchased one of her 4-H animals and have her in the milking herd presently. Both Jane and Bob Pepple are locally known dairy judges. Since Patty has been working for them, they have found it easier to get away from the farm to judge and occasionally show at many fairs in Chester and Lancaster County.

"Before Patty worked for us fulltime we could not get away very much or for very long," Jane explained. "Now it is easier."

Patty explained that when she was entering high school there were not that many girls in FFA yet and she did not get involved in it in her Freshman year. However, she worked at Bob's farm during silo filling and helped out at home.

"I grew up on a farm and it is always interesting. There is always something to do. I don't like to sit around. I can't stay still for long. So farming keeps me busy and I like it," Patty added.

For Patty the most interesting job she has, or the one she enjoys the most, is feeding the calves. When asked what job was the most difficult, she said unloading hay in the hot weather, but none were really all that bad. Jane added that probably the most boring job was pumping out manure. A fulltime worker herself, Jane explained that many jobs are repetitious and time-consuming but that they change and there is always something new coming along.

Recently, one new event not welcomed at all was the death of two of their heifers when struck by lightening. Patty remarked that the loss of the animals was especially saddening because one of them was Susan Pepple's (Bob's sister's) 4-H animal and had sentimental value as well as monetary. Having had animals of her own, Patty can identify with the personal loss. The personal involvement and sense of responsibility to her job as a farmhand make Patty a valuable asset to Bob and Jane's operation.

Jane said, "We feel really fortunate to have Patty with us. She is dependable and fits in well with our work here."

Patty drives back and forth to work from her parent's home less than two miles away and rarely misses a day of work. She plans to continue working with Jane and Bob for the immediate future. As for ten years from now Patty explained that she would like to still be on a farm, probably married to a farmer and working as a fulltime partner.

Dressed in bandana scarf, tee shirt, jeans and boots, this tall, slender, blue-eyed 19-year old, Patty Devoe, steps out of her blue Camaro parked in the driveway to begin another day of work on the dairy farm.

Milking cows, mowing meadows, unloading silage and backing tractors and mowers into sheds all come naturally to Patty Devoe.

Caring for calves is just one of a variety of dairy farm responsibilities which Patty Devoe finds rewarding. Farming is a natural for this 19-year old, whose talents include milking, hay-making, and tractor operations.

Kendy's Kollumn

by Kendace Borry

It's August -- that sunny, humid month that comes every year about this time to remind me that Summer isn't going to last forever

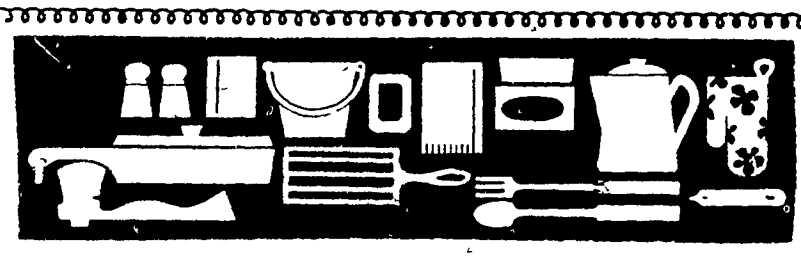
Every time August invades my calendar I get a little bit frantic and a little bit sad I feel that I have too many things planned yet for the Summer when August comes and I know deep in my heart that I'll never be able to get them all in Nevertheless, I will try

August is a busy month in its own right, with harvests in full swing and the outside work always needing more attention than it is getting Fair season comes with its own special needs and jobs, adding to the daily routine

And on the radio and TV, one starts to hear about the advent of Fall and the coming of school buses to pick up the younger members of the farm August would be a much happier time if it didn't bring September right behind it

August -- that terrible mixed up month when the best times of Summer are now How can it be that Autumn is not far away anymore? Where does the time go?

August is here I intend to live every day of it Summer may not last forever but there are still about 26 days of golden sunshine left in this month to be enjoyed



Junior Cooking Edition

Not too many weeks of Summer are left for those junior cookers who want to get their recipes in for the vacation time period, so those who have recipes to share are urged to send them now. Include your name, address, age, and phone number with your recipe and directions and send them to **Lancaster Farming, Junior Cooking Edition, Box 366, Lititz, Pa. 17543.**

This week there are some different cakes to bake. Take your pick of crumb cake, orange layer cake, quick cocoa cake, picnic chocolate cake, picnic cake, and toasted spice cake.

Don't forget to send your recipes in.

CRUMB CAKE

2 cups brown sugar
½ cup shortening
2½ cups flour
1 cup thick sour milk
2 eggs
2 teaspoons baking powder
1 teaspoon baking soda
1 teaspoon vanilla

Mix sugar, flour, shortening, baking powder, and soda together. Then take out and set aside one cup of crumbs for on top of cake. Mix remaining ingredients. Mix well. Pour into 9 x 13 inch pan and bake at 350°F. for 35 minutes or until done. Before baking, sprinkle crumbs on top of cake.

Rebecca S. Fisher
Age 9
Ronks, Pa.

xxx

ORANGE LAYER CAKE

¾ cup shortening
2 cups granulated sugar
2 egg yolks
3¼ cups sifted flour
4 teaspoons baking powder
½ teaspoon salt
1½ teaspoons grated orange rind
½ cup orange juice
¾ cup water
½ cup moist shredded coconut
4 egg whites

Mix shortening and sugar together. Then add egg yolks and orange juice and rind. Mix well, then add water and dry ingredients. Mix thoroughly. Last fold in stiffly beaten egg whites and coconut. Pour into three layer pans and bake at 350°F. for 25 minutes or until done.

ORANGE FILLING

juice and rind of one orange
1 cup cold water
1 cup granulated sugar
1 egg
1 tablespoon cornstarch

Cook until thick and clear. Put between layers of cooled cake. Frost with favorite icing.

Rachel Fisher
Age 11
Christiana, Pa.

xxx

QUICK COCOA CAKE

3 tablespoons cocoa
2 cups flour
1½ cups granulated sugar
2 eggs
1 cup water
1 teaspoon baking powder
1 teaspoon baking soda
1/8 teaspoon salt
¾ cup melted butter

Sift dry ingredients and add remainder of ingredients, not stirring until everything is added Beat well. Bake in 350°F. over for 40 minutes.

Lydia Glick
Bird-in-Hand, Pa.

xxx

PICNIC CHOCOLATE CAKE

4 ounces baking chocolate
½ cup butter
2 cups granulated sugar
2 eggs
2⅔ cups sifted flour
2 teaspoons baking powder
1/8 teaspoon salt
2 teaspoons baking soda
2 cups buttermilk
1 teaspoon vanilla

Preheat oven to 350°F. Grease and flour a 13 x 9 x 2 inch pan. Melt chocolate over hot water. Cream butter, then add sugar and gradually cream until light and fluffy. Add eggs, one at a time, beat well after each addition. Sift flour, baking powder, and salt together. Stir baking soda into buttermilk. Add alternately with sifted dry ingredients to the creamed mixture. Blend in vanilla and melted baking chocolate, mix thoroughly. Pour into prepared pan and bake about 40 minutes or until done. Frost with a fluffy type frosting. Decorate edges of cake with chocolate chips.

New Holland, Pa.

xxx

TOASTED SPICE CAKE

½ cup shortening
2 cups brown sugar
2 eggs, separated
2½ cups flour
½ teaspoon salt
1 teaspoon baking soda
1 teaspoon baking powder
1½ teaspoons cinnamon
1¼ cups sour milk
1 teaspoon vanilla

Cream shortening. Roll brown sugar until very fine and add gradually to shortening. Beat until fluffy. Add egg yolks and beat again. Sift flour, then measure and add salt, baking soda, baking powder, and spices. Sift again. Add dry ingredients alternately with milk and flavoring. Beat thoroughly after each addition. Pour into a greased flat pan 8 x 12 inches. Spread the brown sugar meringue listed below over the mixture.

MERINGUE

2 egg whites
1 cup light brown sugar
½ cup finely chopped nuts or
½ cup shredded coconut

Beat egg whites until stiff enough to stand up in peaks. Slowly add light brown sugar, beating until smooth. Spread over cake batter and sprinkle chopped nuts or shredded coconut on top. Bake at 350°F. for 40 minutes.

Linda Martin
Age 11
New Holland, Pa.

xxx

PICNIC CAKE

½ cup shortening
1½ cup granulated sugar
2 eggs
2½ cups flour
½ teaspoon salt
3 teaspoons baking powder
1 cup milk
1 teaspoon vanilla

Cream shortening. Add sugar gradually and beat until fluffy. Add eggs and beat until well blended. Sift flour, measure and add salt and baking powder. Sift again. Add dry ingredients alternately with milk and flavoring. Beat thoroughly after each ddition. Pour into greased flat pan 7 x 10 x 1¼ inches. Then make the frosting.

FROSTING

12 marshmallows cut crosswise and placed on batter
½ cup brown sugar
½ cup chopped nuts

Mix nuts aand sugar together and sprinkle over the marshmallows. Bake both the cake and the icing for 30 to 35 minutes.

Ida's Notebook

Ida Risser

The first Saturday in August reminds me of picnic time. Long ago when I first learned to drive, I was told to chauffeur our elderly hired man to a picnic in the northern part of our county. Now this wasn't one of my favorite assignments. After all, what was I supposed to do in a strange place all afternoon—sit and listen to the music like the old folks did? Decades later, I'd now be more inclined to sit and take it easy.

Some picnics had a reputation of always having nice weather and others of always having rain. Last week we spent a day at Little Buffalo State Park and it might as well have rained as the children, while using the paddle boats on the lake splashed each other until they looked like they'd been in a heavy shower. It was really a hot and dry day.

XXX

This year my kitchen has been turned into a meeting place for a 4-H Cooking Club. I wasn't too enthusiastic about it at first but my college graduate daughter had agreed to be the leader as the previous leader has illness in her family.

The room is quite large and there's ample space for six lively and eager youngsters to mix and stir. One evening they made a complete meal, while another time they made a salad and a nutritious drink. The session of cake decorating called for me to get my camera out and take a picture of the colorful results.

But the meeting where they worked with dough and made sticky buns seemed to be the highlight of the season. They had fun cutting them with a string before putting them in the honey syrup that they'd cooked and of course, the best of all was eating them afterwards.

When is silage more than silage? **When You've added HY-SI!**

HY-SI SILAGE

You'll suddenly have **more than silage** when HY-SI Silage Improver goes to work. More lactic acid. More cell solubles. More energy. More TDN. Used properly, this exciting product more than pays for itself in **more feeding value** (and that's greater return per acre, to boot!) and produces results like these:

	Fresh-cut crop Unensiled	Regular silage, no additive	More-than-silage with HY SI
PH	5 7	4 8	4 3
Fat	3 10%	4 02%	5.39%
Lactic acid	23%	3 78%	5 61%
Cell solubles	42 78%	38 81%	46 92%
TDN	64 66%	69 96%	71 51%

Call or write for details today. This is the year to fill your silo with something more than silage!

On being a farm wife

—*And other hazards*

By JOYCE BUPP

"A new broom sweeps clean," reminded the clerk as I paid for the new household tool with its smooth varnished wooden handle and neatly trimmed shiny straws.

Apparently, I got a reject.

After methodical and painstaking strokes of the tool across the kitchen floor, our resident ants still manage to find at least a handful of cookie crumbs for munching.

The ceiling-dwelling spiders that cohabit our living room just laugh when the broom sweeps in their direction and somehow manage to set up housekeeping again two minutes after the broom and I have made our rounds.

And the constant parade of hay and barnyard dirt still thumbs its nose at the efforts of my sweeping equipment.

There's a problem even worse than our lack of total housecleaning, though. My brooms periodically sprout legs and walk off seeking new challenges.

How can I be expected to keep the floors reasonably tidy when that beautiful new yellow broom is swiped by a certain youngster for use in sweeping toy truck "roads" through the river of gravel that carpets the ground under the maple trees? Maybe I could hire him out to the state's road crews to help sweep stones in our potholes.

Or, how can I sweep the porch and front walk when that broom's last been used by a youthful referee to break up a dog and cat fight? Unfortunately the referee then left the weapon lying out in the grass during an overnight thunderstorm.

Missing-broom also extends into the calf barn occasionally, when someone carries off my big blue barn broom. Investigation may turn it up being used to sweep off the bed of the pickup, or ragged from pushing grain around the milking parlor feed room, or even carted off for a week-long tour of duty at some area cattle show.

I have frequently accused one of our men of being the guilty party behind the broom heists, much to his dismay.

He insists, instead, that I left it double-parked somewhere on my last ride.

Plant lovers' corner

Prune petunias for more blooms

Home gardeners can enjoy the blooms of their petunia plants until September and even October if they prune them back now.

This doesn't mean shearing the entire plant leaving nothing but a stub. Be selective and prune back only those shoots that are "bloomed out" with perhaps one or two buds on them. Cut these shoots to about two or three inches from the bottom of the plant. It will take about four weeks for the plants to develop new shoots and by the middle of September you'll have flowers to enjoy through late Summer.

You can also extend the blooming season of salvia (scarlet sage), geraniums, zinnias, marigolds and other annuals by removing the dead bloom.

Tomato 'catface' is no disease

If the fruits on some of your early tomato plants have abnormally large scars on the blossom end or an opening that extends up the sides so that they are seriously deformed, it is not due to insects or disease.

This "catfacing" occurs when the weather is cold at the time the first flowers form in early Summer. The same condition develops in the Fall when flowers open in early September. The defect is the result of poor pollination and causes an uneven growth of the fruit.

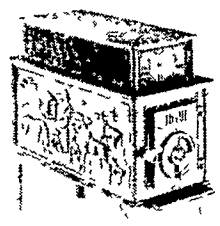
Some tomato varieties are more susceptible to catfacing than others. The old-fashioned Beefsteak variety is very susceptible. A newer variety, Manapal, is also subject to this condition. Supersonic and Ramapo rarely develop catfacing.

Researchers have found the time the plant is pruned holds the key to the amount of catfacing that occurs. Delayed pruning seems to reduce the condition. Early pruning, when the suckers are less than two inches long, increases catfacing.

In ancient Russia it was believed that a skein of red wool wound about the arms and legs would ward off fevers.

Due to impressive fuel economy, Jøtul is an investment that can pay for itself over the first winter.

ANOTHER ULTIMATE FROM *Jøtul*



Jøtul No. 118 is a big, dependable woodburning stove with high heating capacity and a really attractive appearance Can be fired with 24" logs.

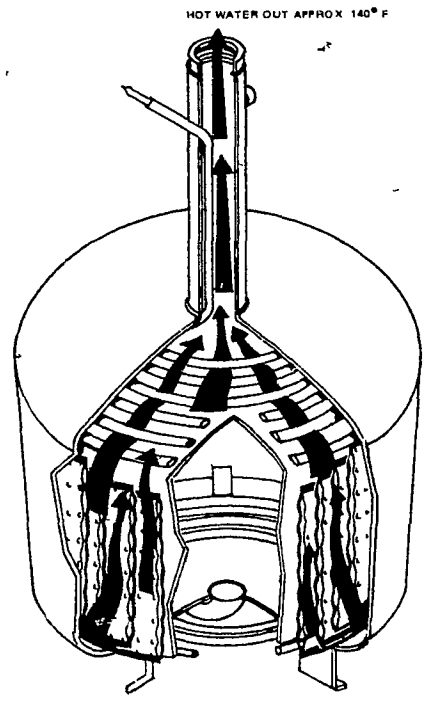
Save Energy and get FREE HOT WATER... with the revolutionary...

MUELLER FRE-HEATER

The HEART of the Fre Heater* the unique all stainless steel heat exchanger!



ALL STAINLESS STEEL CONSTRUCTION!
Mueller Fre-Heater heat exchangers are constructed entirely of type 304 stainless steel The heat exchanger in both models utilize Mueller Temp-Plate a patented heat transfer surface that s in use in more than 60 000 Mueller Milk Coolers around the world

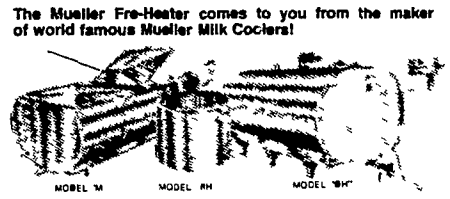
CHOOSE FROM SEVERAL SIZES AND MODELS!
Mueller Fre Heaters are available in 2 3 and 4 H P sizes for either HiPerForm or conventional refrigeration systems

A 2 or 3 H P installation normally requires one 120 U S gallon water storage tank 4 H P installations may require two 120 gallon water storage tanks

Mueller Fre-Heaters Model B and Model C can be used with either Mueller Milk Coolers or with milk coolers made by other manufacturers

FREE HOT WATER!
There are many variables that determine how much hot water can be generated however a rule of thumb is that a Fre-heater operating on 60 degrees F well water will produce a volume of 140 degree F water similar to the amount of milk produced during a milking In other words if 100 gallons of milk per milking is produced approximately 100 gallons of hot water (140 degrees F) will be generated during each milking Experience has shown that on most dairy farms enough hot water is produced to satisfy all hot water requirements

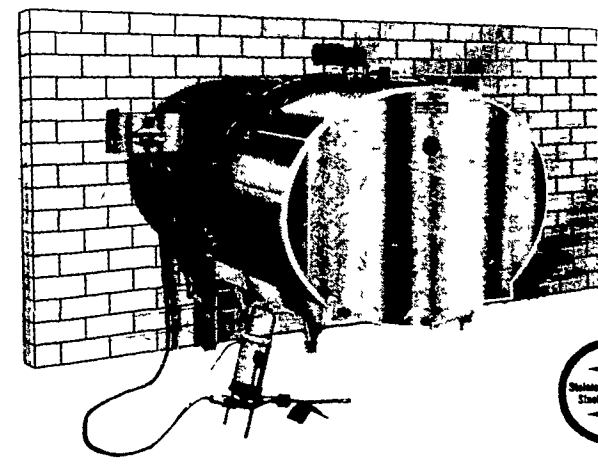
The Mueller Fre-Heater comes to you from the maker of world famous Mueller Milk Coolers!



MUELLER Milk Coolers®

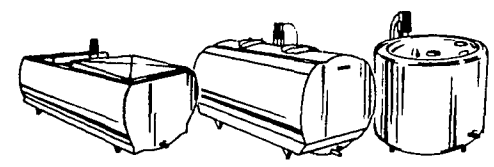
*PATENTED U.S. PATENT NO. 4041726 AND OTHER PATENTS PENDING

MUELLER Bulk Milk Coolers®



SAFEGUARD YOUR LIQUID INCOME WITH A MUELLER

Space saving Mueller Bulkhead Coolers are installed through a milk house wall so you can buy a cooler to accommodate the production needs of your growing herd, regardless of the size of your milk house. Mueller Temp-Plate® Heat Transfer Surface provides efficient, dependable cooling. Large radius corners and smooth welds team with durable stainless steel construction for complete and easy cleaning. All Mueller cooler models readily accept Mueller-Matic® Automatic Washing System.



Now, let herd size determine your cooler capacity not milk house space limitations Depend on MUELLER

Home on the Range

Reach for rice recipes with any meal

This week the theme of "Home on the Range" is rice, bringing together a lot of recipes sent in in the past. We're using the month of August to clean out some of our recipe files and hope to include some of those previously sent in and unable to be used.

Beginning in September we'll go back to the theme calendar for "Home on the Range," and our themes are listed in the box found on this page. Don't forget to send your recipes in to Home on the Range, Lancaster Farming, Box 366, Lititz, Pa. 17543.

GREEN RICE

3 cups cooked rice
¼ cup grated Parmesan cheese
⅓ cup chopped parsley
½ cup minced spinach
2 eggs, well beaten
1 cup milk
¼ cup melted oleo
1½ teaspoons salt
1 tablespoon Worcestershire sauce
2 tablespoons grated onion

Mix all ingredients well and place in a 2 quart casserole. Bake in 325 degree oven 45 minutes. Serves 6.

xxx

SYRIAN RICE

2 tablespoons olive oil
1 cup raw rice
2 cups beef bouillon
1 clove garlic, mashed

Heat olive oil in a 1 quart (to 1½ quart) casserole. Add rice and stir until every grain is coated, but do not brown. Add bouillon and garlic and cook in 375 degree oven until the rice has absorbed all the liquid and has a slight crust on top (about 45 minutes). This can stand in the oven with the heat turned down almost indefinitely. Serves 4.

xxx

ORANGE-FRILLED RICE PUDDING

4 tablespoons rice
4 eggs
1 teaspoon vanilla
½ cup sugar
1 quart milk
½ teaspoon salt
Juice & rind of 1 orange

Cook rice in heavy saucepan with half the milk. Pour into a 2 quart casserole with beaten eggs, salt, vanilla, juice and rind of orange. Add remaining milk and sugar. Bake in 350-degree oven for 45 minutes or until set. Cool. Yield: 5 servings.

xxx

STRAWBERRY-RICE CREAM

3 cups water
¾ cup uncooked rice
Dash of cinnamon
¾ cup sugar
1 cup heavy cream, whipped
2 cups milk
¾ teaspoon salt
3 envelopes unflavored gelatin
2 teaspoons vanilla

Combine water, milk, uncooked rice, salt and cinnamon in double boiler. Cover and cook over simmering water for 40 minutes or until rice is tender. Stir occasionally. Mix gelatin and sugar stir into rice until gelatin dissolves. Pour into large bowl; cool. Add vanilla. Chill until slightly thickened. Fold in whipped cream. Turn into 8-cup ring mold. Chill until firm. Unmold.

xxx

RICE SOUFFLE

6 eggs, separated
salt to taste
4 tablespoons oleo
2 cups cold rice
1 cup milk
½ lb. grated cheese

Beat egg whites until stiff; beat yolks and add to rice. Blend in salt, milk, oleo and cheese. Stir well. Fold in egg whites; pour into 7 x 11-inch baking dish. Bake 30 to 45 minutes in 300-degree oven or until brown on top. Yields 6 servings.

Mrs. James L. Coombs
Gardners, Pa.

xxx

CHICKEN CONTINENTAL

3 to 4 lbs frying chicken pieces
⅓ cup seasoned flour
¼ cup butter
1 can condensed cream of chicken soup
2½ tablespoons grated onion
1 teaspoon salt
dash of pepper
1 tablespoon chopped parsley
½ teaspoon celery flakes
1/8 teaspoon thyme
1⅓ cups water
1⅓ cups quick cooking rice

Roll chicken in flour, brown in butter. Remove chicken. Stir soup, seasonings, and water into drippings. Cook and stir to a boil. Spread rice into a 1¾ quart shallow casserole. Pour all but ⅓ cup soup mixture over rice. Stir to moisten. Top with chicken and rest of soup mixture. Cover and bake at 375°F. for 30 minutes or until chicken is tender. Garnish with paprika if desired.

Marlene E. Bomgardner
Annville, Pa.

xxx

SPANISH RICE

½ cup uncooked brown rice
2 tablespoons butter
1 cup diced onions
1 1/8 teaspoon salt
3 tablespoons chopped green pepper
2½ cups tomatoes or a tomato sauce and tomatoes mixture
1 to 2 teaspoons honey
2 whole cloves
1 small bay leaf
grated cheese

Cook brown rice in ¾ to 1 cup water. Bring to a boil and reduce heat to simmer 35 to 40 minutes, or until all liquid is absorbed. In hot butter, saute onions until golden. Add salt, tomatoes, green pepper, and seasonings. Simmer, uncovered for 15 minutes. Remove bay leaf and cloves. Add rice and cheese. Mix well and put into greased casserole. Put extra cheese and wheat germ or bread crumbs on top. Bake 30 minutes at 375°F.

Pam Helm
York, Pa.

xxx

SPANISH RICE

1½ lbs. hamburg
1 diced onion
½ diced green pepper
6 cups tomato juice
2½ teaspoons salt
1 teaspoon chili powder
½ cup granulated sugar
1½ cups rice

Brown hamburg, onion, and green pepper together. Add remaining ingredients. Bring to a boil. Cook over low heat for 1½ to 2 hours, in the same pan with a tight fitting cover.

Ruth Brubaker
Seven Valleys, Pa.

xxx

CREAMY RICE PUDDING

2 quarts milk
½ cup rice
1 teaspoon salt
1 cup granulated sugar
2 tablespoons butter
dash of nutmeg
dash of cinnamon

Rinse rice in cold water twice. Then mix with all the rest of the ingreidents. Stir well to dissolve sugar. Cook on top of stove. Bring to a boil but be careful that it doesn't boil over the sides of the pot. Turn heat down and simmer 30 minutes. Pour into baking dish and bake until well browned, for a half hour or more at 350°F. More rice can be added for a thicker pudding.

Mrs. Rose Hoover
Dallas, Pa.

xxx

FRANK'S RICE-FAMILY STYLE

8 frankfurters
2 tablespoons butter
2 tablespoons chopped onions
1⅓ cup water
½ teaspoon salt
1⅓ cup quick cooking rice
⅓ cup catsup or chili sauce
½ teaspoon vinegar

Brown frankfurters in butter in the skillet. Add the onion for the last few minutes, saute until onion is tender. Add water, bring to a boil. Stir in salt and rice. Cover, remove from heat and let stand for five minutes. Stir in catsup and vinegar. Makes four servings.

Mrs. Charles Biehl

HONEY BROOK MOLASSES

• BAKING MOLASSES • TABLE SYRUP
• BLACKSTRAP MOLASSES
• CLIP & SAVE FOR YOUR RECIPE FILES:

MORAVIAN GINGER COOKIES

⅓ cup Honey Brook Baking Molasses
3 tbsp. soft shortening
2 tbsp. brown sugar
1¼ cups flour
½ tsp. salt
¼ tsp. soda
¼ tsp. cinnamon, ginger & cloves
Dash nutmeg & allspice

Mix molasses, shortening and sugar thoroughly. Measure flour by sifting. Blend all dry ingredients; stir in. Work with hands until well blended. Cover; chill 4 hours. Heat oven to 375 deg. Roll dough out paper-thin, a little at a time. Cut in desired shapes. Place on greased baking sheet. Bake 5-6 minutes, or until lightly browned. When cool frost with a thin layer of icing. Makes about 5 dozen cookies.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

HOT WEATHER ACCENTS FOR PROPER FOOD CARE

Safe food must be planned – not left to chance, and hot weather accents the need for more careful planning.

The cooperative efforts of USDA and state agencies to make available clean, safe and wholesome food will be in vain unless you take certain precautions to keep it that way.

What do these precautions include? Proper care in buying, storing, handling and cooking food.

Shop for meat and poultry and other perishable foods just before you check out, unless you make this a consistent practice, you may be tied up in store traffic or diverted by bargain hunting longer than you expect and thus risk contamination of the perishables in your basket.

Make sure frozen foods are hard-frozen and have been kept below the frostline in the supermarket freezer.

You can tell when frozen foods have been poorly handled by these signals.

They have signals you can easily read. One of those signals is softness. When you pick up frozen food thatfeels soft, you know it has not been kept at zero F. or below.

Another signal is an ice coating on the outside of the package. This is a good indication that there has been some previous thawing and refreezing.

When buying refrigerated foods, make sure it is cold - not just room temperature. The temperature of the refrigerator case should be 40 degrees F. or below.

When you're checking out, ask the clerk to bag cold foods together, explaining that they remain colder longer when so packed.

Frozen or refrigerated foods interspersed with room temperature foods may warm up more quickly, especially if you are a half hour or more getting them to your home freezer or refrigerator.

Never, never be tempted to do any more shopping after you have loaded your car with frozen or refrigerated foods. Head for home and unload these perishable foods first. Store them immediately in the proper place.

WEATHER ACCENTS FOR PROPER FOOD CARE

Remember food may not be safe to eat if held more than two hours at temperatures between 40 and 140 degrees F. This includes all of the time of buying, storing, preparation and serving.

Chances of maintaining the good quality of the food you buy depends on your buying good food and handling it properly.

ABOUT THE ORIGIN OF DENIM

Denim originated in Nimes, France, as a fabric tough enough for field workers and colorfast enough for sailors and fishermen at sea. The weavers saved on cost by dying only the warp threads and leaving the fill direction undyed which produced the white flecked look characteristic of the cloth. The deep blue color of denim comes from indigo, a dye, originally obtained from the leaves of a plant found in Asia. The name denim is a shortening of the French words, "de Nimes", meaning of Nimes.

Americans began using denim, then a natural beige color, during Western pioneering days. It was used for tents, covered wagons and cowboy pants that gave ideal protection from sage brush and cactus.

World War II also gave denim usage a boost. Sailors and Coastguardsmen were issued blue jeans as standard dress and civilians, facing fabric shortages, sought durable denim.

Today denim is one of America's leading exports. More than 400 million yards are produced each year. Blue denim has become a sales phenomenon. It sells well in many style garments and refuses to succumb elements that normally spell death to a fashion fabric: oversaturation, rapid price changes and obsolescence due to changing trends.

Junior Hereford Show held in New York

ITHACA, N.Y. – A strong showing by New York State youth was presented at the New York Junior Hereford Association Premier Hereford Show held recently at the Livestock Pavilion on the Cornell University campus.

Ed Brown of Blakeley Herefords, Charles Town W. Va. judged the show and Roxanne Beale Amendt of Altoona, Iowa, secretary of the American Junior Hereford Association presented ribbons and trophies.

Patti Joyce of Penn Yan won the grand championship female honors with her junior yearling heifer GH Belle Dhu 2347 out of Beau Dhu 169.

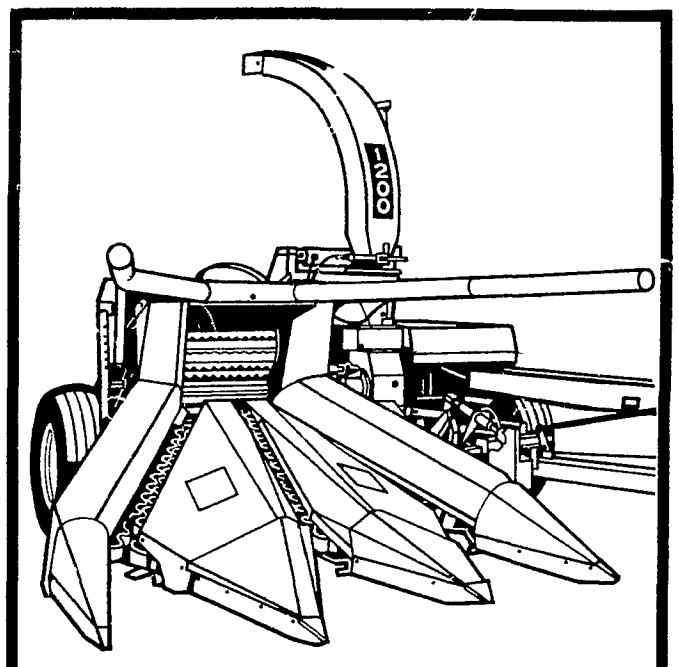
Tom Swiler of Cameron had the reserve senior champion with his second place junior yearling heifer IV Princess NT 42 C.

The junior champion heifer was a summer yearling heifer, SK Victra FFA 19774 shown by Lisa Kriese of Liverpool. The junior champion was named reserve grand champion. The reserve junior champion came from the summer yearling class also and was VCP Choice Lady 2 shown by Priscilla Peters.

Tom Swiler showed the grand champion steer and his brother Stuart had reserve champion steer.

The showmanship class was won by Peter Andersen of Long Eddy with Lisa Kriese second. Andersen was the winner of the senior division in the showmanship contest. The winner in the junior division was Tara Mitchell of Cobbleskill.

An adult showmanship contest concluded the event and was won by Theodore Kriese of Liverpool.



Conquer big crops

The heavy-duty Gehl 1200 forage harvester handles tractors up to 225 hp Nine tungsten-carbide faced knives deliver 9,000 cuts per minute at 1,000 rpm Lets you power through the heavy crops with time to spare. Two-row corn attachment; windrow pickup and snapper head available Stop in and look at the conqueror today

Farm Women Societies

Berks Co. Society 5

Berks County Farm Women Society 5 met at the home of Mrs. Carl Keener, Womelsdorf R1, for their July meeting. Sixteen members were present.

The program for the evening was "Name that Tune". Mrs. Andrew Schoener played the organ while Mrs. Roland Feeg directed the program.

The group decided to give $240 to Berks Heim for them to spend as they felt was needed. They also intend to make lap robes and shawls for Berks Heim.

The next meeting of the group will be held on August 28, at 7:30 p.m. in the home of Mrs. Carl Kepply, Womelsdorf. The program for the evening will be a scavenger hunt.

Lancaster Co. Society 13

Lancaster County Farm Women Society 13 will hold their annual family picnic at the Lancaster County Park, Pavillion 3, on August 9. Each family is asked to bring a covered dish to the gathering, which is set to begin at 6 p.m.

Members of Society 13 and Society 14 recently entertained guests at Conestoga View by helping them play bingo and supplying gifts.

The next regular meeting of the group will be on September 8 at the home of Mrs. Robert Bomberger, New Holland.

York Co. Society 16

Fifteen members were present for the July meeting of York County Farm Women Society 16. It was held at the home of Alma Stambaugh, Dover.

Several members of the group will attend a dinner theatre on September 1, at Wisehaven.

It was announced that York County Church Night will be on October 8 at the Christ Lutheran Church, Dallastown.

Society 16 will entertain Society 30 on September 27.

The next meeting of the group will be a progressive dinner starting at the home of Mildred Goehrig at 6 p.m. and ending at the house of Dawn Leib, Dover. This will be held on August 23

York County Society 31

The family picnic of York County Farm Women Society 31 was held at the home of Evelynn Barrell, Wellsville. Members, friends, and families of the group attended the event.

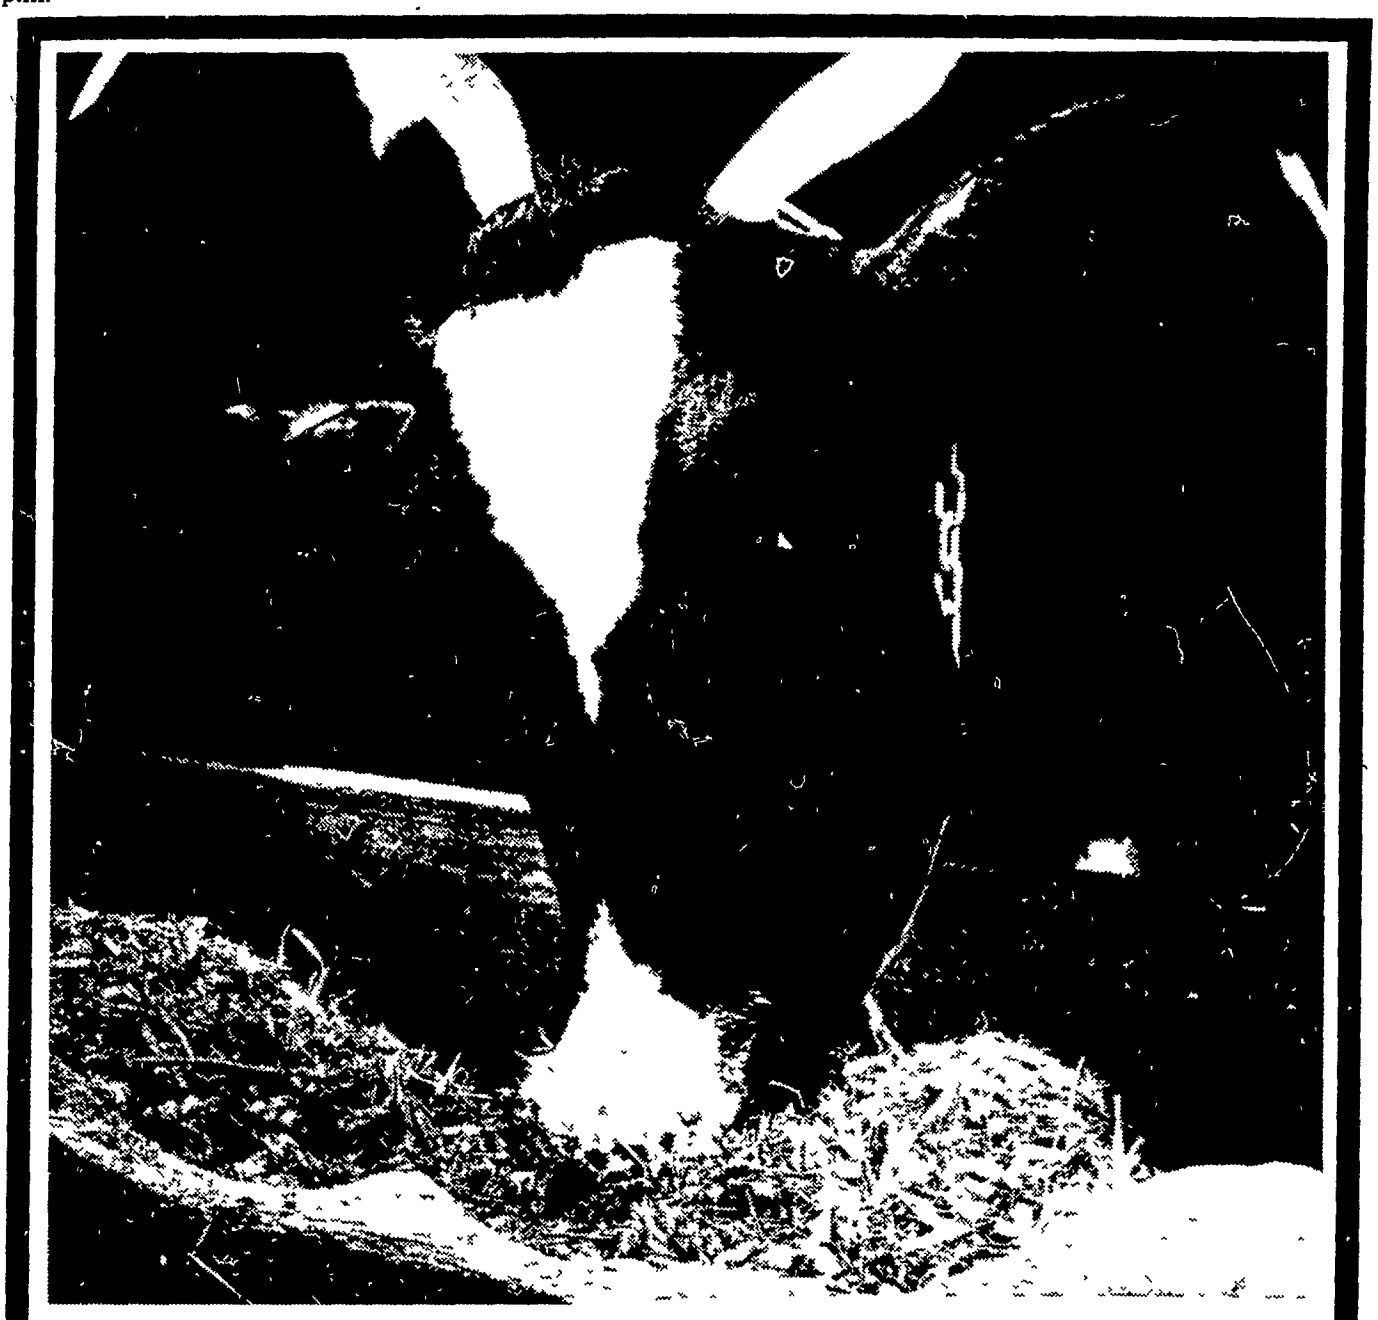
The group's next meeting will be held at the home of Joan Pipher, Dillsburg R2. The date of the meeting is August 14, beginning at 7:30 p.m.

York Co. Society 35

On July 13, members of York County Farm Women Society 35 met at the home of Mrs. Loretta Hamme. The group entertained Society 25 with a chicken barbeque.

Members of both groups participated in the program and games, and prizes were awarded.

The next meeting will be at the home of Mary Ann Brenneman on August 10, starting at 7:30 p.m.



STOP NUTRIENT LOSSES AND PRESERVE QUALITY SILAGE

Tests prove that Beacon Silage Pre-Serv* will reduce nutrient losses that can occur during silage fermentation. These losses are a result of excessive oxidation and seepage. Both can be controlled by using Beacon Silage Pre-Serv.
The result—more nutrients for milk production in every silo of treated corn silage. In fact, for every $1.70 invested, Beacon Silage Pre-Serv returns up to $4 in increased energy.
Apply it right at the chopper or blower. Beacon Silage Pre-Serv keeps your milk profits high! Beacon Headquarters, Cayuga New York.

Chicken Pizza' wins chicken cooking contest

TAMPA, Fla. – An Italian-born grandmother from California won the $10,000 top prize in the 1978 National Chicken Cooking Contest, held here recently.

Mrs. Mary Grace Cerami of Ojai cooked "Chicken Pizza," an unusual combination of chunks of chicken breasts with all the usual pizza ingredients to win the 30th annual cooking competition over 50 other contestants representing each state and the District of Columbia.

Placing second and winning $4,000 was Mrs. Patricia Eileen Hinua of Honolulu, Hawaii, a registered nurse who was born in Canada. Her recipe was "Korean Pupu Chicken," made with chicken thighs and her cooking area was decorated with one of several leis of orchids which she brought along for good luck.

Third place winner was June R. Grayson of Enid, Oklahoma. Her recipe for "Cookout Barbecued Chicken" won $3,000. Miss Grayson, who is retired, says she learned to cook at age six as the only girl in a family of six brothers who "all liked to eat."

A construction worker and father of five, Robert A. Brown of Pittsfield, N.H. placed fourth. His recipe for "Farmer Brown's Chicken Casserole," won $2,000. Brown spends his free time working on his "hobby farm," which he says inspired the title for his recipe.

In fifth place and winning $1,000 was Mrs. Alice M. Albertsen of Wayne, Nebraska. Her recipe for "Chicken Hawaiian" started out as a "round robin recipe" and was improvised and refined as she prepared it for her retired husband.

Determination paid off for the top prize winner. The California contestant participated in the 1975 National Finals and her two married daughters have also been finalists in previous chicken cooking competitions. She collects recipes as a hobby and learned to cook by watching her mother when she was a small child in Italy. Mrs. Cerami, a widow, also has two married sons and eight grandchildren, who, she admits, she enjoys "spoiling."

The special congeniality award went to the Mississippi contestant, Willodean Hanson of Hamilton.

Held for the first time in Florida, the National Chicken Cooking Contest is the nation's oldest continuous cooking competition, this year celebrating its 30th anniversary. It is sponsored by the National Broiler Council to encourage the use of chicken and to emphasize the variety of ways it can be prepared.

Last year's winner was Ann Costa of Atlanta, Ga. who won $10,000 for her recipe for "Chicken Ratatouille." That contest was held in Jackson, Miss., and the 1979 competition will take place next July in Charleston, S.C.

A panel of nationally-known magazine and newspapers editors, columnists and food experts selected the winning recipes.

Cooking of more than 300 pounds of chicken was done in the mini-kitchens set up especially for the event at Tampa's Curtis Hixon Convention Center. While local and out-of-town spectators looked on, contestants prepared their recipes on ranges supplied for the competition by Jenn-Air. Each recipe was parpared twice, once for sampling and evaluating by the judges and again for a table display.

Ed Covell of Easton, Md. chairman of the board of the National Broiler Council, presented the $20,000 in prizes to the five winners at an awards dinner Wednesday night. Dan Anderson of Live Oak, Florida, served as general chairman of the contest.

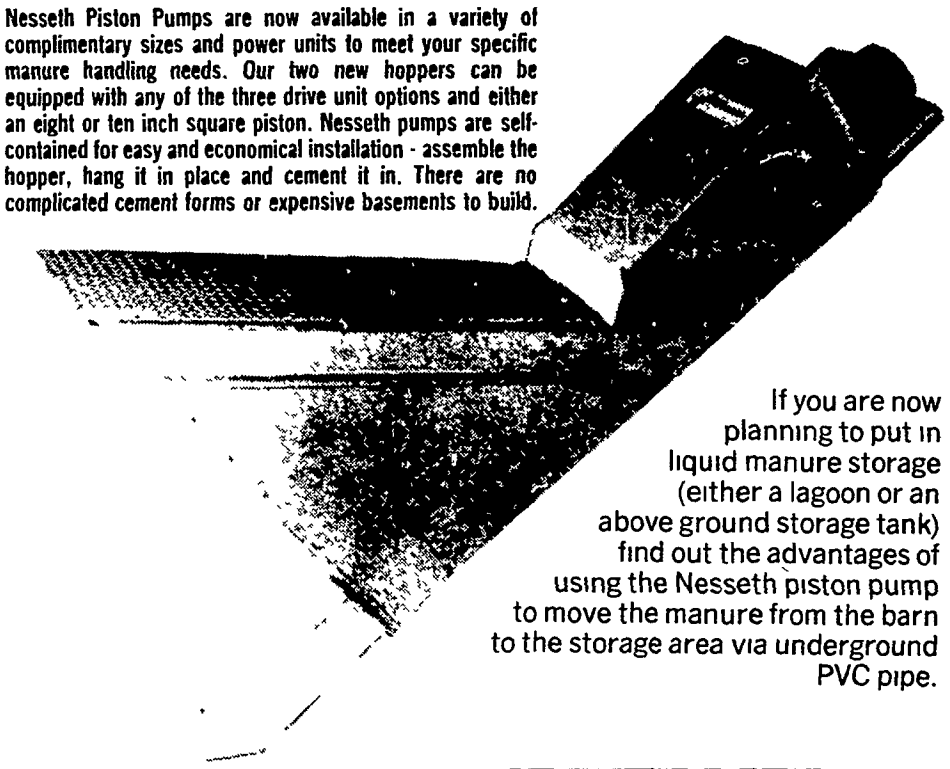
Nesseth piston pumps

Nesseth Piston Pumps are now available in a variety of complimentary sizes and power units to meet your specific manure handling needs. Our two new hoppers can be equipped with any of the three drive unit options and either an eight or ten inch square piston. Nesseth pumps are self-contained for easy and economical installation - assemble the hopper, hang it in place and cement it in. There are no complicated cement forms or expensive basements to build.



If you are now planning to put in liquid manure storage (either a lagoon or an above ground storage tank) find out the advantages of using the Nesseth piston pump to move the manure from the barn to the storage area via underground PVC pipe.

USED TANKS		USED PUMPS	
3000 gal. Badger Spreader	$3500	11 Ft. DeLaval	$800
1800 gal. Huskee Spreader	$1100	10 Ft. Badger	$800
1500 gal. Badger Vacuum	$2500	8 Ft. Badger (Like New)	$1500

Chicken Pizza

(Continued from Page 89)

The top winning recipe follows:

CHICKEN PIZZA

2 whole broiler-fryer chicken breasts, halved, boned, skinned and cut in 1-inch pieces.
1 package (8 rolls) refrigerated crescent rolls
¼ cup cooking oil
1 large onion, sliced into thin rings
1 large green pepper, seeded, cut into thin rings
½ lb. fresh mushrooms, sliced
½ cup pitted ripe olives, sliced
1 can (10½ oz) pizza sauce with cheese
1 teaspoon garlic salt
1 teaspoon oregano
¼ cup Parmesan cheese
2 cups shredded Mozzarella cheese

Unroll crescent dough into 8 triangles. Into lightly oiled 12-inch pizza pan, press dough, especially at perforations, to seal. In fry pan place oil and heat to medium temperature. Add chicken, onion, green pepper, mushrooms and olives and cook, stirring, about 5 minutes or until fork can be inserted in chicken with ease. Spread pizza sauce over crust. Spoon chicken mixture evenly over sauce. Sprinkle garlic salt, oregano and Parmesan cheese on all. Top with Mozzarella cheese. Bake, uncovered, in 425°F. oven 20 minutes or until crust is done. Cut into wedges to serve. Makes 4 servings.

Cookbook available

WASHINGTON, D.C. — This year's edition of The Chicken Cookbook features the 51 winning recipes of the finalists in the 1978 National Chicken Cooking Contest, along with old favorites, past $10,000 winners and basic chicken recipes.

The cookbook also tells how to enter the National Chicken Cooking Contest, sponsored every year by the National Broiler Council, a trade association representing producer/processors of chicken in the United States. Almost everyone is eligible to compete in the yearly contest. The entry period is open every year from January thru March. There are 51 contestants, one from each state plus the District of Columbia.

Besides many delicious recipes, the cookbook includes tips on nutrition, special diets, buying, storing and freezing chickens. The beginning cook will find the basic recipes section helpful. It explains how to fry, oven-fry, broil, barbeque, roast and simmer chicken in the simplest manner. Diagrams show how to cut up a chicken and bone chicken breasts and thighs.

Interest in microwave cooking is gaining, and basic directions plus several recipes are included for those who have a microwave in their kitchen. There are over 100 pages in the 1978 Chicken Cookbook and over 100 recipes and tips ready to help everyone prepare simple, economical and delicious chicken dishes. The 1978 Chicken Cookbook is available for $1.00, including postage. Mail orders to: Chicken Cookbook, Dept NBC, Box 307, Coventry, Conn 06238.

Agway agent cited

SYRACUSE, N Y. -- Bernard C Morrissey of Stevens, has been named one of nine winners of an "Award of Excellence" in the Agway Life Insurance Honor Club program.

Winners were honored recently at an awards conference in White Haven, Pa To qualify for the Agway Life Honor Club, an agent must sell a minimum life premium during the year

Agway Life Insurance is a wholly owned subsidiary of Agway Inc , a farm supply and food marketing cooperative that serves agriculture in 12 northeastern states. Agway Life Insurance provides full-line coverage to farmers and to the general public across the Northeast.

Farmers need new marketing bargaining law and Capper-Volstead, NFU tells Justice Dept.

WASHINGTON, D.C. – The Capper-Volstead Act of 1922, a basic cooperative statute, has proven itself as being in the public interest and ought to be retained without change, the National Farmers Union recently told the Deparartment of Justice's "National Commission for the Review of Antitrust Laws and Procedures". However, in a statement submitted by Reuben L. Johnson, director of legislative services, Farmers Union declared that besides Capper-Volstead, farmers now need a comprehensive marketing/bargaining law to enable them to earn the remunerative prices and income they deserve. An NFU task force is preparing recommendations for such a proposal.

Johnson's statement noted that the Farmers Union and other general farm organizations and the National Council of Farmers Cooperatives have reached a consensus on a bill to replace the Agricultural Fair Practices Act, and indicated that a push for such legislation will come in the new Congress next year.

Farmers Union said it welcomes "any fair and objective review" of Capper-Volstead, but warned that cooperative studies made by the Federal Trade Commission and the Department of Justice in recent years have shown an open and flagrant bias against farm cooperatives and federal marketing orders.

Johnson complained that FTC and Justice officials continue to persist in unfounded allegations and biased charges despite the fact that these accusations of predatory conduct have been refuted completely.

The Farmers Union noted that one member of the House, who is a member of the Antitrust Review Commission, had been the sponsor of a bill in the 94th Congress which would have placed a $5 million limit on the annual volume which any cooperative could handle.

"This limitation would have knocked out all the regional cooperatives and would have affected many local cooperatives as well," Johnson observed.

The NFU testimony noted that some critics of the farm cooperative system have termed the larger cooperatives "mega-cooperatives", indicating that they regard them as a "million times too big."

"But the important thing, in the view of Farmers Union, is not sheer size, but what you do with it," Johnson explained.

"The most conclusive proof that the nation's farm cooperatives have not used Capper-Volstead for extortionate pricing of their products is in the statistics of farm prices and income since 1922," Johnson maintained. "Except for the years from 1942 through 1952, farm prices have invariably been well below full parity levels. And the parity prices of 1942-52 are attributable to market demand and the farm stabilization programs rather than to any connivance of farmers under the cooperative laws."

Farmers Union stressed that USDA has power under Section 2 of the Capper-Volstead Act to issue cease and desist orders when it is determined that farmers have used their cooperative system to "unduly enhance" prices.

"Over the years, a number of investigations have been made," Johnson explained, "but USDA has never issued a cease and desist order because no evidence of 'undue enhancement' could be found. Obviously, farm prices would have to be substantially over 100% of parity before accusations of predatory pricing could be sustained."

He cited a 1976 accusation that consumers were being "ripped-off" by the dairy cooperatives, yet it was found upon investigation that the prices obtained by dairy farmers were needed to compensate for a severe cost-price squeeze and to offset rising feed costs and, even with the prevailing prices, many dairy farmers still had "a negative cash flow."

The Farmers Union statement acknowledged that some major farm cooperatives have made dramatic growth in the past decade, but pointed out that the four largest farm cooperative handlers generally did not keep pace with the market-share growth of the four largest proprietary handlers in farm marketing and farm supplies.

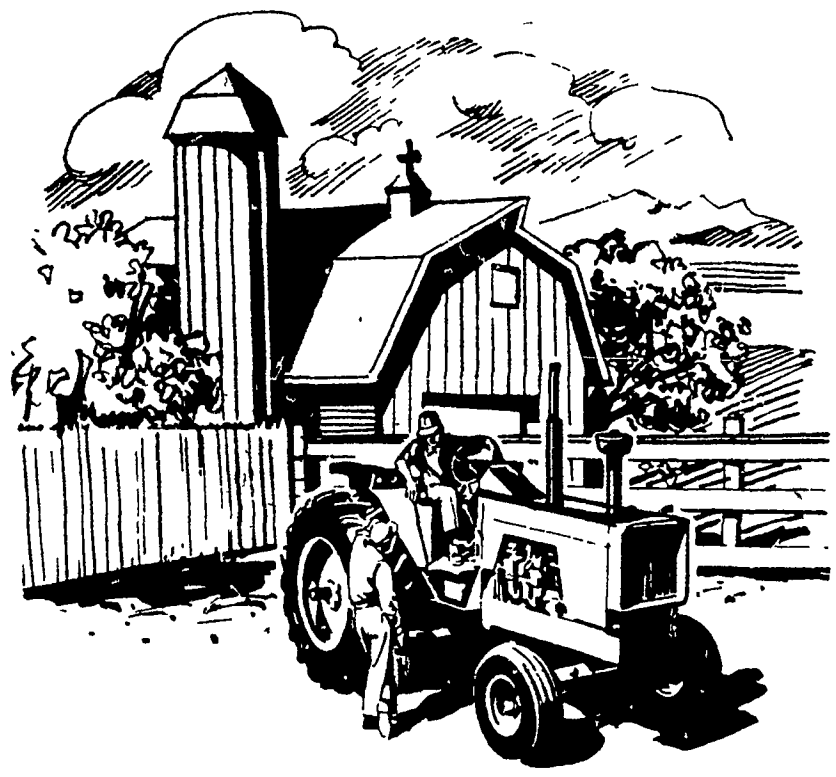
Johnson explained that the cooperative market share appears exaggerated for several reasons, namely, that while cooperatives may have a substantial share in buying from the farmer, the proportion they process, merchandise, or export is much smaller; that the regional cooperative is often just a federation of widely dispersed local cooperatives who are the true owners; and, finally, that having a large market share is not likely to lead to abuse of consumers by cooperatives.

As examples, NFU cited the 77% market share of the dairy cooperatives as being the activities of 630 separate companies; the 31% share of the fertilizer market held by cooperatives being divided among 3,865 local associations; and the fact that six of the nation's "super-coops" are federations owned in turn by 3,700 local cooperatives.

Johnson acknowledged that petroleum and fertilizer cooperatives had substantially increased their market share in recent years but charged this off to abandonment of rural markets by some of the proprietary petroleum and fertilizer companies following the onset of the energy crisis in 1973.

(Reprinted from the National Farmers Union's WASHINGTON NEWSLETTER, July 28, 1978 issue.)

Farmers Who Need Money To Grow On Come To FARM CREDIT.



Shouldn't somebody extend you a dependable line of credit based on the investment you already have? Whether you need $5,000 or $100,000? How about your management abilities and your earning capacity? Weren't they collateral, too?

We think so. That's why most farmers who want to borrow enough money to really grow come to their

FARM CREDIT SERVICE

DEALER ACCOUNTS WELCOME

"It doesn't seem like it's been a year since I covered this show in 1977," I remarked to Curtis Akers, a friendly, witty, and very successful southern Lancaster County dairyman who was relaxing by a tree waiting to inspect health papers of incoming cattle to the Lancaster District Holstein Show.

"Yeah, I don't think they put as many days into a year any more as what they used to," the owner of 'Solanco Acres' replied. "It seems to be getting worse every year," he added.

"You're right," I agreed, noting that the years are really whizzing by. "But the Winters are still long enough," I offered.

"There's a way to make them go quick too," Curt answered. "All you have to do is go to the bank and sign a note for a few thousand dollars that's due in six months. You'll be surprised how quick Spring arrives," the witty farmer suggested with a sparkle in his eye and a mischievous grin spreading across his face.

Time does fly, especially when there are deadlines such as payment dates to honor. The days of the year occasionally have a more leisurely pace, however, and just this week we arrived at a date which many dairymen have been waiting for for months. To some, August 1, 1978 may have seemed an eternity away.

Now it's here.

It's time to build a new production base.

The base-building period was always one we looked forward to, as we never failed to ship a considerable amount of surplus milk each Spring. With the advent of a new production year, we looked forward to raising our monthly quota as well as our income

It's one of the challenges which most dairymen can identify with

But with this shift to emphasized profit motivation also comes a time for more work, and greater disappointments, should failure arrive.

Each cow that freshens now is looked upon as another ace in this gamble for profits. But mid-Summer, as every dairyman knows, is not the best time to have a cow freshen She doesn't like hot weather, and by having bred her for a July or August freshening, the dairymen is playing his "cards" at an otherwise undesirable time of year. But the public's consumption patterns demand that he do so. Future profits are at stake

Anything less than top production from a fresh cow now adds up to a sizable disappointment. Earlier in the year, a farmer could live with that more easily

But things could always be worse. For us, one of the worst tragedies to occur during the base-building season involved one of the best producers in the herd. Dairymen seldom have tragedies with poor producers It's always the best ones.

"Number 59" was the victim of tragedy and the source of our anguish A beautiful cow, gentle in her behavior and most generous with her productivity, she was the ideal cow to boost the quota. We all looked forward to her freshening. One evening it happened. She gave birth to a healthy calf and we were proud. Her udder had a superb shape and showed promise of 100 pounds of milk per day

Having no reason to suspect that tragedy would occur, we allowed "59" to spend the night in the freedom of an outdoor boxstall

During the night, she passed her afterbirth, and then chewed and choked on it. A cow that could have added well over 2000 pounds of milk to our August production was dead. That promising udder was stiff and cold. Never again would she stroll up to me and rub her face against my body. It was heartbreaking in many ways

Raising the base rarely came easy, no matter how much we looked forward to it. Even without the tragedies of a freak accident or complicated birth, the extra work is demanding and trying. There are more calves to feed, more fresh and soon-to-be-fresh cows to watch closely, longer milking hours, and more chances for mastitis problems, to name a few of the "hurdles."

Emotionally, it amounts to the good satisfaction of seeing production rise on one side of the scale, while the increasing seriousness of the gamble heightens the fear of losing. It's all a part of life on the farm.

Childhood diseases linked to adult health problems

HARRISBURG – While the incidence of some diseases of childhood is rising because not enough children are being vaccinated, scientists are uncovering evidence that links preventable childhood disease to serious problems that develop when the child grows into adulthood.

According to the Pennsylvania Department of Health, new evidence suggests that the mumps virus may cause permanent damage to the pancreas of children who contract the diseases, leading to diabetes.

Similarly, recent research shows a possible connection between measles in children and the later development of multiple sclerosis when the measles victim grows into adulthood.

These new findings are only one of the many reasons why children should be protected from disease. History records the tragedies of preventable diseases, and those tragedies are recurring in spite of the availability of vaccines.

The State Health Department strongly recommends vaccination for seven diseases - mumps, polio, measles, rubella (German measles), diphtheria, tetanus and pertussis (whopping cough). All of the diseases are serious, all of them are still striking unvaceinated children, and all of them can be prevented.

I urge parents to check their records to make sure that all of their children are fully protected against all seven of these diseases. If records are not accurate or if there is any doubt about a child's immunization status, it is important that the family doctor, county health department, or local state health center be contacted to determine the availability of vaccinations.

For further information call the toll-free State Health Line at 1-800-692-7254.

Summer Special

Bermuda onions are good for eating raw as well as cooking They're usually available in the spring and summer Most Bermuda onions are yellow, though some are white-skinned. These mild-flavored type onions are not cured as long as other types, so you can only store for short periods of time in the refrigerator.

Lancaster County 4-H'ers chosen

Glen Seidman, and Sarah Brubaker, both of Lancaster, who recently completed special communications training at Penn State as a member of the 4-H Reporters Team, receives Completion Certificate from Dr. Thomas B. King, Penn State associate dean for Extension.

Some people used to believe that anyone whose eyebrows met must be a werewolf, vampire or witch.

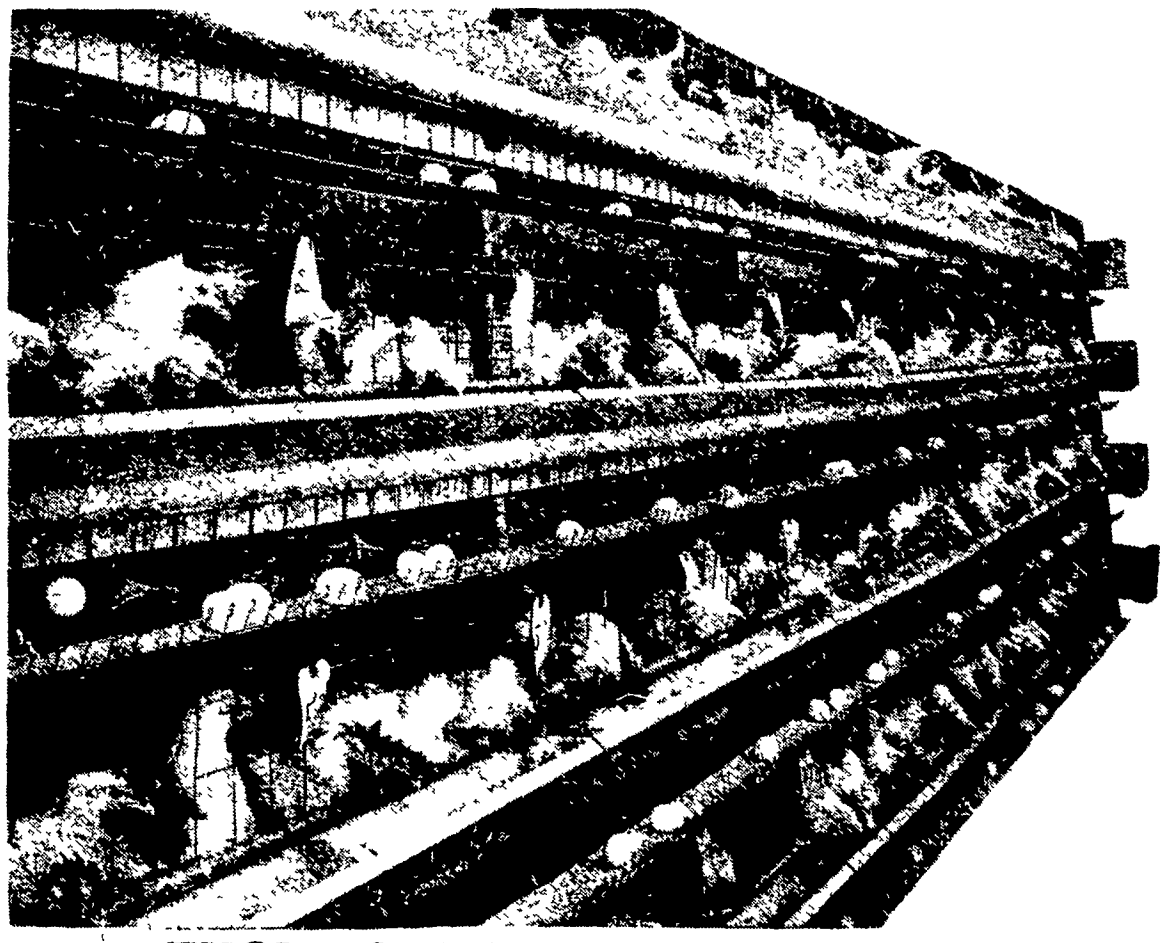
A.R. WOOD'S REVERSE CAGE

YOUR KEY TO HIGHER PROFIT

THE 4-DECK REVERSE CAGE SLANT BACK SYSTEM FROM A.R. WOOD IS BUILT TO DELIVER

EXTRA NET PROFIT - UP TO 50¢ EXTRA NET PROFIT PER HEN PER YEAR!

Research has confirmed that less competition at the feed trough is one key to more eggs and more net profit. With proper management, the Northco® 4-Deck Reverse Cage Slant Back System from A.R. Wood will deliver extra net profit from the day it's installed:



HERE'S WHY...

- The extra equipment costs are offset by savings in building costs (in new construction).
- There's no increase in operating cost, no extra feed.
- The Reverse Cage delivers fewer cracked eggs.
- Slant back design eliminates the need for dropping boards and dropping board scrapers.
- The Northco® Core Auger mixes the feed as it moves, to prevent feed separation.
- There's only a 2" setback per tier, so there's easy access to all levels.

Md. FFA convention names award winners

CATONVILLE, Md. – The 50th annual Maryland FFA Association convention was held recently at UMBC in Catonsville, MD. Dr. Michael Maloney, Director of Academic Services at UMBC, welcomed the FFA members and guests to the University. The keynote speaker for the opening session was the Honorable Blair Lee III, Acting Governor of Maryland. He told the many members and guests present to stay in agriculture and preserve farmland.

A slide presentation entitled "Maryland Agriculture" was given by Ted Beinhart, from the Maryland Dept. of Agriculture. The 1978 State FFA Talent Contest was held with Bob Levering from the Catoctin FFA Chapter singing "Fiddler on the Roof" and "If I were a rich man."

The third session opened with the 1978 Junior Public Speaking winner, Greg George of Queen Anne's County, giving his prize-winning speech entitled "Recordkeeping." The 1978 Public Speaking winner, Karen Markline from North Harford FFA, gave her prize-winning speech entitled "The Great American Farmer."

The keynote speaker for the third session was Young D. Hance, Maryland Secretary of Agriculture. The Parliamentary Procedure contest was held with Boonesooro, Linganore and Damascus participating.

The fifth convention session opened with the seating of the official Chapter Delegates.

The State FFA Alumni Banquet honoring the 1978 State Agriculturist recipients was held with the Keynote speaker being Woody Cox, Administrative Secretary of the National FFA Alumni Association.

The 1978 Creed contest winner, Patty Durst from the North Garrett Chapter, opened the sixth convention session. The Outstanding Alumni Affiliate for 1977-78 was the Catoctin Area FFA Alumni and the Outstanding Achievement Award was presented to Richard Flickinger from the Linganore FFA Alumni Affiliate. The State FFA Agriculturist Degree was presented to 56 FFA members. Kennita Keeney from the Catoctin FFA Chapter received the Region 3 State Star Agribusinessman award and Debbie Flanigan from the Frederick FFA Chapter received the Region 3 State Star Agriculturist. Debbie also received the State Star Agriculturist. Vespers were conducted by the 1977-78 State Officer Team.

During the seventh, and final session, recognition awards were given for the following: BOAC-Hereford and Boonesboro, Safety-Catoctin and Hereford, State Proficiency Awards-Allen Bassler from Catoctin, third in dairy proficiency, Largest Increase in Membership-Poolesville, Largest Chapter Award-Damascus. The 1978 Honorary State Farmer Degrees were presented to Mr. Louis Ahalt, Dr. Gordon Anderson, Mr. William Burall, Mr. James Chestnut, Mrs. Claire Cox, Mr. Daniel Dunham, Mr. Jow Dymek, Mr. Bert Garrett, Mr. William Goldsborough, Mr. Jack Kilday, Mr. Edward Lippy, Mr. Grove Miller, Mr. Carroll Shry, Mr. F. Harrell Smith, Dr. Herschel Staats, Dr. Larry Stewart, and Miss Lynne Tannenbaum. The parents of all state officers were also given the Honorary State Farmer Degrees.

The Annual Awards banquet was held with Howard Morrison, National FFA Secretary as the keynote speaker. Winner in the American Royal Queen contest, was Debbie Allison, Hereford. In the Parliamentary Procedure contest, Linganore was first, Boonesboro second, and Damascus third.

Southeast Region picks dress revue winners

MEDIA – Four 4-H'ers will represent the Southeast Region at the State 4-H Fashion Revue, August 8, at Penn State University Park Campus. The event will be held during State 4-H Achievement Days.

Gold ribbon winners selected at the Regional Revue, July 27, at the Granite Run Mall, Media, are: Brenda Hausamann, Lehigh County; Elizabeth Kolbe, Bucks County; Julio Santiago, Philadelphia County; Antonella Mastrippolito, Avondale, Chester County. These 4-H'ers will compete with top winners from each of the other eight regions at the State Revue. The state winner will get an expense paid trip to National 4-H Congress in Chicago, in November.

Six blue ribbons were awarded in addition to the 4 gold ones.

Forty-seven 4-H'ers in the Southeast Region took part in the Revue. Each was a county winner and received a certificate of participation and medal of honor. Simplicity Pattern Company, sponsor of the National 4-H Fashion Revue program, provides the awards and the Congress trip.

The Pennsylvania Cooperative Extension Service sponsors the State Fashion Revue program.

Chairman of the regional revue was Carol Munson, Bucks County.

Quality Built to Last Longer

Ag credit bill approved

WASHINGTON, D.C. – U.S. Senator Herman E. Talmadge, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, told the Senate last week that a new multi-billion dollar agricultural credit bill will help farmers snap back from the economic squeeze that triggered last Winter's farm protest.

Speaking in behalf of a House-Senate Conference Committee version of the Agricultural Credit Act of 1978, Talmadge said the legislation will provide new and expanded federal programs to "help farmers cope with disasters -- whether of an economic or natural origin."

The Senate adopted the farm credit conference report last week on a voice vote, thus completing congressional action on the bill. It was approved by the House and now goes to the White House for President Carter's virtually certain approval.

"This is not a cure-all for the problems faced by our farmers and ranchers," Talmadge said. "Nonetheless, it is a major step in providing farmers with a more realistic and more flexible program that is in touch with the times."

The bill includes a new $4 billion loan program for farmers who face bankruptcy or foreclosure specifically as a result of economic factors, such as a general tightening of agricultural credit or an unfavorable relationship between production cost and commodity prices. The economic loan program is intended to complement existing farm credit programs for farmers hit by natural disasters such as flood or drought.

The bill also increases the amounts farmers may borrow under existing Farmers Home Administration (FmHA) real estate and operating loan programs. For the first time, family farm corporations, partnerships and cooperatives would be eligible to participate in these programs.

The bill would also create a special small farm credit program under which low-income farmers who qualify could obtain government-backed real estate at 5 per cent interest.

The bill also expands several on-going Rural Development programs administered by FmHA. It increases the size of grants that rural communities may obtain to build water and waste disposal systems. It also eliminates some of the restrictions that now apply to industrial loans and grants that are available under the Rural Development Act.

Talmadge said changes in the existing law would make emergency relief available to farmers "much more rapidly and with much less government red tape."

"In the past, the emergency loan program could not be put into effect without going through the process of having an entire county declared a disaster," Talmadge said. "Under this bill, the emergency program administered by the FmHA can be made available to individual farmers on a case-by-case basis."

"In short, this is the most significant and far-reaching farm credit legislation to come before Congress in my 21 years in the Senate," Talmadge said. "It will go a long way toward the credit position of our farmers and the quality of life in rural America," Talmadge said.

Hiding Troops

The first smoke screen used for concealing the movement of troops and ships was invented by Thomas Buck Hine The technique was originally demonstrated in public on September 5, 1923, during naval bombing tests off Cape Hatteras, N C

Middleton wins two pulls at Buck

THE BUCK — Tom Middleton of Ridgely, Md. was the only contestant at The Buck Tractor Pulls last week to win two classes. Driving his super-stock International 1066, the weekly competitor from the Eastern Shore drove to victories in the 9000 pound and 12,000 pound events.

Middleton was followed in the 9000 pound class by Marlin Brubaker of Quarryville who drives a powerful Allis-Chalmers D-21. Their respective distances were 264 feet and 234 feet, 4 inches. In the third position was Amos Stauffer of New Holland. Stauffer drove his Deutz 8006 for a distance of 189-3 before the sled got too heavy.

Harry Griest of Coatsville and Galen Spickler of Elizabethtown were the second and third place finishers, respectively, in the 12,000 pound event. Open to both super stock and modified machines, the event was won by Middleton's International with a pulling distance of 293-9. Griest commanded his International 1456 for a distance of 268-2, while Spickler, driving an Allison Aircraft powered rig, was stopped at 258-9.

In the 9000 pound open class, Spickler pulled out all the stops and roared ahead for the full distance of 300 feet. Dave Johnson of Deerfield, N.J. placed second aboard his Ford-propelled machine. It is outfitted with three 427 cubic inch engines. His distance was 239-9. Amos Stauffer placed third at 220-9.

In the 5000 pound modified event, William Almoney of Wrightsville piloted his 429 Ford for the winning distance of 278-5. Close behind him at 273-4 and second place was Eugene Spickler of Elizabethtown. In third place was Charles Brommer of Columbia who drove his MM44 for a distance of 257-1.

Dale Smoker of Cochranville kept the Allis-Chalmers fans happy with his win in the 5000 pound super stock class. He drives the 180 model, as does Jim Brubaker of Quarryville, who finished third in the class. Smoker had a full pull, easily outdistancing second place finisher Coleman Wheatley of Bethel, Del. who commanded his John Deere 4010 for a distance of 276-5. Brubaker was stopped at 211-8.

Two full pulls were seen in the 7000 pound modified class, and that, of course, calls for a pull-off. Duelling for the top spot were Curtis Stoltzfus of Myerstown and Dave Johnson. On their second attempt they ended up with distances of 263-10 and 256-2, respectively. Carl Spickler of Elizabethtown came in third with his effort of 299-8, just four inches short of the full pull.

In the final contest of the evening, Marlin Brubaker brought his big orange A-C D-21 to the spotlight with a crowd-pleasing full pull. Coleman Wheatley roared in for a second place at 275-4 and Amos Stauffer caught the third place with his distance of 265-0.

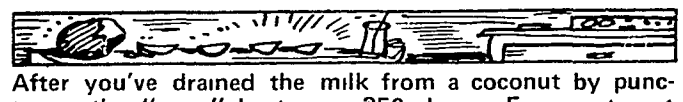
Tractor pulling contests are held here each Saturday evening, beginning at 7 p.m. The tractor pulling stadium is located south of Lancaster on Route 272, just north of The Buck.

Carter may bring in more foreign beef

WASHINGTON, D.C. — President Jimmy Carter, meeting with a delegation of cattle industry leaders last week, would not close the door to the possibility of another increase in meat imports. A 200-million-pound increase in meat import quotas by the White House in June was widely credited with heading off a long-overdue rally in cattle prices. Carter reportedly gave assurances that there would not be another meat quota increase in 1978, but would not make a commitment on 1979. He also assured the cattlemen that there would not be a total suspension of meat quotas or a freeze on retail meat prices "under any circumstances," according to an announcement by the National Farmers Union.

The Carter statement substantiated assurances made by Vice President Mondale at Topeka, Kansas, on July 14, that there would not be price controls on meat and that the Administration had rejected a policy of toally open-ended beef imports such as had been pursued in 1972, 1973, and 1974.

Meantime, in an appearance before the House Agriculture Committee last week, Barry Bosworth, director of the White House Council on Wage and Price Stability, urged that beef import quotas should be lifted entirely — "we don't need them," he said, according to the NFU report, which appeared in their July 28 newsletter.



After you've drained the milk from a coconut by puncturing the "eyes," heat in a 350 degree F oven to get the meat from the shell It'll crack easily and the flesh will have separated

Maryland Secretary of Agriculture Young D. Hance (second from left) was presented with his charter membership certificate for the Maryland Grain Producers Association after the MGPA's first annual meeting held July 24 in Easton. Dr. Earl Butz (on the left), looks on as Association President Milton Malkus of Dorchester County and Vice President Donald Lippy of Carroll County make the presentation. Butz, former U.S. Secretary of Agriculture was on hand to deliver one of his famed agricultural speeches in which he stressed the need for consumers to realize that without profit for farmers, there won't be ample food supplies for people.

MGPA elects directors

ANNAPOLIS, Md. – The Maryland Grain Producers Association, at its first annual meeting held at Easton on July 24, elected a new board of directors whose members represent the state's far flung grain industry.

Milton Malkus, Jr., of Blackwater Farms, Dorchester County, MGPA president announced that the following men were selected as directors for the group:

From the Eastern Shore – Walter West of Princess Anne, Somerset County; A. Morris Todd of Ruthsburg, Queen Anne's County; and Edward C. Fry of Chestertown, Kent County;

From the Western Shore – Phil Brendel of Woodbine, Carroll County; Donald Lippy of Hampstead, Carroll County; Donald McDonald of Harwood, Anne Arundel County; B.B. Kemp of Welcome, Charles County; and J. William Howard Sr. of Frederick County.

Selected as a director-at-large, was Ken Wrightson of Bayshore Foods in Easton, Talbot County.

Ex-officio members are: Allie Messer of Queen Anne's County; John Carouthers of the University of Maryland, and Bradley Powers of the Maryland Department of Agriculture.

Mr. Malkus, also a director, is president and Donald Lippy serves as vice president. Bradley Powers of the Maryland Department of Agriculture serves as secretary to the organization.

MGPA was founded last year to join the many segments of Maryland's grain industry together for the purpose of solving common problems involved with regulation, marketing, transportation, and research. It is open to any Maryland grain producer.

This restaurant serves dinner in the barn

By KENDACE BORRY

MOUNT JOY — There is a new restaurant located in northern Lancaster County between Mount Joy and Elizabethtown. It's found in the country about a mile from Route 283 and it's in the barn.

That's right. The restaurant is really a barn that was formerly used to house livestock and store the hay like any other barn. But since the present owner, Ed Hitz, Elizabethtown R3, acquired it, the rustic structure has undergone quite a few changes.

According to Hitz, it took him just about a full year to redo the barn and create the atmosphere he desired for his restaurant.

"When we started, the barn was falling apart," he commented. "The roof was in pieces and the walls were down, but the timbers were solid. We had to clean out the entire area, and get rid of the troughs and racks."

"Then we had the ground floor dug out to make a lower floor. We remortared the walls but kept all the original stone walls in the barn. And of the lumber seen in the place, I'd say only about $50 of it had to be bought."

Hitz said that most of the work was done by the family, with his father, wife, and children helping him.

The barn now has a false ceiling on the second floor which adds to the atmosphere of the place. The walls have been insulated and the inside walls are lined with rustic lumber that was taken from an old pig stable which was torn down nearby. To add to the picturesque look, shingles which were picked up from around the barn area, line the edge of the walls.

Before becoming the owner and chef of the Country Chef Restaurant, as

(Turn to Page 106)

Seen from the outside, the barn still resembles a building which was once used to house animals and grain.

Stihl® Model SG-17 Mistblower

A multi-purpose power tool which Blows, Dusts, & Sprays liquids and dry chemicals, to control and eliminate weeds. Complete tobacco, worm and sucker control - covers total leaf over and under. Complete fly and insect control in and around barns.

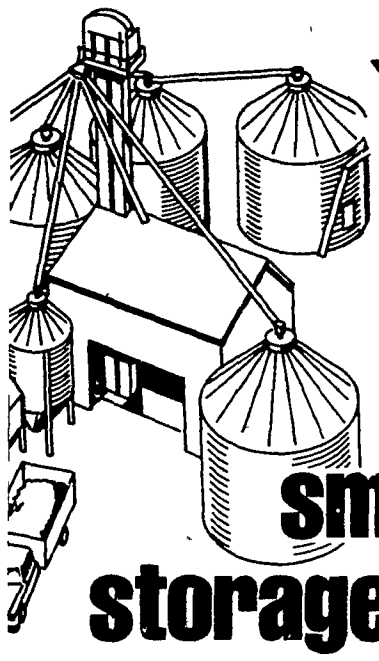
NOW is the time to PLAN, Budget and Select YOUR STORAGE, DRYING and HANDLING SYSTEM.



BAZOOKA®
Feed/Grain Movers

give you a long lasting, smooth running storage system.

Bazooka augers offer a wide range of capacity, choice of drives and accessories for automated grain and feed handling. These matched components make a system that can be expanded. You can be sure the system we design and install will move your grain or feed smoothly, safely . . . and for a long, long time.

In addition to Bazooka Portable augers, we can furnish high-capacity 10" unloading systems for bins to 48 ft. diameter and the new Model GC 101 GRAINCLEAN'R (scalper with cleaner and built-in fines collector). Call for literature and prices.

GRAINCLEAN'R™

BAZOOKA® Model GC101

- Scalps and cleans corn, milo, soybeans, wheat or rice to improve grade and storability.
- Fully enclosed to prevent flying chaff, help control dust and give weather protection.
- 56 sq. ft. of screen can remove 80% of fines in dry corn at 500 bu/hr . . . up to 2000 bu/hr capacity.
- Can be equipped with trailer undercarriage, tow bar and 6" or 8" fill auger which swivels beyond 180° and rides on top of cleaner during transport.

This restaurant serves dinner in the barn

(Continued from Page 105)

the place is known, Hitz entertained in his home for five years, serving French food. But he explained that the hobby was getting out of hand, so he decided to sell his veterinarian practice and go into the restaurant business full time.

His restaurant serves only to those with reservations 24 hours in advance, and he specializes in what he calls a "basic French full course dinner". One menu is served per night and the restaurant is open from Tuesday through Saturday.

Some of the offerings that might be offered throughout the week include roast veal with wine and tarragon sauce, filet of flounder with a white wine sauce, shrimp, and mushroooms, and beef bourguignon.

Hitz told that he tries for a relaxed, elegant atmosphere in his restaurant, making it seem like one is dining in someone's home. The meal will start with an apertif and hors d'oeuvres which are served in the living room area downstairs. There one can wander around sitting in the many chairs and benches or gather around the fireplace in the center of the room.

Then one walks up the wooden steps to the second floor where the soup, main course, and dessert are served at tables for groups of four to ten. The total seating capacity is 60 people.

The living room area on the bottom floor offers a rustic atmosphere which is quietly elegant. The stairs in the foreground lead to the second floor eating area.

One area of the barn's second floor has been completely transformed into a modern kitchen where Hitz prepares his entrees. Stainless steel and bright lights bring out the shine in the room where the raw ingredients become the dinners of the day.

After the dinner,the diners are invited to enjoy coffee and conversation in the living room downstairs again.

Seen from the outside, the white barn trimmed with blue paint really just resembles a rather ordinary barn although a few sharp eyes may notice the lack of the livestock and the parking area towards the rear. But when one walks in the restaurant, the full effect of what can be done with a building is strikingly viewable as the visitor sees a barn where dinner is served to humans.

Ed Hitz, owner and chef of the restaurant, works in the kitchen, preparing the meal for the evening's customers.

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands that when you treat your soil right, it will treat you right Liming is one of the most important factors in keeping your soil in the highest productive range By raising the pH from a level below 6 0 to 6 5 or higher, you can expect to harvest .8 more tons of alfalfa per acre with similar increases for all other forage and cash crops.

Records shattered by Steiger

FARGO, N.D – Steiger Tractor, Inc.'s Panther III PT-350 and Cougar III PT-270 tractors have set four new performance records for current production, 130-plus drawbar horsepower four-wheel-drive tractors at the Nebraska Tractor Testing Station, University of Nebraska-Lincoln.

The Steiger Panther III PT-350 without the optional power-take-off (PTO) produced 311.64 drawbar horsepower (305.48 drawbar horsepower with PTO). The record was formerly held by the Steiger Panther III ST-325 at 281.94 drawbar horsepower.

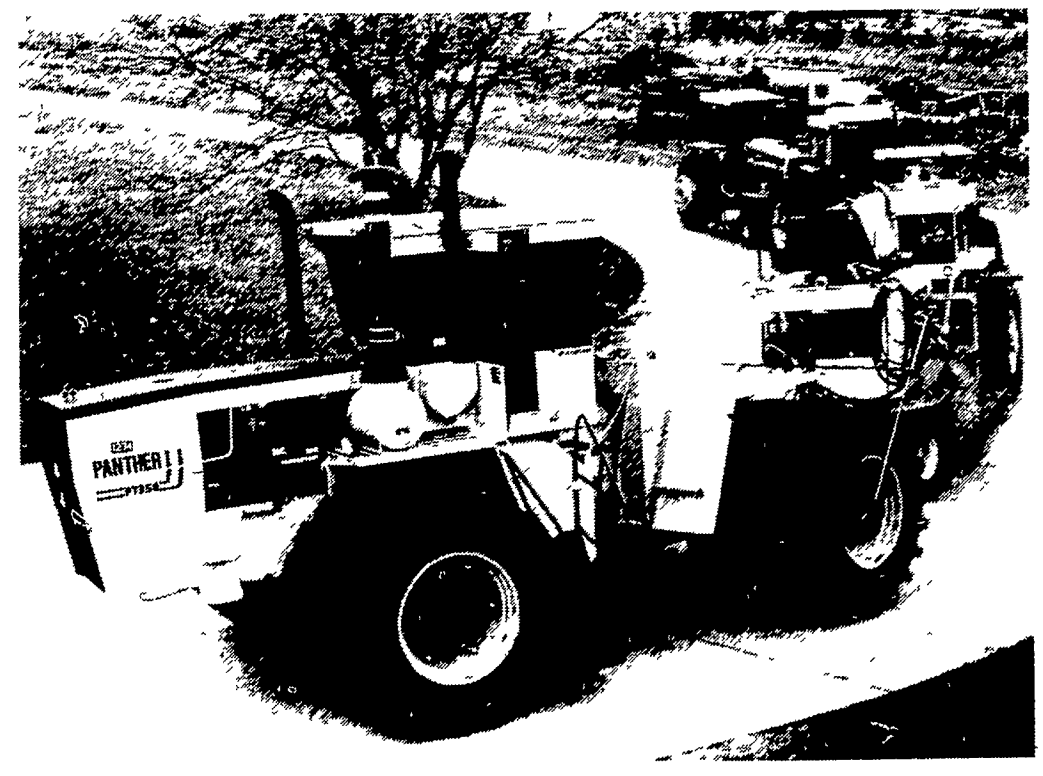
In fuel efficiency, the Steiger Panther III PT-350 without PTO option recorded 15.03 drawbar horsepower hours produced per gallon of fuel, the accepted measure of fuel efficiency. The Panther III PT-350 with PTO placed second at 14.91 dhp hours per gallon. The record was formerly held by the Steiger Panther III ST-325 at 14.82.

The record-setting tractor weighing 34,000 lbs., tested at 32,276 pounds of pull. The record was formerly held by the Steiger Cougar III PT-270, which tested at 30,122 pounds of pull. Nebraska engineers test maximum pounds of pull without exceeding 15 per cent of slippage.

The Steiger Cougar III PT-270 without PTO option tested at 78.0 decibels (78.5 with PTO), bettering the former record among four-wheel-drives of 78.5 decibels held by the Steiger Cougar III ST-250. This portion of the Nebraska test is conducted at 100 per cent maximum power for two hours.

Steiger Tractor, Inc., a leading manufacturer of high-horsepower, four-wheel-drive tractors, is headquartered in Fargo, N.D. Since 1974 Steiger's tractors have held and bettered the records in maximum drawbar horsepower, fuel efficiency, and maximum pounds of pull among current production, 130-plus drawbar horsepower four-wheel-drive tractors. They have also held the records in cab tested sound levels since 1977 among this group.

The Nebraska tests, conducted under uniform conditions on a concrete track, provide objective standards of comparison for tractors produced all over the world. The tests are conducted by engineers in the Department of Agricultural Engineering, University of Nebraska at Lincoln, in co-operation with the Nebraska State Department of Agriculture.



Steiger Tractor, Inc.'s Panther III PT-350 without the power-take-off option has set performance records in maximum drawbar horsepower (311.64 dhp.), fuel efficiency (15.03 dhp hours per gallon of fuel), and maximum pounds of pull (32,276 lbs.), among current production, 130-plus drawbar horsepower four-wheel-drive tractors at the Nebraska Tractor Testing Station, University of Nebraska-Lincoln. The Steiger Cougar III PT-270 without PTO also set a record in the cab-tested sound level category at 78 decibels.

York Co. club plans Aug. events

THOMASVILLE – Yvonne Davidson, a foreign exchange student from Trinidad, spoke on her home life at the July 25 meeting of the Thomasville 4-H Club at the 4-H Center, near Bair. Miss Davidson is staying with the Rodney Eisenhart family, Thomasville R1.

Mrs. Sara Eisenhart, organizational leader, announced that projects should be entered at the 4-H Fair on August 17 from 4 to 8 p.m. and on August 18 from 8 to 10 a.m. in Horticulture Hall on the York Fairgrounds. The Horticulture Building will be open to the public from 2 to 8:30 p.m. on August 18 and from 10 a.m. to 8 p.m. on August 19.

The 4-H Dairy show will be held on August 18 with a Dog Obedience Show scheduled for 7:30 p.m. of the same day. The 4-H Horse Roundup will be held on August 19 at 9 a.m. A Bicycle Rodeo will be held at 10:30 a.m.; pony rides from 11 a.m. to noon; a tractor driving exhibition at noon; a Swine showmanship demonstration at 4 p.m.; a baked goods auction at 6 p.m.; a slave auction at 6:30 p.m. and pony rides from 6 to 7:30 p.m. Food stands will be available.

Now is the TIME to think about next year's garden and lawn equipment, that is, if you want to save MONEY.

Egg menu ideas available to groups

PARK RIDGE, Il. – Exciting new menu ideas are available to egg promotion groups that wish to reach the nation's food service industry with egg-menu ideas.

Distributed nationally by the American Egg Board, the folders are designed to show food service operators that egg dishes are a great addition to any restaurant menu. The kits contain seven new menu ideas featuring eggs and promotional materials useful to the food service industry.

Additional promotion materials include menu clip-ons and table tents, each featuring one of the new menu ideas and "Eggucation Brochures" with clip art for place mats to educate customers about eggs.

Created as a cooperatively funded program with the California Egg Marketing & Research Agreement, sample folders and order forms are being mailed by AEB to state and regional promotion groups and members of the National Restaurant Association who requested them at their recent national convention.

Additional folders and order forms are available from state and regional promotion groups, or directly from AEB for $1 each. The folders contain seven menu clip-ons, seven table tents, four recipe cards/seven recipes and one Eggucation Brochure featuring clip art.

The Piece-of-Quiche, Eggburger, Egg Taco, Eggchilada, Prairie Dog, Kangaroo and Instant Egg Pick-Up menu clip-ons and table tents are available as individual pieces in quantities of 100 for $1.

Each of the four recipe cards: Egg Taco/Eggchilada; Prairie Dog/Kangaroo; Instant Egg Pick-Up/Scotch Eggs; and the Egg Burger; are available for five cents each in any quantity. Complete sets of four cards are 20 cents each.

The Eggucation Brochures which include egg clip art are available for 10 cents each.

Food service folders are made available by egg producers who support the AEB.

4-H'ers go on jr. exchange trip

LEBANON – Eighteen Lebanon County 4-H members and three adults recently returned from a Junior Exchange Trip to Erie County.

The 4-H'ers, 11 and 12 years of age, spent five days with Erie County 4-H families. During the exchange, Lebanon 4-H'ers visited Presque Isle State Park, a fruit farm, Pennsylvania Fish Commission Hatchery, and the Erie Zoo.

According to Patricia A. Krall, Extension 4-H Agent, the exchange program is designed to help 4-H members develop a knowledge and appreciation of other people, their living situations and customs, exchange 4-H program ideas; develop leadership abilities, and develop lasting friendships.

In 1979, Erie County 4-H members will travel to Lebanon County to live with 4-H families and learn about life in Lebanon County.

4-H'ers participating in the Junior Exchange were: Scott Eckenrode, Rexmont; Beverly Bollinger, Fredericksburg; Annette Seyfert, Margot LeRoy, and Wheryl Rogers, Annville; Crystal Bomberger, Jodi Leibich, Jane Krissinger, Joan Lineaweaver, Jodi Kreider, Karen Boyd, Lisa Barry, Tony Allwein, Debbie Lentz, Deborah Bolles, Jonathon Fetter, Jodi Boyer and Sharon Sam. Adults accompanying the group were Linda Eckenrode, Carolyn Fetter and Pat Krall.

Farm leaders visiting Red China

SAN FRANCISCO, Calif. – A trade expansion and fact finding mission of 25 farm leaders from seven states has left for a two-week visit to Red China.

The mission is headed by Allan Grant, president of the American Farm Bureau Federation, and includes two state Farm Bureau presidents.

After a one-night stopover in Tokyo, the mission will continue on to Beijing (Peking), capital city of the People's Republic of China.

During the two-week visit, the farmer-delegates will make stopovers in Shenyang (Mukden), a food and communications hub, and the industrial city of Fushun. Final stop in China will be Kwangchow (Canton), a city with a 2,000-year history and the first in China to trade with foreigners.

While in China, the members of the mission plan to visit with officials in the Ministry of Agriculture and with representatives of various trade corporations that deal in exports and imports.

Grant said the purpose of the mission is to explore new outlets for American agricultural production which far exceeds American consumption. He pointed out that America now exports the production of nearly one out of every three acres of cropland and that China's 800 million people are logical prospects as future customers for the surplus food and fiber America is capable of producing

Egg promotion materials available

PARK RIDGE, Ill. – When the holiday season arrives, egg promotion groups will be armed with a host of information and promotion materials designed by the American Egg Board to show consumers that eggs are a perfect companion for holiday entertainment.

The holiday promotion campaign entitled "Eggs, for great get-togethers," will stress the economy of eggs in dishes which are prepared for holiday season entertaining.

Sample materials and order forms for the campaign have been mailed to state and regional organizations and individual egg producers who use the material in egg promotion, according to Linda Braun, National Promotion Coordinator for the AEB.

Newspaper features, editorials, recipes and other information designed for radio are all included in the new promotion campaign.

Campaign materials are available through state and regional egg promotion organizations or can be ordered directly from the AEB.

Promotion materials created and distributed through the merchandising and promotion program are made possible by egg producer support of the American Egg Board.

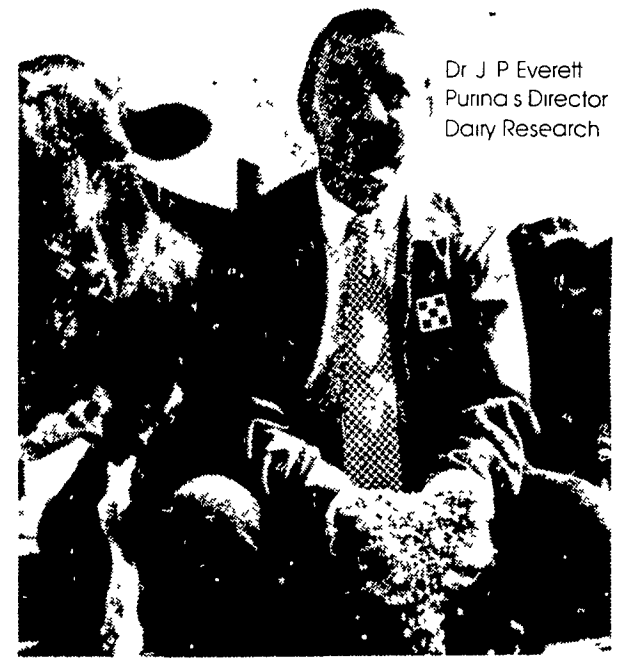
"Test Cow is Purina's Super Energy, Super Value Milking Ration"...



Dr J P Everett
Purina s Director
Dairy Research

"There are lots of so-called 'high energy' milking rations around that claim to have a high energy, high TDN content and at a low cost," says Dr. Everett. "The real measurement of a milking ration's value is the income it produces over feed cost, not the price.

"At the Purina Dairy Research Center, we are proud of Purina Test Cow . . . proud that it is available for America's dairymen. It is truly a "super" high energy ration. In fact, it contains the highest energy and lowest fiber of all Purina milking rations.

"I don't know of any milking ration I would recommend more highly."

Certainly all milking rations are not alike. So don't settle for less than the best. Ask us about Test Cow today.

Bergland says crop insurance stabilizes farm economy

SPARTANBURG, S.C. – Secretary of Agriculture Bob Bergland said recently the administration's proposed program of comprehensive disaster protection will not only compensate farmers who suffer crop losses, but will make agricultural communities more economically stable.

"Disaster protection provides benefits that extend beyond the farm" the secretary told farmers at a meeting at Newberry College, here. "When farmers are assured of repaying at least their cash costs when disaster strikes, the compensation received will be spent in local communities and will strengthen the local economy."

Mr. Bergland said that although the agriculture department's present farm disaster programs are less than perfect, "we have tried to assist farmers who were hard-hit by last year's drought."

To provide comprehensive disaster protection for farmers in the future, the administration has proposed, and Congress is now considering, the Farm Production Protection Act.

The program establishes a new federal insurance plan for farmers that will bring together four separate and overlapping insurance and disaster plans now in existence – the low-yield disaster payments program of the Agricultural Stabilization and Conservation Service (ASCS); the subsidized interest disaster loan programs of the Farmers Home Administration and the Small Business Administration, and the current Federal Crop Insurance programs.

The secretary noted that, if approved, the program will provide farmers with a choice of three levels of protection that will roughly cover from 50 to 90 per cent of production costs.

"When fully operational," Bergland said, "the protection offered farmers under the new program would be twice that available today through federal programs." And we anticipate the cost for claims and administration will be less than the cost of the present four insurance and disaster plans," he said.

Robert Bergland

He said the government role in providing disaster protection to farmers stems from the fact that farming is faced more uncertainties than almost any other sector of the economy.

"Farm income is six times as variable as non-farm income," the Secretary said. "Historically, one out of each 12 acres planted is not harvested because of adverse weather or other natural disaster."

"Farm income is six times as variable as non-farm income. Historically, one out of each 12 acres planted is not harvested because of adverse weather or other natural disaster."

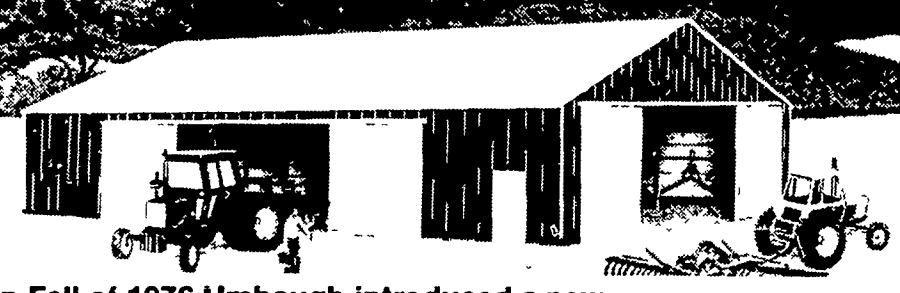
Farm Storage Buildings



In Fall of 1976 Umbaugh introduced a new line of standard machinery storage buildings. The innovations in design, materials and construction methods have made these the best machinery storage buildings available.

These buildings have no frills. When a farmer buys an Umbaugh building, his money is invested in durable materials and sound engineering practices.

Farmers who shop around usually buy from Umbaugh. We invite comparisons of price and quality.

Salute to Ag contest open to FFA

HESSTON, Kansas -- Hesston Corporation, with the cooperation of Hesston Farm Equipment dealers throughout the United States, is sponsoring a contest among members of the Future Farmers of America for their suggestions on a "Salute to Agriculture" which will be developed into a public service message that will be presented during the telecast of the 1978 National Finals Rodeo in December.

Officially sanctioned by the National Future Farmers of America, the contest calls for FFA members to submit in one hundred words or less the message they would like to tell the American public about the importance of agriculture to the economy and standard of living in North America.

The public service message, which will be developed around the first place entry will be initially aired over a special Hesston Rodeo network of about 200 television stations in the United States and Canada.

The FFA member submitting the winning entry in the contest will receive a $500 first place cash prize. There will be four $250 second place winners and ten $100 third place winners for a total prize of $2,500.

The contest is open to any of the 500,000 bonafide, duespaying members of the FFA. Entry forms and rules are available from Hesston Corporation, local Hesston Farm Equipment dealers and the National FFA Center.

All entries are to be mailed directly to Hesston Corporation, Hesston, Kansas 67062, Attn: Salute to Agriculture Contest. Deadline for entries is September 30,1978.

This is the fifth consecutive year which Hesston Corporation and Hesston Farm Equipment dealers have exclusively sponsored the telecast of the National Finals Rodeo. Each year they donate part of their commercial time to a "Salute to Agriculture".

Third Party Totals

Since 1860, there have been only four presidential elections in which all third parties together polled more than 10 per cent of the vote James Baird Weaver and his Populist Party, 1892, Theodore Roosevelt and the National Progressives, 1912, the La Follette Progressives, 1924, and, George Wallace's American Party, 1968

ACP budget cut fought

HARRISBURG -- J. Luther Snyder, Master of the Pennsylvania State Grange, this week expressed his opposition to the proposed reduction in the Agricultural Conservation Practices programs, (ACP).

"The Grange believes that efforts should be made to at least maintain the present figure of $190 million," said Snyder.

Master Snyder went on to say that the Grange would even favor an increase in the appropriations to meet the cost of inflation.

The U.S. Senate Subcommittee on Appropriations in mid-July announced a 55% budget cut in the ACP program.

The proposed budget cut would decrease Pennsylvania's allotment from $4.3 million to $1.9 million.

The ACP is a cost-sharing program to promote better conservation practices at the local level.

Some of the conservation practices funded thus far under the ACP include construction of diversions, animal waste disposal systems, terraces and waterways.

The program allows for cost share levels of up to 90 per cent.

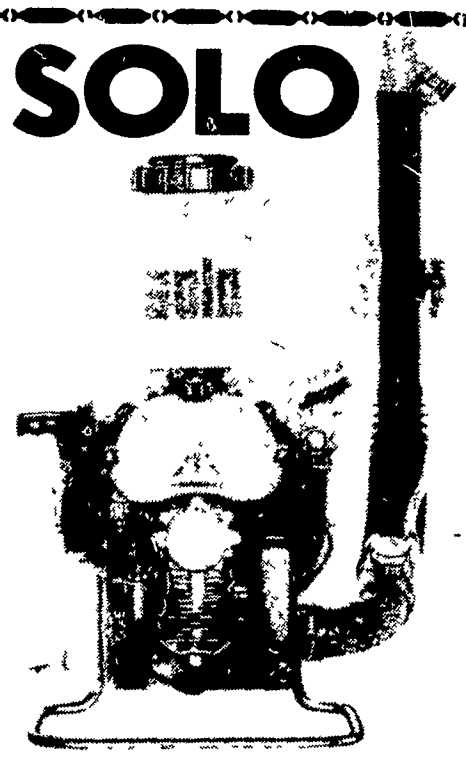
SOLO



JUNIOR 410 MIST BLOWER
Perfect for: Greenhouses, Flower Beds, Vegetable Gardens, etc.

The polyethylene formula tank is reinforced by a steel frame and blow-molded in one seamless, non-corrosive piece.

Contoured design of the entire unit keeps the center of gravity very close to the operator's back. This and the padded back and straps reduce operator fatigue to a minimum, especially as engine vibrations are eliminated by heavy-duty shock mounts.

Capital Region sends seamstresses to state

By JOANNE SPAHR

LANCASTER – Three Lancaster County seamstresses and one York County stitcher will represent the Capital Region in state 4-H fashion revue competition to be held in August at Penn State University. Chosen Thursday from a field of 60 young women representing Adams, Cumberland, Dauphin, Franklin, Lancaster, Lebanon, Perry, and York Counties, the girls will have the opportunity to attend 4-H state days and compete in the statewide sewing contest. Six semi-finalists for the Capital Region were also selected on Thursday as were six junior winners. Only the four gold ribbon seniors are eligible for state competition.

Those four girls are: Robin Esbenshade, the daughter of Mr. and Mrs. LeRoy Esbenshade, Manheim R7; Julie Bare, the daughter of Mr. and Mrs. Robert Bare, Lancaster; Cheryl Gingrich, the daughter of Mr. and Mrs Carl Gingrich, New Holland R2; and Christine DePalmer, the daughter of Mr. and Mrs. Michael DePalmer, Brodbecks Rl.

For her award-winning outfit, Miss Esbenshade, age 17, utilized a Calvin Klein suit pattern and created a three-piece wool ensemble with a velveteen vest. The uneven plain jacket featured a kick pleat in the back and sleeves as well as hand topstitching on the pockets and lapel. The charcoal skirt included a back hand-picked zipper, and the vest featured a back buckle, a side panel, and front button closure.

A light blue gabardine suit was the creation with which Julie Bare earned honors. Miss Bare chose to accent her outfit with a pink blouse.

Her flowing skirt was cut on the bias with inset pockets and a front button closing. The semi-fitted tailored jacket was accented with welt pockets and floys placed on an angle to give variety.

Cheryl Gingrich wore a bamboo colored dress with prints appliqued on the bodice trimmed in brown. The dress tied in the back and had an A-shaped front yoke with a fitted bodice.

An old-fashioned look was the aim of Christine DePalmer. Dark plaid washable wool was the fabric used for an ankle-length gored skirt finished with a Hong-Kong hem and a barrel lining. She utilized a pull-over blouse of poly-blend satin weave fabrics with lace and bows accenting the collar. A velvet vest highlighted the outfit, and for cool evenings, Christine designed a matching unlined stole.

Semi-finalists in the senior division came from York, Lebanon, Dauphin, Adams, and Lancaster Counties.

The list of six girls included: Kathy Whitcraft, the daughter of Mr. and Mrs. Leroy Whitcraft of Loganville; Lisa Yordy, the daughter of Mr. and Mrs. John Yordy, Palmyra; Carole Ebersole, the daughter of Mr. and Mrs. John Ebersole, Lititz R2; Marianne Villa, Hershey; Marilyn Eberly, the daughter of Mr. and Mrs. Eugene Eberly, New Holland R2; and Jan Crouse, the daughter of Mr. and Mrs. Ross Crouse, Gettysburg R8.

Kathy Whitcraft chose jewel green lightweight wool for her three-piece tailored suit. She also designed a matching shawl for wearing over the suit or as an accent to anther outfit. She also made the cream-colored blouse that coordinated the ensemble.

A three-piece ensemble was the winning outfit made by Lisa Yordy. She used printed cotton to make the vest and skirt. The three-tiered skirt featured a back zipper and a set-in waistband. To accent the outfit, Miss Yordy used a matching ribbon.

Carole Ebersole's award-winning suit consisted of a medium brown Donegal tweed fabric made into a

(Turn to Page 113)

These four young ladies will represent the Capital Region in state 4-H dress revue competition to be held in August at 4-H State Days. From left the girls are Cheryl Gingrich, Robin Esbenshade, Christine DePalmer, and Julie Bare.

Runners-up in the senior division of the Capital Region 4-H Fashion Revue were: (seated left to right) Kathy Whitcraft, Lisa Yordy, and Carole Ebersole. Standing are Marianne Villa, Marilyn Eberly, and Jan Crouse.

Selected as outstanding junior division seamstresses during the Capital Regional 4-H Fashion Revue were: (left to right, standing) Judy Weaver, Michele Morrison, and Kathy Ewing. Seated are Wanita Knause, left, and Jane Royer. Sally Bean, front, completes the inverted triangle.

Capital Region

(Continued from Page 112)

skirt and jacket. The semi-fitted short jacket was detailed with three welt pockets, bound buttonholes, and was top-stitched in dark brown.

The blouse and jacket lining gave the outfit a total look since both are styled out of contrasting dark brown polyester fabric. The accompanying blouse features pin tucks and a small pointed collar on the front buttoned-band.

A two-piece suit of 80 per cent wool with a lined, fitted blazer was the award-winning outfit created by Marianne Villa. Miss Villa's jacket featured a pointed collar, shaped lapels, patch pockets, and a back vest. The skirt which accompanied the outfit was a dirndl with soft gathers. Completing the outfit was a rose-colored blouse.

Marilyn Eberly's creation consisted of polyester flannel pants and vest made from Copenhagen blue pin stripe fabric. The unlined vest had patch pockets and bound buttonholes. To match her pants, Marilyn made an off-white bow blouse of polyester crepe. Also part of the ensemble was a polyester gabardine skirt.

Jan Crouse created an Autumn plaid outfit in green, rust, and gold polyester-wool. The ensemble featured a flared plaid skirt complemented with a co-ordinated heather green vest with side belts. Rounding out the ensemble was a soft beige quiana cowl top.

Junior winners included Judy Weaver, Lancaster County; Michele Morrison, Perry County; Kathy Ewing, York County; Wanita Knause, Dauphin County; Jane Royer, Lancaster County; and Sally Bean.

Judges for the event were: Judy Egan, graduate of Messiah College and freelance home economist; Janice Spengler, home economics teacher, Central Dauphin High School. The senior division judges were William Buss, divisional merchandise manager with Watt and Shand; Joanne Ketterer, head of the home economics department of Shippensburg High School; and Anne Bowman, home economist.

The Captial Region revue took place at the Farm and Home Center, Arcadia Road, Lancaster.

Nonfat Dry Milk

Nonfat dry milk is actually a form of whole milk with most of the fat removed. When constituted with water, it can be used in place of whole milk

Earl Rebman honored by Soil Conservation Society

DENVER, Colo. – Earl F. Rebman, a businessman and civic leader in Lancaster, on Thursday night, received the Soil Conservation Society of America's Honor Award for 1978.

Society President A. D. Latornell, of Richmond Hill, Ontario, presented the award to Rebman at a banquet concluding the organization's 33rd annual meeting held here this week.

The Honor Award is given to Society members and nonmembers for significant contributions in the field of natural resources conservation.

Rebman was cited for his dedicated involvement in preservation of historic sites, for founding and contributing extensively to the Conestoga Valley Association, and for his commitment to improving parklands and the environment of Lancaster.

A native of Lancaster, Rebman owns the Rebman Candy Company. He has been active in civic affairs and the Lancaster Chamber of Commerce for decades. He was a leading force in the creation of the Baker Plan for development of urban Lancaster in the late 1940's and creation of the Conestoga Valley Association, a group formed in 1956 to improve the environmental quality of the Valley. He served as treasurer of the Association from its formation until 1969. He campaigned actively and worked with the U.S. Department of Interior to change the name of Conestoga Creek back to its original Conestoga River.

Rebman has worked tirelessly for creation of park areas throughout Lancaster County. He has also been the leading force behind the preservation of many historic sites in the town, including the Andrew Ellicott House, the house where William Clark planned much of the Lewis and Clark Expedition.

Rebman is also author and publisher of **The Conestoga River Watershed Outline of History 1710-1973** and **The Wagon That Rolled Uphill**, an autobiographical account of the history of Lancaster.

Honored many times for his civic work, Rebman received the Lancaster County Soil and Conservation Award in 1965, the Conservation Award of the Red Rose Chapter of the Izaac Walton League in 1967 and the Superior Achievement Award presented by the U.S. Environmental Protection Agency in 1975.

The Society is a private, nonprofit association of professional conservationists dedicated to advancing the science and art of good land use. It has about 15,500 members in the United States, Canada, and 80 foreign countries.

The theme of this week's annual meeting was "Resources for Food and Living: Land, Water and Energy."

Ironing making a comeback

YORK – As more natural fibers move into the fashion scene, ironing is becoming more necessary than before. Many all cotton, cotton blends and permanent press garments will need touch-ups with an iron to keep them neat and fashionable, points out experts.

If one is planning to buy a new iron, she should consider a steam iron that allows for water sprays and bursts of steam. Such an iron may cost more than the conventional steam iron, but one can do quicker, easier jobs with it.

The water spray feature can be used to dampen cotton fabrics with just a press of the water spray button. Bursts of steam help set trousers creases or can be helpful in removing stubborn folds and wrinkles.

Non-stick and stainless steel soleplates glide smoothly while resisting lint and starch build-up better then aluminum soleplates. If the iron has a non-stick soleplate and needs cleaning, one can turn off the iron, unplug it and allow it to cool. Then use a damp cloth to remove any spots. Never use an abrasive cleaning substance. Clean aluminum soleplates with a spray-and-wipe type of cleaner. A baking soda and water paste can be used to clean stainless steel soleplates.

Self-cleaning irons have overcome most of the problems of mineral buildup from hard water If one uses her iron often, it's still wise to use distilled water.

After using a steam iron, one should drain all remaining water from the iron while it is still hot. The heat from the iron will complete the drying inside.

One should use her iron carefully. A person should not iron over pins and be careful around buttons, snaps, zippers, and other fastners.

If using press-on interfacing or a fusing agent, any scraps of it should not beleft on the ironing board where the iron could accidently touch them

With the new features on steam irons and with proper care given to one's iron, a person will be ready to iron the natural fibers now popular on the fashion scene.

Lancaster Co. members chosen at PAFC

SHIPPENSBURG -- Scholars from the Lancaster County Coop Council did well at the recent Pa. Association of Farmer Cooperatives Institute held at Shippensburg State College. During the four day institute held between July 9 and 12, three members of the Lancaster county group were selected to attend the American Institute of Cooperatives in Montana. Selected to attend AIC were Maxine Messner, Tony Eberly, and Jeff Delong. Martha Gregory was selected as an alternate.

Selection of AIC scholars was based on the demonstrated leadership of the individuals while at the institute, a quiz score on cooperatives, and the activities that the students did in their local, county or state area. Major emphasis for the selection is given to the amount of involvement at the local area before anything is considered at the institute.

Maxine Messner is a senior at Garden Spot High School and is the daughter of Mr. and Mrs. Ron White of Leola. Maxine was also honored as the Outstanding Female Leader at the institute as voted upon by the 225 scholars in attendance.

Tony Eberly is a member of the Indiantown Mennonite Church. He is the son of Mr. and Mrs. Mahlon Eberly of Denver R2 and will be a senior at Ephrata Area High School.

Jeff Delong will be a senior at Solanco High School. He is the son of Mr. and Mrs. Henry S. Delong of Peach Bottom R2.

Martha Gregory is the daughter of Mr. and Mrs. Robert Gregory Lititz R1.

The scholar staff in charge of the institute was represented by two Lancaster County members. Randy Ranck served as co-chairman of the institute and June Grube helped with Group Singing, picture taking, and Vespers service.

Jay Irwin of the Extension Service provided his expertise as Leadership and Awards Chairman.

The individuals that attended as scholars from the Lancaster County Coop Council were selected as a result of a Coop Career Day activity held in April and sponsored by the members of the Lancaster County Coop Council. The activities involved members from schools throughout the county taking a quiz on cooperatives after being informed about coops. The individuals scoring high on the quiz were then given activity folders to fill out. These folders were then given consideration along with the quiz scores to decide who represented the county at Shippensburg.

The Lancaster County Coop Council is only one of many that make up the whole Pa. Association of Farm Cooperatives. PAFC serves as an educational and promotional as well as research organization. It pays the expense of the students that attend the conference at Shippensburg and to the AIC institute.

NFU says 30% wheat set-aside for 1979 allows ample carryover

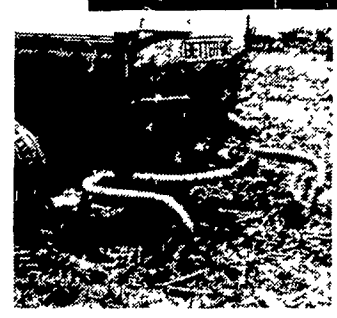
WASHINGTON, D.C. – A 1979 national program acreage for wheat of 40 million acres, together with a set-aside of 30 per cent would help trim the excessive old-crop carryover but still leave ample reserves for export and domestic use, National Farmers Union recommended last week. Submitting its views to USDA on wheat policy for 1979, Farmers Union said it would be urgent to more nearly balance production and consumption in the 1978-79 marketing year.

The NFU recommendations noted, based on the favorable 1978 crop prospects and the likely domestic and export demand, that the old-crop carryover on June 1, 1979, is likely to be about 1.3 billion bushels, the highest since 1961.

With a national program acreage of 40 million acres and a set-aside of 30%, 1979 production would still be large enough to assure a carryover on June 1, 1980, of about 950 million bushels. (Export use is projected by NFU at 900 million bushels and domestic consumption at 650 million bushels.)

Farmers Union recommended that payment be made on set-aside on a flat rate basis and declared itself in opposition to a plan under which producers would have to submit on the payment rates they wished on the diverted acres. Such a bid procedure would tend to favor absentee landowners as against family farm operators, NFU said.

WHAT'S NEW



REAR MOUNT MANURE INJECTION SYSTEM

This new rear mount liquid manure injection system features larger hoses and wider shanks than most injectors for faster, more even flow of manure in soil 10 inches to 14 inches deep, says the manufacturer.

Manure flows through three inch hose to the injector at the bottom of a two inch shank. Injection depth is controlled by a hydraulic cylinder.

Injection system operates in normal soil conditions. Spring teeth are recommended for rocky soil. Optional 17 inch coulter is available with either the standard or spring tooth injection system.

This soil injection system reduces the amount of commercial fertilizer required while minimizing surface runoff and pollutant problems.

Tag-a-long system attachment is available for all "Better-Bilt" spreaders.

Complete information is available from The Pearson Bros., Co., Box Z, Galva, Ill. 61434.

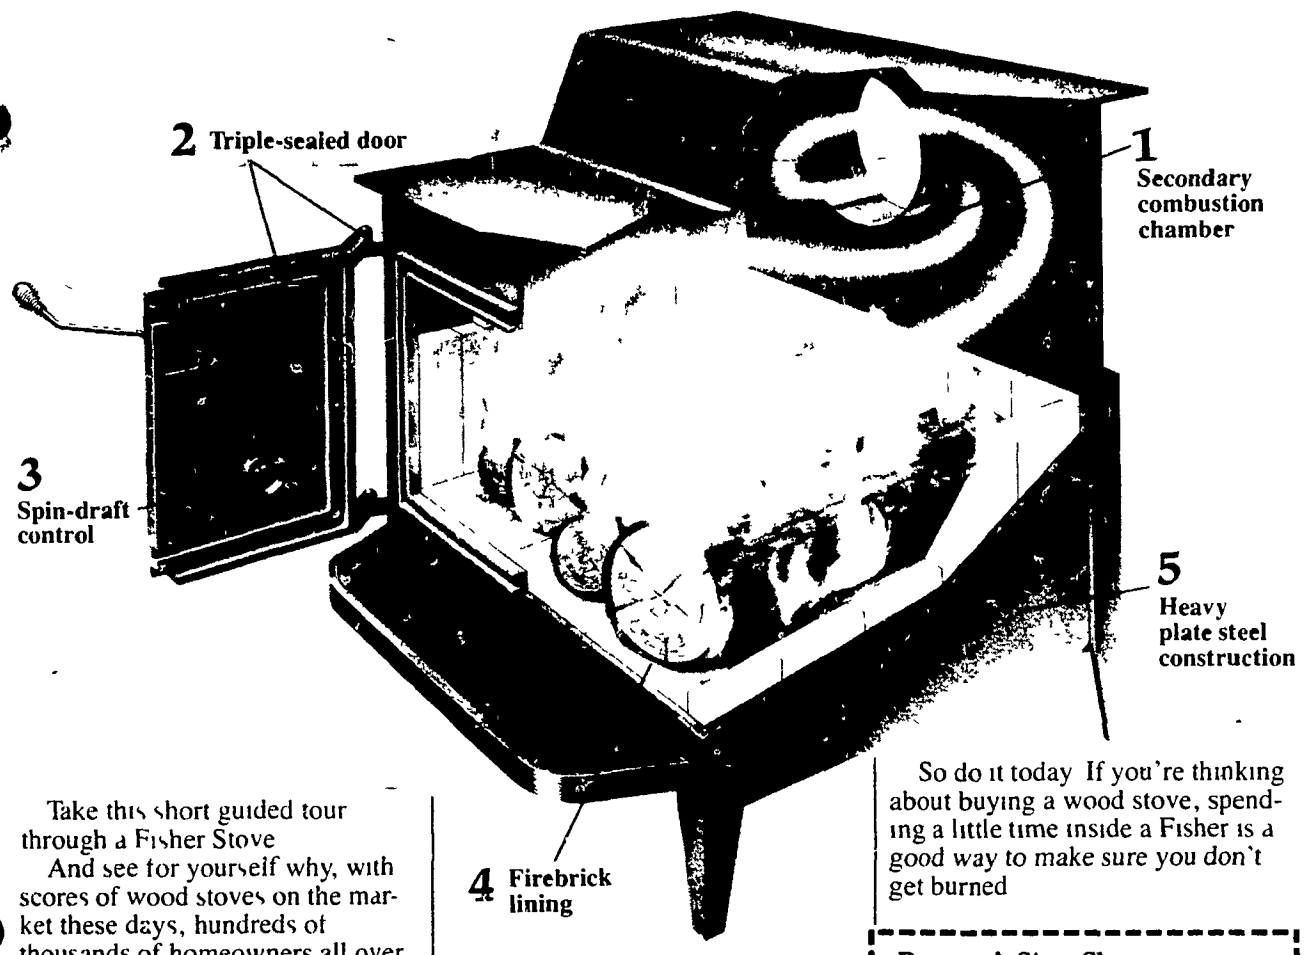
Before you buy any stove, spend a few moments inside a Fisher.



Take this short guided tour through a Fisher Stove

And see for yourself why, with scores of wood stoves on the market these days, hundreds of thousands of homeowners all over have chosen the Fisher

1 Let's start at the heart of the flames for a close look at the unique secondary combustion chamber Notice how this unusual two-step design swirls volatile gases back into the flames?

This action recaptures up to two-thirds of wood's energy value, instead of wasting it up the flue Which means wood burns almost completely, leaving very little ash

2 Moving on down to the heavy duty cast iron triple-sealed doors, observe that there's no asbestos gasket to wear out

3 And see the patented spin-draft controls? They let you regulate almost completely the amount of air that gets to the fire

Open them up for more heat Or shut them almost all the way for a cooler, longer-lasting fire

4 On your right, see how the Fisher firebox is lined with firebrick to eliminate burn out?

5 And look at that solid steel construction This stove isn't flimsy like some, it's heavy-duty 1/4" and 5/16" mild steel plate throughout

While this short tour can't go into every detail, we've got a full color brochure that does It shows off all the Fisher Stove models, complete with dimensions, heating capacities, and more And getting a copy is as easy as sending in this coupon

So do it today If you're thinking about buying a wood stove, spending a little time inside a Fisher is a good way to make sure you don't get burned

Cumberland County DHIA Monthly Report

JUNE 1978

Cumberland County Dairy Herd Improvement records show that 8,464 cows in 138 herds were on production testing in June according to Duane G. Duncan, County agent. Of the 109 herds on DHIA, 60 herds had an average fat production of 150 pounds per cow per day for the month. During the month 149 cows completed their 305 day lactation with 600 pounds of butterfat. DHIA supervisors working with the diarymen to improve efficiency include Mr. Harold Boldosser, 130 Old Gap Road, Carlisle, Mrs. Diane M. Cain, Box 277, Newville and Mr. Jay Zeigler, Carlisle R1.

4-H fashion revue

Award winning seamstresses chosen by York Co.

By JOYCE BUPP
Staff Correspondent

BAIR – "You sound just like a frog: Rip it! Rip it! Rip it!."

That's what one 4-H'er told her mother recently as the youngster hurried to finish her project garment in time for the annual York County 4-H Dress Revue, held July 20, at the county 4-H Center.

About 130 girls took part in the judging and then selected their own choices from fellow contestants to take part in the style show that capped the day-long roundup.

Eight senior and three junior winners were selected to represent the county at the regional competition.

Among the senior winners was Charla Janney, of Brodbecks, who was a regional winner last year and competed at statewide judging. She is the daughter of Mr. and Mrs. Baldwin Janney and has carried sewing projects for six years through the Jefferson Club.

Dark brown velvet was the fabric chosen by Charla for her blazer and vest, lined with a soft brown striped designer fabric and featuring self-fabric buttons and bound buttonholes. A plaid A-line skirt picked up the brown theme and set off the ruffled soft blouse styled by Charla from a silk-like fabric.

Also headed for regional competition for the second consecutive year is Kay Swartz, of Hanover R2. Kay chose a floral print for her loose fitting dress, with the bodice gathered onto the shoulder seams and around the collar. The skirt was gathered onto back and front hip yokes and sleeves were gathered onto button bands with plackets. Topping the dress was a semi-fitted unlined beige jacket, with notched collar and finished by the Hong Kong method with the matching dress fabric. A 10-year sewing competitor in 4-H, Kay is the daughter of Mr. and Mrs. Ray Swartz and belongs to the Hanover Club.

Looking ahead to Winter's cold blasts was Jaonne Haskins, who created a red jacket and jumpsuit of aspen cloth, a quilted nylon fabric. The wintry-weather sports outfit featured a contrasting blue and white yoke and closed with a separating zipper for ease in wearing. Accessorizing the snug-looking garment was a pair of ski boots.

Rust-colored corduroy was the fabric selected by Stephanie Lehr for her gathered skirt and reversible plaid vest. Accenting the outfit was a cream peasant-type blouse with angel sleeves and a rust-color scarf. Stephanie is a seven-year veteran of 4-H sewing projects and is the daughter of Mr. and Mrs. Gary Lehr, Spring Grove R2.

Beth Schneider, daughter of Mr. and Mrs. George Schneider of Wellsville, selected an outfit in the popular peasant theme. Her off-white blouse featured a drawstring top and long raglan sleeves; the matching skirt was styled of three tiers of gathered fabric. Beth has carried the sewing project for six years with the Dillsburg Club.

A three-piece wool suit shown by Marisa Trefry included a two-button lined blazer and vest in dark brown, setting off the plaid A-line flared skirt of brown, tan, and rust. Suede elbow patches and patch pockets set off the blazer and the vest featured side tabs. Marisa chose rust boots to complement the winning garments. She is the daughter of Mr. and Mrs. Kevin Trefry of York and has been a 4-H sewing competitor for four years.

Kathy Whitcraft, daughter of Mr. and Mrs. Leroy Whitcraft of Loganville, chose jewel green lightweight wool for her three-piece tailored suit. The semi-fitted lined jacket was topstitched and styled with a notched collar. A yarn-fringed matching shawl was designed by Kathy for wearing over the suit or as an accent to another outfit, and she made the cream-colored blouse that coordinated the outfit. A member of the Loganville Club, Kathy has carried sewing projects for four years.

An old-fashioned look was what Christine DePalmer aimed at in creating her winning coordinated outfit. Dark plaid washable wool was the fabric used for the ankle-length gored skirt, finished with a Hong-Kong hem and a barrel lining. Her

(Turn to Page 122)

Winning in the senior category were, standing from left: Beth Schneider, Kathy Whitcraft, and Charla Janney. Seated is Christine DePalmer.

Also included in the senior regional entrants are Marissa Trefry, seated, Kay Swartz, standing left, and Stephanie Lehr.

Make yours a one-man haying operation: Now Sperry New Holland offers you two round balers!

Easy hay!

Sperry New Holland Model 845 AUTO-WRAP® Round Baler.

- Wraps each bale automatically
- Fast! You get up to 18 extra bales a day
- Steel chains, not belts, get you off to a fast, sure start on bale after bale
- Makes the "little" round bales weighing up to 850 pounds

See the 845 AUTO-WRAP today

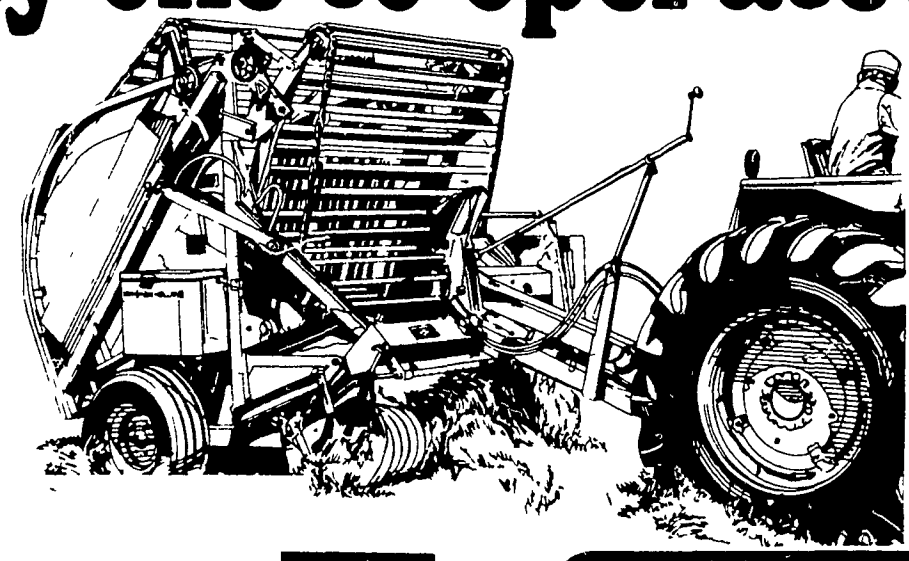
The easy one to operate:

Sperry New Holland Model 850 Round Baler.

You get off to a good fast start on bale after bale in a wide variety of crops even straw when these exclusive features work for you

- Steel apron chains not belts produce a good strong rolling action
- Super-Sweep pickup gets hay ordinary pickups miss
- Wedge-shaped core formation chamber starts hay rolling immediately for each new bale
- Tapered sides at entrance to bale chamber help fill in the ends of each bale for better bale shape

See how easy it is . . ask for a demonstration today.



And remember, they're backed by the SPERRY NEW HOLLAND parts system.

The easy way to handle big round bales!

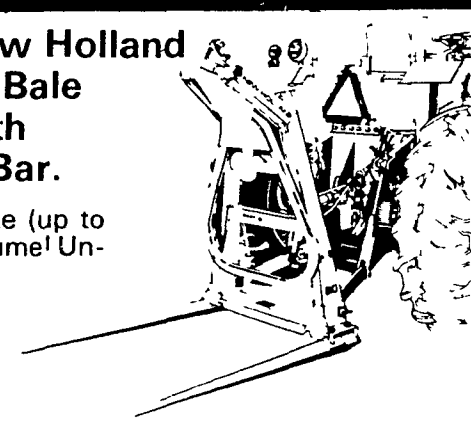
Sperry New Holland Model 85 Bale Handler.

Picks up, carries, and unloads four big round bales at a time! Moves up to three tons of hay per load!

The easy way to move big round bales!

Sperry New Holland Model 80 Bale Mover With Push-Off Bar.

Moves one bale (up to 1500 lbs.) at a time! Unloads at heights up to five feet, depending on tractor model



If round bales suit your needs best, make sure you check with your Sperry New Holland Dealer listed on the facing page.

When it comes to baling, the NEW HOLLAND name is your best bet!

SPERRY NEW HOLLAND

(Continued from Page 120)

elegant pull-over blouse was of poly-blend satin weave fabrics with lace and bows accenting the collar, Venetion lace in the sleeves and tiny hand tucks in the yoke and sleeves. A velvet vest with rows of silver buttons accented the outfit; and for cool evenings, Christine had designed a matching unlined stole cut on the bias.

The daughter of Mr. and Mrs. Michael DePalmer, Brodbecks R1, Christine had sewed six years with the Jefferson Club.

Repeating as an entrant in the regional junior competition is Kathy Ewing, daughter of Mr. and Mrs. Neil Ewing of Dillsburg R1.

A three-piece skirt, vest and blouse was Kathy's selection, with the skirt and vest styled from washable wool and lined. Slight waistline gathers and pockets accented the skirt, and the vest featured a notched collar and button-trimmed patch pockets. Coordinating Challis print paisley was used for the blouse, detailed with front tucks, a Peter Pan collar and long sleeves gathered into cuffs. Kathy has sewed for six years with the Dillsburg Club.

Renee Lehman choose a natural wool fabric in a rich rust color for her fully-lined, straight-legged pants and matching vest. She is the daughter of Mr. and Mrs. Rolla Lehman, Dillsburg R3, and is in her fifth year of sewing project work.

Amy Gingrich of Fulton Avenue, Stewartstown, was selected for the junior regional competition with only two years of sewing experience through the Stewartstown Club.

Her cotton-polyester skirt and matching self-lined vest were created from peach-colored fabric. Amy is the daughter of Mr. and Mrs. Donald Gingrich.

Senior category judges were Joan Lamberson, former York county Extension home economist, and John Genoa, Jr., who has been active with the Miss Hanover pageant.

Mary Ellen Schmidt, a teacher at the University of Delaware, and Anna Mae Bolton, home economics teacher at Dover Area Schools, judged the junior entries.

Narrators of the afternoon style show were Kay Swartz and Christy Waltersdorff. Slides of the 1977 Dress Revue were shown by 4-H photography enthusiast Joey Welsh.

Junior winners of York County's 4-H dress revue were Renee Lehman, seated, Kathy Ewing, left, and Amy Gingrich.

Soybean convention set

HUDSON, Iowa – U.S. soybean growers will discuss soybean marketing, production and governmental activities during the American Soybean Association's national convention in Chicago August 12-15.

"American soybean growers, through their state and national associations and their world-wide market development programs, have made soybeans the number one cash crop in the U.S. and the nation's leading farm export," said Nick Rose, ASA president and a soybean grower from Roseland, Ark. "As a result of these efforts, the 1977 soybean crop was valued at about $10 billion with nearly $6 billion going to countries around the world. Under the theme of 'Sowing for a Golden Harvest,' this year's ASA national convention will bring together about 1,500 soybean growers, wives and children who will discuss our continuing efforts in market development, research and government relations."

Registration for the ASA convention begins Sunday, August 13 in the Palmer House Hotel in Chicago.

Auto Service Tips

Electronic ignition systems eliminate breaker points and condensers substituting magnetic components that trigger the system for secondary voltage But, some components of the electronic system are the same as the conventional ignitions, which means that maintenance requirements are virtually the same. Periodic maintenance will assure better starts and service

Ayrshire leads state

BRANDON, Vt. – Foothill-Acres Prides Lilly, a registered Ayrshire owned by Warren A. Schmuck, Peach Bottom, recently completed a lactation record which ranks highest for milk for all yearling Ayrshires in the state of Pennsylvania.

Lilly's record of 14,200 lbs. of milk and 523 lbs. of butterfat, actual, was produced entirely on a twice-a-day milking in 305 days. This official DHIR record was supervised by the Division of Records of the Ayrshire Breeders' Association, Brandon, Vt. and the Penn State.

Lilly has an unusually persistent lactation record, having a daily average of 47 lbs. of milk and 2.0 lbs. of butterfat.

Chester County DHIA Monthly Report

Robert Pepple of Oxford is owner of this month's high producing cow, a 12-year old Holstein which churned out 21,577 pounds of milk with a 5.1 per cent test and 1098 pounds of butterfat. Second high on the butterfat list went to a cow in the Jacob Stoltzfus herd. Pearl, aged 5 years and nine months at the start of her lactation, finished her record with 25,977 pounds of milk, a 3.9 per cent test and 1003 pounds of butterfat. She was the high cow for milk production for the month.

Lebanon Fair starts tomorrow

LEBANON -- The management of the Lebanon Area Fair is continuing to build on variety, attracting crowds for everything from cattle shows to tractor pulling contest and square dances to dog obedience shows.

This year's annual extravaganza gets underway tomorrow with a ham barbeque that's to come off the fire at 11:30 a.m. It'll be served until 2 p.m. The rest of the day will be devoted to musical entertainment and a vespers service which begins at 7 p.m.

Located two miles south of Lebanon Plaza, at Cornwall and Evergreen Roads, the Fairgrounds will be open daily through next Saturday. On tap that day will be the 4-H Market Hog and Lamb Sale at 1:30 p.m. and a demolition derby at 7 p.m. There's a $3 admissions charge for the latter event.

There'll be a $1 parking fee imposed on Monday, Tuesday, Wednesday and Friday, but it will be waived for senior citizens with I.D. cards. Some of the other events which will involve a small admissions fee include the county tractor pull on Monday and the state sanctioned tractor pull on Friday. Children under 12 years of age will be admitted free of charge. Rides for the youngest and youngest at heart will be provided by Oscar's Amusements.

FFA'ers and 4-H'ers will be competing daily with their projects and animals, with Tuesday and Wednesday carrying the heaviest slate of activities for the farm youths.

A complete schedule of events follows:

Sunday AUGUST 6

Ham barbeque 11:30 a.m.-2:00 p.m.; Vespers 7:00 p.m.

Monday AUGUST 7

Judge Exhibits; Dairy Goat Show 4:00 p.m.; Building Exhibits open 6:00 p.m.; County Tractor Pull (local) 7:00 p.m. $2.00 adults (12 & over).

Tuesday, AUGUST 8

Country Velvets 8:00 p.m.; FFA & 4-H Dairy Show (type) 9:00 a.m.; FFA & 4-H Livestock Judging Contest 10:00 a.m.; Dog Obedience Show 6:00 p.m.; Shorty Long & the Santa Fe Rangers 7:30 - 10:30 p.m.; County Lawn & Garden Tractor Pull 7:00 p.m. ($1.00 everyone).

(Turn to Page 126)

"Come to the Lebanon Fair" is the invitation these calves are extending to all who enjoy wholesome country fun and excitement.

Flemington County 4-H'ers ready for their annual Achievement Fair

FLEMINGTON, N.J. – It'll be cows 'n' kids and much more at Hunterdon's 4-H Achievement Fair, set for Wednesday through Saturday, August 9-12, at the Flemington Fairgrounds. There are loads of activities scheduled to interest everyone.

There'll be a horse show held on Wednesday, along with twirling competition, a vegetable and flower show, the annual dairy goat show, seeing eye dogs. The Wednesday schedule is capped off by a chicken barbeque at 5 to 7 p.m., and square dancing for all at 8.

The activities set for Thursday include a competition for youngsters 9 to 13 years of age, in what the 4-H leaders have labelled "groom and clean". Participants will be divided into teams of four. Each team will have two hours to groom and clean one pony. At the end of this time, ponies will be judged in a grooming and showmanship class, competing for awards.

The 4-H prep clubs have a number of events scheduled. Also on Thursday, the County 4-H Sheep Show and Rabbit and Poultry Shows will be held.

The Fairgrounds will be invaded by Holstein cows and calves on Friday as the Central Jersey Holstein Association conducts its annual show. This is a big event for the Holstein breeders and 4-H youth involved in dairy projects. It's anticipated that some 120 or more head will be exhibited. It's been interesting to note over the years that youth generally out-numbers the seniors. And, often 4-H youngsters place at the top of the classes with their entries.

The Holstein show begins at 10 a.m. and concludes about 4. Emphasis is on youth as many trophies and awards, including a registered Holstein calf, will be presented during the day.

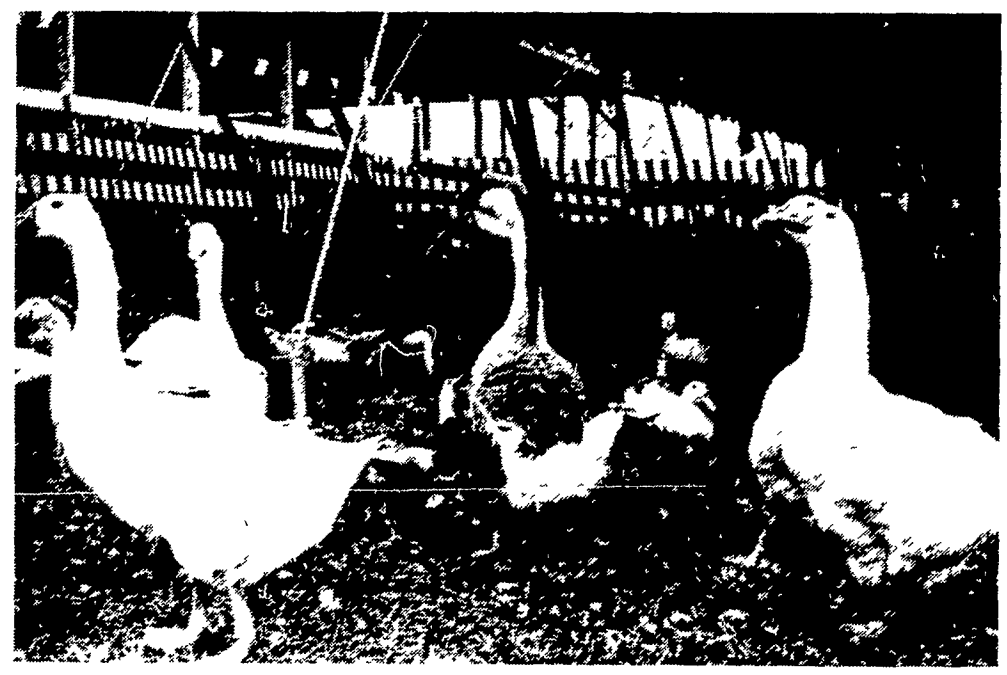
Also scheduled for 10 a.m. on Friday will be the Tractor Rodeo. This is an activity of the 4-H Tractor Club. At 7:30 p.m., the 4-H Queen and Escort Contest will be held at the Extension Center. A queen and escort will be selected to reign at the many 4-H and other functions scheduled throughout the year.

The County 4-H Beef and Dairy Shows will be held beginning at 10 a.m. on Saturday. These shows are planned and conducted by the respective 4-H Beef and Dairy Councils. Judging is based on conformation and fitting and showmanship.

All activities at the Fairgrounds will be held under a 40 x 240 foot tent. So, it's "rain or shine". Admission is free for any of these activities with the exception of the chicken barbeque. Barbeque tickets can be purchased in the 4-H office, Extension Center. The 4-H office also has a detailed shcedule of events.

If you're interested in what youth are doing in the very many 4-H projects and activities, this would be a great opportunity to see them in action. A lot of work goes into planning and scheduling of events. But, nothing like the hours put in by the youth fitting and preparing their animals for competition.

It is well to note that in addition to the youth, families, and leaders, several organizations lend real support to the 4-H Achievement Fair. Big contributors are the Flemington Fair, Hunterdon Pomona Grange, the Flemington National Bank, Hunterdon County Board of Agriculture, and the Central Jersey Holstein Association.



If geese and other feathered friends are what you're interested in, there'll be plenty of them at the Lebanon Fair.

Holsteins classified

BRATTLEBORO, Vt. – Joe Schwartzbeck of Peace & Plenty Farm, Union Bridge, reports that his Registered Holsteins were classified for body conformation in July. The scoring was done by an official classifier of Holstein-Friesian Association of America, Brattleboro, Vermont.

Dairymen enrolled in this herd improvement program receive a numerical score for each animal evaluated. The True-Type Holstein represents theoretical perfection and has a value of 100 points on the classification score card.

Including animals previously scored, the Schwartzbeck's herd has three Excellents, 22 Very Goods and 38 Good Pluses.

The information from the classification of the herd will be summarized by the Holstein Association on its high speed computer. Returned to the breeder, these reports provide useful information for selection in the herd. The data is also published and available as reference for the herd improvement programs of Holstein dairymen everywhere.

Fish and wildlife proficiency award gets sponsor

NEW YORK, N.Y. – The National FFA Foundation, Inc., has announced the signing of a Memorandum of Agreement for sponsorship of the Future Farmers of America Fish and Wildlife Management Proficiency Award by Philip Morris Incorporated.

The fish and wildlife management award is one of 22 FFA proficiency award programs recognizing achievement in activities related to studies in vocational agriculture. The award is presented to FFA members who have made significant achievements in the application and knowledge gained in the vocational agriculture instruction program.

To earn the FFA award, students must show how they have been involved in conserving, protecting, and encouraging the growth and development of fish and wildlife. The award recognizes students for initiating good fish and wildlife management practices. In addition to their involvement in fish and wildlife management, applicants for the award must also show their involvement in FFA and leadership activities.

As sponsor of the FFA Fish and Wildlife Management Proficiency Award, Philip Morris Incorporated will provide funds for the annual awards consisting of certificates, plaques, and cash awards.

All members of the FFA who complete activities in fish and wildlife management as part of their vocational agriculture training are eligible to apply for the award. Awards are presented at the local level in the form of a medal. At the state level, the first place winner receives a plaque and a check for $100. State winners then compete for national recognition in each of the four FFA administrative regions where the regional winner earns a check for $250 and a plaque plus partially paid travel expenses to the National FFA Convention in Kansas City, Mo. Here his or her fish and wildlife management activities are judged against winners from each of the three other regions. During the national FFA convention a plaque and a check for $500 is presented to one of the four regional winners judged to have made the best use of their knowledge and technical skills in fish and wildlife activities.

Pa. Grange claims dairy farmers losing money on milk

HARRISBURG – Dairy farmers in western Pennsylvania are losing an estimated $1.00 a hundredweight on the milk they produce according to a statement by the Pennsylvania State Grange.

"By June 30 of this year, the cost of producing milk rose to $10.99 a hundredweight. The price received for milk by commercial dairymen in the Pittsburgh Milk Shed in May was $9.99 a hundredweight."

This inconsistency was pointed out by G. Duane Fralick, a member of the Pennsylvania State Grange Dairy Committee, to the Milk Marketing Board at its Area 5 hearing in Sharon recently.

The purpose of the hearing was to establish minimum producer, dealer and consumer prices for milk in Area 5.

Area 5 consists of all the counties from the Ohio border east to Warren County and south to the Maryland border.

"The Grange recognizes the fact that financial problems are worsening for Pennsylvania dairy farmers and that continuation of present trends could eventually adversely affect milk supplies," said Fralick.

Fralick cautioned the Board that it was a mistake to consider only producers' or consumers' problems, or those of any separate group.

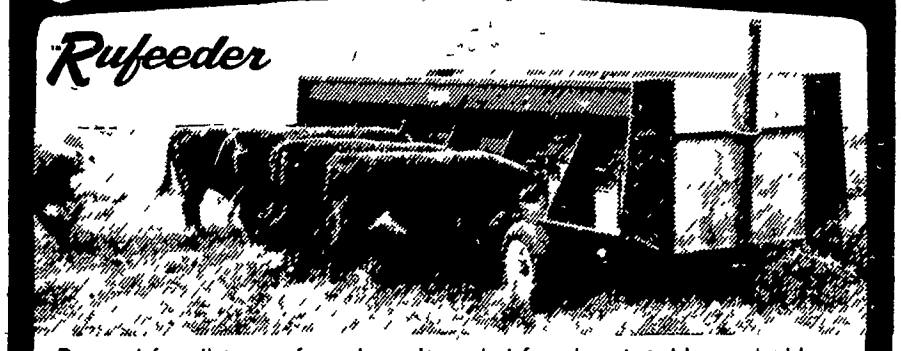
In summary, Fralick stated, "The object should be to maintain an ample supply of milk at reasonable prices for producers and consumers."

CONSUMER GUIDELINES

If you see red when the electric bill arrives you may need to monitor your home lighting system Urge people to turn off lights when leaving a room Select efficient lighting fixtures For example fluorescent lamps produce about four times as much light per watt as incandescent bulbs

Feterl has a better way to feed roughage...

Rufeeder



• Designed for all types of roughage. It is ideal for silage, baled hay, cubed hay, ground hay, field green chopping and chaff. The new RUFEEDER is 20 feet long, and on a free choice basis can handle approximately 70 head. ●Feed capacity—375 cubic feet. ●Mounted on special low profile heavy-duty gear. Made of quality steel and treated plywood.

3 new workhorses from Massey-Ferguson

From the company that was first with the biggest 2-wheel drive tractor come three new members of a dynamic tractor family the MF 2675, the MF 2705 and the MF 2745 Power rated at 100*hp, 120*hp and 140*hp respectively, they all feature MF's spacious, comfort-controlled, total-vision cab Now you can have the best of two worlds with the most comfortable cab on the market and a tractor powered to fit your farm

The MF 2675, MF 2705 and MF 2745 run as smooth as they ride, thanks to performance-engineered 8 or 24-speed MF transmissions Both feature constant mesh design and a transmission brake that makes shifting easier than it's ever been before The standard 8-speed features a manual shuttle from forward to reverse

With the MF 24-speed transmission, there's a "just right" speed for every job in the field or on the road It offers 3-speed shift-on-the-go versatility And you also get forward/reverse shuttle a great feature for those short back and forth operations

Power, comfort, function and classic styling are all rolled into one package in these dramatic new additions to the MF line

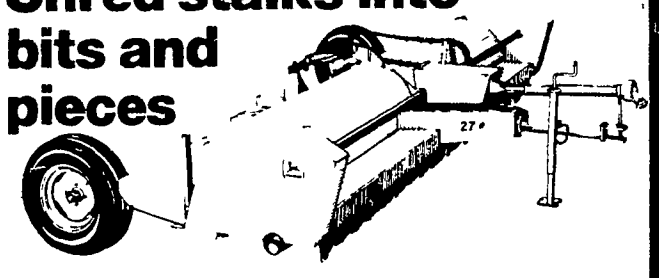
New 155-hp 4640

Power to lick your toughest field problems

Tough problems call for a tougher answer And field power doesn t come any tougher than the new 4640 In fact the horsepower rating may appear pretty conservative once you ve driven one Drawbar pull PTO torque 3-point-hitch lift hydraulic reserve – none of these is reflected accurately just in the horsepower rating But stop by the store and we ll be happy to fill you in on all these powerful reasons to put a new 4640 to work on your toughest field problems

Shred stalks into bits and pieces



Stop in and inspect our John Deere 27 Flail Shredder We ll show you the rugged knives (2½ inches wide 5/16 inch thick) that are thicker and heavier than those on other shredders And you can choose tungsten-carbide edges to give extra-long life Unique quadruple seals keep dirt out of the rotor bearings And there s more - let us show you the 27 soon

Whole-plant silage? It's a natural with a 2-row row-crop head, 3800 combination

Take a good heavy stand of corn and put a 2-row-equipped 3800 Forage Harvester into it – result will be a highly efficient high-capacity silage-making operation Combine the heavy-duty strength of the 3800 (handles up to 150 hp) with the unmatched gathering capacity of the row-crop head and you re in silage-making business

Safety campaign launched

HARRISBURG – The Pennsylvania Turnpike will launch a new safety campaign with special State Police support in an attempt to lower the accident and fatality rate along the 470-mile toll road.

Turnpike Chairman Jack I. Greenblat said he regarded the campaign as "an absolute must" following a 12 per cent climb in Turnpike accidents during the first six months of this year.

"The turnpike Commission is concerned about this increase in accidents, and we intend to take some positive steps to stem it. We are more than ever convinced that the major reason for these accidents is failure to adhere to the 55-mile speed limit," he said.

Greenblat said the new Turnpike safety awareness campaign will use the theme of "Take Care", a slogan which will be used by toll collectors when they greet patrons entering the toll system. In addition, "Take Care" posters will be displayed at all interchanges, and the slogan will be used on bumper stickers on all Turnpike vehicles.

"I also have asked and received the complete cooperation of Captain Newton C. Robbins, Commanding Officer of the Pennsylvania State Police Troop T, in implementing an increased overt patrol surveillance using hand-held radar units.

"Troop T will increase its emphasis on traffic enforcement in an effort to reduce the accident record and to seek voluntary compliance on the part of all Turnpike patrons. Motorists will see troopers using the hand-held radar units to a greater degree than previous and we believe this will serve as a deterrent to speeders," Robbins said.

The minimum fine for speeding on the Turnpike is $35 plus $10 costs. The fine increases $2 per mile in excess of five miles per hour over the maximum speed limit of 55 miles per hour.

Cattle will be paraded through the show ring tent at the Lebanon Fair. Livestock events begin Monday with a goat show at 4 p.m.

Twin Valley FFA holds barbeque

ELVERSON – July 15 was a mouth-watering day for many members of the Twin Valley FFA, for this was the annual chapter chicken barbeque. Approximately 80 FFA members and their guests attended the barbeque at Kurtz's Fish Hatchery, Elverson R2. FFA members under the direction of Barbeque chairperson Doris Mast and Advisor Ronald Frederick prepared 100 chicken halves for the hungary crowd. Each member supplied a hot or cold item to accompany the chicken.

Special thanks were given to Mr. and Mrs. Mahlon Kurtz for allowing the use of their facilities for the barbeque and to chairman Doris Mast for her organization of the barbeque.

Upcoming FFA activities of the group include the August FFA meeting at Dan Mostellers in Morgantown on August 9; Berks County Dairy and Livestock Judging at the Kutztown Fair on August 18; Tractor Driving at the Kutztown Fair on August 18: Southeastern Pennsylvania FFA Dairy Show at Kutztown on August 22; Trip to Agricultural Progress Days at Penn State on August 23; and Dairy and Livestock Judging at the Allentown Fair on September 1.

Carpooling Save $

According to the Federal Highway Administration, carpooling can save commuters at least $281 annually if you're sharing your subcompact with one person on a 10 mile home-to-work trip five days a week. Approximately $1,400 in auto expenses can be cut each year if you're sharing a standard-sized car on a 25 mile commute

Swiss bank trainee thrives on Lanc. Co. farm

By JOANNE SPAHR

QUARRYVILLE — He's good banking material. Tall, lean, dark, attractive and poised, 20-year-old Patrick Zeller would fit in perfectly as a bank executive in his home of Urdorf, Switzerland. But, from all reports, he's not doing too bad as a cattleman on a southern Lancaster County stock farm, either.

A completely urban individual, the lanky Zeller has already finished over a year of training as a bank apprentice in Switzerland and has only five more months to go until his studies will be complete. But, through a rather unique set of circumstances, he has found himself a Summer home on Twin Oak Farms, Quarryville, where he is contentedly doing what he has always longed to do — farm.

"It's hard to say why I want to farm," says Zeller, hesitantly, with his beautiful Swiss-German accent, "I just like to be outside."

Although he says that he did some work on his grandparents' farm in Switzerland, he admits to not being very experienced at farm labor — especially farm work American-style.

"The third day I worked was really a bad day," Zeller laughs, remembering the first few days in June,"I completely broke down—I was exhausted."

"My birthday was also a bad," he muses, his dark, thick lashed eyes looking off toward the meadow, "It was a hot day and only three of us corralled the cattle."

Things are going much better, now, for Pat, who's nearly completed his second month on the farm.

According to Zeller, he is neither an IFYE nor any other type of exchange student because he did not qualify for those programs. Instead, he took his own fate into his hands and is now on an exchange program of his own making.

It all began when he was not conscripted to serve in Switzerland's armed forces.

"It was with luck that I did not have to go to military service," Zeller pronounces with an amazing command of the English language," and the bank gave me four months off."

Once he had the time off from his apprenticeship, he began searching for an American farmer who would take him. First, he says, he headed to the American Embassy where he was given a few addresses for the 4-H program.

"But, I couldn't be in 4-H because I didn't have a farming background," he explains.

When he found that path had a roadblock, he was forced to find another way to get a host family. He came across the Fred Frey family of Twin Oak Farms in Quarryville through Frey's brother-in-law. Pat's father and Fred Frey's relative both work for the J. Henry Schroeder banking firm, although Zeller's father is in Switzerland and Frey's brother-in-law is located in New York. Fortunately for Pat, the two connected and Fred agreed to put Pat to work for the Summer.

"I had some reservations about taking a boy that had never worked on an American farm," Frey noted, "But, he's worked out great."

When asked why it had to be an American farm that he worked on, Zeller explained it simply.

"I don't like dairy," he stated firmly, "and, in Switzerland that's what the farming is, mostly." He continued his explanation by stating that the Simmental breed is used as a dual purpose animal and only after they are past their usefulness as dairy animals are they used for beef. Pat also says there are only two types of dairy animals in Switzerland — Simmentals and Brown Swiss,

Raising beef cattle is Pat's main interest, and, he says his choice of beef breed is an Angus/Chianina crossbred.

"The purebred Chianinas are crazy," he notes, shaking his head, "they are wild," he continues with a grin." But, if you cross with an Angus and get a calmer animal with Angus in him, that is a good combination."

When asked his impression of American farms, Zeller replied, "They are so big. The acreage is incredible compared to Switzerland — it is absolutely new. The pastures and fields are bigger. Everything is 10 times bigger."

Although in training for a banking position in Switzerland, Patrick Zeller is enjoying his work on Twin Oak Farm, Quarryville, this Summer.

According to Pat, in Switzerland if a dairyman has 60 or 70 cows he is a "rich farmer. Here, some farmers have 500 cows."

But, Pat isn't entirely in awe of the American lifestyle.

"The gas you use is wasteful," he says. "In Switzerland even a middle-sized American car is called an American Ship."

As he speaks, Zeller uses impeccable English, which is only one of several languages he speaks.

"I always knew I would come to the United States," he says, "so, I read a lot of books and worked at my English."

One of the reasons he was determined to live in the U.S.

Public opinion poll notes farmers' image

MEMPHIS, Tenn. — American consumers are about to "get tough" on those they believe responsible for rising costs, reports the research firm of Leo Shapiro & Associates, based on findings in its latest poll.

During a news conference and briefing at the American Farm Bureau Federation's Institute in Memphis, Tennessee, Dr. Leo J. Shapiro of Shapiro & Associates said, "The American people are predicting a gloomy outlook for the country and may be getting ready to take action."

Shapiro's report on the consumer's current state of mind tallied high marks for U.S. farmers as being the "last embodiment of honesty and work integrity.

"The results of our poll," said the head of the Chicago research organization, "clearly show that the farmer stands for something extremely important -- America."

The just-released Shapiro poll also shows that more Americans believe that things are getting worse instead of better. Of the nearly 2,500 interviewed, 66 per cent said things were getting worse for the country – up from 40 per cent in January of this year. Only 16 per cent felt that things were getting better.

Shapiro also pointed out that of those polled, 52 per cent linked high prices and inflation as being some of the major problems, another 19 per cent reported recession and unemployment as other sources of major problems besetting the country.

"This may be an indication that the American people may use their votes in upcoming elections to express displeasure and also to express support of such government programs they want for themselves," Shapiro said. "We have already seen signs of this in California and other places," he added.

The poll concluded that only one in four expects inflation to be brought under control; another 55 per cent expected prices to go up even faster in the coming months.

"When prices began to skyrocket," Shapiro said, "people began to hurt. It is only natural. But our polls indicate that 35 per cent believe that the middleman is one of the prime suspects for the increase in food prices, another 23 percent lay the blame on government." The poll noted that only six per cent attributed food cost hikes to farmers - five per cent blamed themselves, the consumers.

Shapiro said the poll showed only a slight majority of American consumers supporting any government attempt to control food prices, but if food costs continue to climb, the consumer would not come to the aid of the farmers.

Shapiro felt that the consumer is beginning to sense the overall problems confronting farmers. He said, "When there is a crop disaster, sympathy for the farmer increases simply because the consumer understands this type of problem. What the consumer doesn't understand is when a vote in Congress goes against the farmer. This the consumer doesn't relate to."

Pesticide and meat import problems were cited by Shaprio as not generating much farmer interest from the consumer.

"I believe that the trouble we find ourselves in may represent a great opportunity for the farmer and the consumer to get to know each other," he concluded.

The survey pointed out that eight in ten Americans gave high marks to farmers in areas of producing food, risk taking, and being self-sufficient. Only nine per cent of the public expressed a negative view when asked about farmers.

A conclusion from the poll is that what serves the farmer serves all Americans and symbolizes what is right with America. Shapiro said, "It is clear that Americans can be persuaded to vote for programs that can damage the farmer and his way of life only if the public fails to get the realistic information it needs about the farmer. The farmer," he said, "does have a strong base of public support and it must be maintained."

Child immunization urged

HARRISBURG -- No reasonable parent who has witnessed the ravaging effects of polio, or who has seen a child become retarded because of measles, or has heard other parents speak of the death of an infant through whooping cough, would purposely expose his own children to these and other diseases, especially when prevention is so easily obtained.

But because of myth and misconception, that is exactly what millions of parents are doing. Believing that the diseases have been eliminated or that they are not very serious to begin with, millions of parents are failing to have their children fully vaccinated. As a result, diseases that could easily be prevented are instead continuing to strike, often with devastating results.

The Pennsylvania Department of Health is conducting a campaign to set the record straight. It is advising parents to make sure that their children have received all of their vaccinations for polio, measles, rubella (German measles), mumps, diphtheria, tetanus and pertussis (whooping cough). All of the diseases are still a serious threat to unvaccinated children. All can cause severe disability and death.

It is the Department's intent that as a result of this campaign at least 90 per cent of the Commonwealth's children under 15 years of age will be fully vaccinated. With vaccine readily available, that goal should be easy to reach. However, nearly 40 per cent of the children in that age group have missed one or more of their vaccinations.

To remain susceptible to preventable disease is a needless risk that no child should face, health officials warn.

For more information on the immunization campaign, call the toll-free State Health Line at 1-800-692-7254.

Export assistance expanded

WASHINGTON, D.C. – The Commodity Credit Corporation (CCC) Non-Commercial Risk Assurance Program (GSM-101), which was deisgned to make it easier for exporters to obtain private financing for their export sales of U.S. farm products, has been expanded to include all commodities eligible under the CCC Export Credit Sales Program. Only cotton has been eligible under the Assurance Program which was announced Feb. 2. Responding to interest expressed by exporters of other commodities and banks, CCC is providing program support to a wider range of commodities.

The Assurance program protects U.S. exporters who sell on credit terms, as well as U.S. banks which finance the credit transaction, against non-commercial risk defaults under letters of credit issued by a foreign bank or under related obligations. Non-Commercial defaults, which are defined in program regulations, are generally those arising from acts of government including the failure of a foreign control exchange authority to transfer local currency into dollars. The Regulations provide for protection against non-commercial default on payments deferred up to three years.

Fred Welz, acting general sales manager for the U.S. Department of Agriculture, noted that protection against non-commercial hazards will give exporters more flexibility in developing export opportunities.

ek in the show ring of
. Lancaster County 4-
with five breeds

represented. Lancaster County Holstein breeders held their contest the following day. Placings of all the events were printed in the July 29 edition of Lancaster Farming.

Sandy Frey, 19, had the reserve grand champion in the 4-H Holstein Show last week. The daughter of Mr. and Mrs. J. Mowery Frey Jr., Willow Street, she is in her last year of 4-H competition. Her home farm, "Fultonway", has claim to one of the best-known prefixes registered in the books of the Holstein-Friesian Association of America. Sandy is a member of HFAA and current vice president of the Lancaster County Junior Holstein Club.

Arlen leener, Elizabethtown, won the junior championship banner of the 4-H Holstein Show with his August-Hill Rockman Leseyla, a senior yearling. Employed by Penn-Springs Farms, owned by the Robert Kauffman family, the young Holstein enthusiast fits well into the winning pattern of the well-known Lancaster County Holstein breeders. Kauffman showed the grand champion in the Open show, while his son, Steve, exhibited the grand champion in the 4-H contest.

Mary Ann Witmer, daughter of Mr. and Mrs. Raymond Witmer, Willow Street, showed this intermediate calf to reserve junior champion honors in the 4-H Guernsey Show.

Matt and Tom Arrowsmith, sons of Mr. and Mrs. William Arrowsmith, Peach Bottom, stood at the halters of the grand and reserve grand champion Jerseys.

Schmuck, gets a

Michael and Gay Bukowski of Manheim are two young 4-H'ers who have learned how to exhibit Jersey cattle which bring home blue ribbons.

Sandra Schmuck, sister of Karen Schmuck, who exhibited the champion Ayrshire, is at the halter of her grand champion Brown Swiss, while a friend, Willem Kroon of The Netherlands, holds on to her reserve grand champion Ayrshire.

Four Berks County 4-H'ers chosen as Keystone winners

READING – Three Berks County 4-H members were recently named Keystone winners and selected to be interviewed in the annual Pennsylvania 4-H Awards Programs. Keystone winners include: Karen Sattazahn, Womelsdorf - Agricultural Program; Karen Kniss, Oley - Leadership; and Larry Stratton, College Hill, Kutztown - Photography. Karen Sattazahn also was interviewed in the category of Outstanding 4-H Girl.

Anyone who has been involved in 4-H competition is familiar with the Pennsylvania 4-H Members Record, commonly referred to as the Blueform. The Blueform provides the first step for Pennsylvania 4-H'ers to take part in the State and National 4-H Awards Programs which are conducted by the Cooperative Extension Service of the State Land-Grant Universities and SEA-Extension, U.S. Department of Agriculture.

The blueform provides an opportunity for 4-H members to keep an organized presentation of what they have learned and accomplished in 4-H. It is a useful tool for determining one's progress and personal growth.

After 4 H members complete their Blueforms, they are submitted and judged on a county level. It is at this time that each of the records are placed in one of about 35 programs. The top scoring record in each program is then sent to Penn State to be judged by a state committee.

During the state judging, the top records in each program are pulled out and the 4-H members who submitted these records travel to Penn State for interviews with the judges before the final selection of state winners are made. The 4-H'ers who are asked to come to PSU for these interviews are called Keystone winners.

For the state winners this means a trip to National 4-H Congress in Chicago and a chance to compete for educational scholarships.

Fifty companies and foundations are supporting these national 4-H programs this year. In addition to providing recognition for 4-H members achievement and 4-H group accomplishment, donors assist 4-H with project literature and educational aids, technical assistance, leader training, and public relations support.

Butz slams 'cheap food policy' at Farm Bureau training meet

MEMPHIS, Tenn. – The Carter Administration is pushing a "cheap food" policy. That's the assessment of former Secretary of Agriculture, Earl L. Butz.

In a statement to reporters marking the end of a week-long in-service training program for American and state Farm Bureau employees, Butz blasted the administration's recent move to increase meat imports.

"Ranchers had no more than gotten started making money when the administration said 'We have a solution to high meat prices. We'll bring in more imported beef from Argentina and Australia and knock eight to 10 cents off the price of hamburger.'

"Well, he knocked about a dime off the price of cattle in three weeks," Butz said, referring to President Carter's decision to increase meat imports by 200 million pounds.

Butz called the move "counterproductive" and said it would adversely affect future supplies of meat for domestic consumers. He lauded recent reports that agricultural exports will reach a record $24-billion in the current fiscal year, and emphasized the need to increase agricultural trade with the Soviet Union.

"For every dollar the Russians pay for U.S. agricultural commodities, that's one less spent for the hardware and technology they could later use against us," Butz said.

The former Secretary of Agriculture gave high marks to Farm Bureau's work at increasing agricultural exports, and called the organization "one that through the years has stood on the side of the private sector, has stood on the side of bringing government under control and getting rid of federal deficits."

People Total

According to the Bureau of the Census, the U S population (including armed forces overseas) was 216,817,000 as of July 1, 1977

While some companies look for ways to build bins cheaper, we find ways to build bins *better*. Bins that will last longer, look nicer and protect grain better.

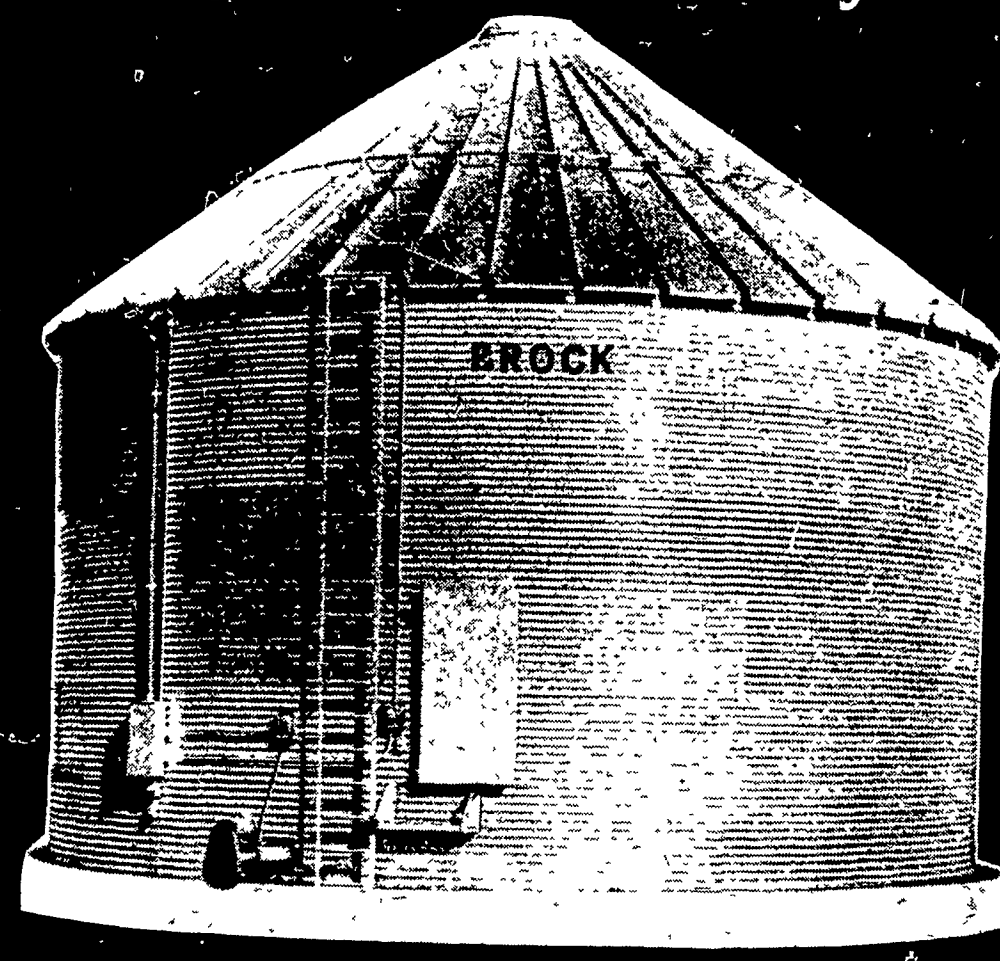
That's why we use only prime high-tensile steel. And precision form and punch each piece.

No, we won't cut corners. Because in the long run, cutting corners would just cost you more money.

For more information about all our money-saving design features, just write for a copy of our latest catalog.

BROCK Hershey Equipment Company, Inc.

There are 10 ways we could cut our price. Any one of them will cost you.



- Reduce the 40-inch fill hole width to 24 inches
- Eliminate the exclusive fill hole collar seal.
- Eliminate the circle of safety steps.
- Eliminate the adjustable roof stiffner ring.
- Eliminate 3-inch high roof ribs.
- Make the roof pitch less than 35 degrees.
- Eliminate the safety handrail by the manhole.
- Eliminate the tab between each rafter.
- Switch to a lighter gauge steel sidewall.
- Use lower grade bin bolts and washers.

Swiss bank trainee

(Continued from Page 132)

was the fact that he has citizenship in this country.

Pat was born in New York City, and when he was three years old his family moved to Switzerland where his father is a bank manager. His town of Urdorf is a "sleeping village" of Zurich, which means most of its inhabitants work in Zurich and come home only to sleep.

Although he's been in a strange country and in a strange environment on the farm, Pat says he is not a bit homesick. And, most likely, when the end of September comes, he won't be ready to head home, either.

"I'm almost at home at the Frey's," he says. I stay with Grandma Frey."

At this point, Zeller states, also, that his future is uncertain.

"There are two ways I could come back to the states," he points out. "Either through the bank on another traineeship or I could come back to the states and go to school."

The school he will probably go to should he choose this route would be Penn State, or some other agriculture college, since Pat has such an intense interest in cattle and farming.

Zeller also wants to do some traveling, so he is not making any definite statements about his future.

One thing is for certain, however. He still has two more months on Twin Oak Farms, and a lot of new experiences to record before he heads home.

All things considered

Soviet ag trade unhampered

ANDERSON, S.C. — Secretary of Agriculture Bob Bergland said last month that there have been rumors recently that the administration was considering a restriction on U.S. grain exports to the Soviets.

"These rumors appear to have intensified in recent days.

"I want to assure the American farmer and the American people generally that these rumors are false.

"I can say unequivocally that this administration recognizes the importance of grain sales both to the U.S.S.R. and to our own economy, and that we will continue to encourage the Soviets to satisfy their import needs with U.S. grains, soybeans and agricultural products.

"The President is absolutely committed to actions that will continue the dramatic expansion of agricultural exports that began last year, and not halt this solid economic growth.

"Our agricultural exports of $24 billion in 1977 generated net earnings to the United States of almost $10.5 billion last year; this year, farm exports will contribute an estimated $12 billion to our balance of payments deficit. That record is unmatched in any other segment of our economy.

"This Administration will not jeopardize these successful achievements of the past year and a half.

"We are moving ahead on these fronts to strengthen exports even more:

"—Our reserve policies and programs are designed to ensure our ability to be a reliable supplier."

"—We are pressing hard in all international negotiations for a reduction of trade barriers."

"—We have made over twice the amount of export credits available this year, compared to last year."

"—We have adopted a more coordinated approach to export promotion."

"All of these actions will mean that America's farmers can count on our doing everything possible to achieve long-term growth in all of agriculture and that includes our export markets."

June egg production up

HARRISBURG — June 1978 egg production in Pennsylvania totaled 274 million according to the Pennsylvania Crop Reporting Service. The June production was 15 per cent above the 239 million eggs produced in June 1977. The June average of 13.1 million layers was 13 per cent higher than in June 1977. Egg production per 100 layers during June was 2,100 compared with 2,058 in June 1977.

The nation's laying flock produced 5.4 billion eggs during June, three per cent more than in June 1977. The number of layers during June averaged 272.0 million, compared with 266.6 million a year earlier. Egg production per 100 layers during the month was 1,979 compared with 1,951 a year ago.

Red meat production down

HARRISBURG — Red meat production in Pennsylvania during June 1978 totaled 85.1 million pounds, eight per cent less than a year earlier according to the Pennsylvania Crop Reporting Service.

Cattle slaughter at 73,600 head was down eight per cent from June 1977. Hog slaughter at 235,200 head was up three per cent, sheep slaughter at 9,900 head was down 20 per cent, and calf slaughter at 26,100 head was down 17 per cent from a year ago.

Nationally, commercial red meat production in June totaled 3.08 billion pounds, down seven per cent from June 1977. Cattle slaughter was down ten per cent, calf slaughter was down 28 per cent, hog slaughter was up one per cent, and sheep and lamb slaughter was down 20 per cent from June 1977.

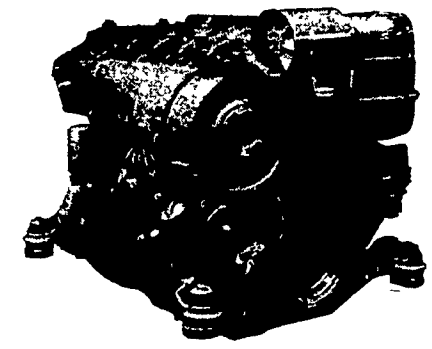
COST


CUTTER
The cost of diesel fuel has jumped nearly 100 percent since October, 1973 and it's still about three cents a gallon cheaper than gasoline. Higher fuel costs call for a closer look at total operating costs when you buy engines. Deutz air-cooled engines use 20 to 40 percent less fuel than most water-cooled diesel engines - far less than gasoline engines. And they are competitively priced. So hadn't you better buy or specify the cost cutter - Deutz? 10 to 500 bhp.
Today there are more competitive brands of air cooled diesels on the market than ever before — yet we doubled our sales in the last two years — which says it all about public acceptance of Deutz diesels.
DEUTZ®
AIR-COOLED DIESELS
- We stock rebuilt: starters, generators, injectors, for Deutz
- We have complete road service since 1955
- We supply free application engineering
- We have facilities for any mechanical fabrication required to apply new Deutz diesels

Grange Master Scott takes ag problems to White House

WASHINGTON, D.C. – In a meeting here last week with President Carter, Grange officials representing interests of family farmers asked the President for a new direction in farm policy.

John W. Scott, Master of the National Grange, emphasized the importance of preserving the family farm system and told the President that current income incentives in farm programs disproportionately favor large volume producers. He said the Grange recommends

John Scott

deficiency payments in farm programs be adjusted to favor small family farmers.

Jimmy Carter

He said this adjustment would offset the comparative advantage of the larger producers.

Scott and members of the National Grange Executive Committee said that inflation is the farmers' number one concern. They expressed support for the President's call for voluntary programs of restraint by business and labor in price and wage increases. They said the Grange would also support legislation, including a Constitutional amendment if necessary, to prevent federal spending in excess of revenue except in times of national emergencies.

They also cited lackluster productivity as a major contribution to the causes of inflation. Scott said only U.S. agriculture can claim a consistent productivity record while other industries have not kept pace with increased labor costs. He said the Grange agrees with the President's inflation advisor, Robert Strauss, who said boosting capital productivity and labor productivity are musts in the fight against inflation. Scott said a major factor in low productivity is over-regulation by the government. He said government regulations are sometimes issued with no thought about their effect on productivity or cost to the general public. He recommended that all economic, environmental and safety regulations be placed on a cost-benefit ratio.

The Grange leaders also recommended that tax laws be structured to create investment capital through such means as expansion of investment tax credits and an accelerated depreciation allowance schedule.

Another priority item during the meeting was energy. The Grange supports the President's appraisal of the overall energy situation but differs in the means of bringing about a return to energy independence. The Grange favors expanded off-shore drilling, the deregulation of natural gas and government supported escalation of the development of oil from shale.

Birds of prey program set for this evening

PEQUEA – A program on Pennsylvania's birds of prey will be held today (August 5) at 8:30 p.m. at Pequea Creek Campground at Lake Aldred.

Mike Ondik, director of white-tailed deer research at Pennsylvania State University, will present the slide show and discussion titled "Hawk County."

"Ondik has devoted many years to observing, studying and photographing Pennsylvania's hawks, eagles, and owls. His superb slide collection depicts nearly every aspect of the life histories of the state's birds of prey.

"The program includes some exceptionally fine shots of the birds' nesting and feeding activities," Moyer said.

There is no admission charge for the program which is open to the public. Those attending are advised to bring chairs or blankets for seating as the program will be held outdoors, Moyer said.

Pequea Creek Campground is located along Route 324 near the village of Pequea. The campground is part of the Lake Aldred recreation area operated by Pennsylvania Power & Light Co. in conjunction with its Holtwood hydroelectric generating plant.

Cumberland County 4-H Dress Revue winners

CARLISLE – Eleven 4-H'ers who won at the Cumberland County 4-H Dress Revue are: Senior members, Nancy Barrick, Newville; Karen Crum, Carlisle; Deb King, Mechanicsburg R2; Lisa Negley, Shippensburg R2; Wendi Pooler, Dickinson; Jill Rhoads, Newville Donna Snyder, Carlisle; and Sherri Webber, Newville R1. Junior members are: Cindy Castallo, Mechanicsburg; Deanna Otto, Mechanicsburg; and Cindy Lebo, Carlisle R3.

These 4-H'ers started their costumes at the beginning of the 4-H club year. In addition to their sewing they had the opportunity to develop grace and poise, habits of good grooming, skill in decision-making and to help plan the county dress revue.

These girls competed in the Regional Dress Revue held in Lancaster on Thursday of this week.

The four gold ribbon winners from the Capital Region will compete with the top winners from each of the other eight regions for state honors. The state winner will be selected August 8 at Penn State, University Park Campus during State 4-H Achievement Days. Thirty-five 4-H'ers will participate in this event. The state winner will get an expense paid trip to the National 4-H Congress in Chicago, November 26 to 30.

The Cooperative Extension Service of the University sponsors the State Fashion Revue program. Simplicity Pattern Company, sponsor of the national 4-H Revue program, provides the county medals and the trip to Congress.

4-H members selected to represent Cumberland County at the Regional Fashion Revue in Lancaster on July 27th are: Front Row (L to R.) Jill Rhodes, Sherri Webber, Ruth McCulloch and Nancy Barrick of Newville. Back Row - Karen Crum, Donna Snyder, Melinda Gutshall, Carlisle; Wendi Pooler, Dickinson and Deb Young of Mechanicsburg.

Junior Award Winners selected at the Cumberland County 4-H Fashion Revue on July 20 were Cindy Lebo, Carlisle, Deanna Otto, and Cindy Castallo of Mechanicsburg.

Farm income to rise by 25%, Foreman predicts

WASHINGTON, D.C. — Assistant Secretary of Agriculture Carol Tucker Foreman has predicted that farm income will be 25 per cent higher in 1978 than last year.

She made the forecast in a speech to 500 members and their families of the Iowa Independent Bankers' annual meeting at Lake Okoboji, Iowa. The Iowa Independent Bankers are made up of representatives of community and home owned banks in the state of Iowa.

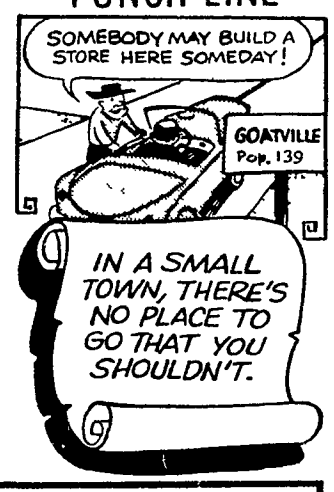
"Net farm income in 1978 should exceed $25.5 billion," Ms. Foreman said. "This will be the highest since 1974 and the third highest in history."

"Agriculture exports this year are also expected to set records in both volume and earnings," she said. "Due to the strength of our food and fiber exports, American agriculture will contribute nearly $12 billion toward reducing the balance of payments deficit."

On another subject, Foreman outlined the "complex and difficult situation" surrounding recent Department actions dealing with the use of nitrates and nitrites in curing bacon.

"We are confident that the course we are embarking on will soon result in the elimination of detectable nitrosamines in cured meats."

PUNCH LINE



AUCTION SALE

TUESDAY, AUGUST 8

Located on Airport Road between JFK Turnpike and Churchmans Road. Known as Wilmington Storage Company. Storage furniture to be sold at 10 AM, Shop tools and equipment right after. Real Estate to be offered individually and then as an Entirety at 1 O'Clock.

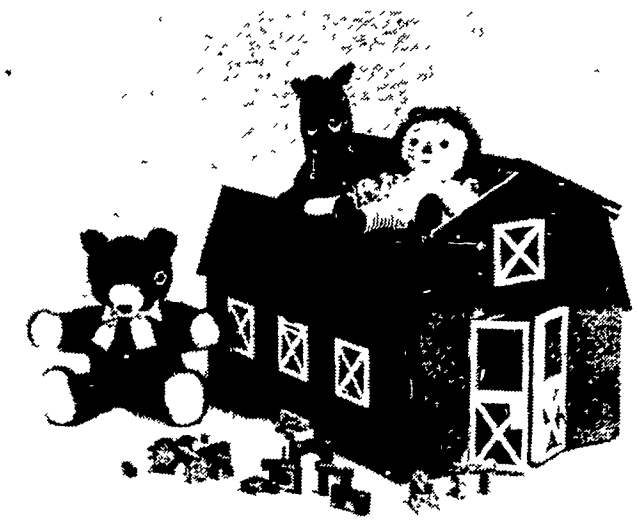
WHAT'S NEW



BARN-STYLE TOYBOX

There'll be teddy bears and baby dolls in the barn when you build this colorful toybox for your favorite youngster's room.

A novel alternative to the traditional toy trunk, this red barn-style toybox provides lots of storage space - and it can double as play equipment. Preschoolers can wiggle through the double doors into the 23 x 36 inch barn.

The 24-inch-high toybox has two 12-inch-high lath-trimmed doors, lath-trimmed mock windows and a hinged roof that opens up at clean-up time. Designed by Marian Miura for the American Plywood Association, the ban can be built for as little as $30 with a single 4 x 8 foot sheet of APA grade-trademarked plywood, lath or moulding trim and simple hardware. For step-by-step plans, send $1 to the American Plywood Association, P.O. Box 11700, Tacoma, Washington 98411; ask for Form C605.

Pesticide control line named a success

HARRISBURG – Pennsylvania's Agriculture Secretary Kent Shelhamer is calling the Agriculture Department's Emergency Pesticide Control Line a success, based on reports from the first six months of its operation.

Shelhamer said that "dozens of calls have been received and responded to on this line, which we established to provide rapid assistance for emergency situations associated with pesticides." The line is a special telephone answering service equipped to receive messages 24 hours a day.

According to the Agriculture Secretary, who held hearings on the Pesticide Control Act of 1974 when chairman of the House Agriculture Committee, the idea for the Emergency Pesticide Control Line developed late last year as a method to provide a central number for information and assistance when emergencies arose from the improper use or handling of pesticides. "There was a need for coordination of the many state, local and regional agencies which deal with problems of pesticide control," he said.

Shelhamer said that since the line was opened January 1, 1978, Agriculture Department personnel have provided assistance in more than two dozen cases of accidental exposure to pesticides. This assistance has ranged from providing information on pesticide ingredients and antidotes, to providing advice on handling problems of pesticide spills.

He noted that nearly one-third of the calls on the Emergency Control Line are from out-of-state Poison Control Centers, needing information on contents and doses of the chemicals which are part of the pesticide products. "We are pleased that our facility is sufficient to handle not only the problems which have come up in Pennsylvania, but also those problems faced by other states." Shelhamer added that the Emergency Line has received calls from as far away as Minnesota.

Shelhamer said that support staff for the Emergency Pesticide Control Line includes a compilation of all critical personnel who might be in a position to handle any pesticide emergencies. "This might involve staff from the Department of Agriculture, local Poison Control Centers or any of several other state agencies who would be in a position to be of service in an emergency," he said

Cow marched for milk

ROSEMONT, Ill. -- Memory, a champion Holstein, traveled nearly 7,000 miles, from Canada to Mexico, during June Dairy Month as a salute to the U.S dairy industry. During her symbolic "March for Milk," Memory visited 31 cities in 13 states. She was greeted by crowds ranging from 10 to 10,000, by governors, mayors, and dairy dignitaries.

Her owner, Conrad Kvamme of Little Falls, Minnesota, didn't know this kind of publicity stunt couldn't be done, so he did it, with help from the entire dairy industry. He composed and sang "The Milky Way;" he talked; he demonstrated and taught the wonders of milk and the cow that produces it

This enthusiastic, persuasive, knowledgeable dairy farmer with his barnyard boogie beat, really sold the benefits of milk and the cow He made learning fun for city folks when he pointed out what cows drink and eat to produce milk, especially when he noted that more than 60 per cent of what a cow eats is inedible by man

Berks County Holstein picnickers told dairy farming requires serious study

KEMPTON -- Berks County Holstein breeders were told last week that dairy farming is highly scientific today and that anyone expecting to get into it should take his courses of study seriously. The advice came from Larry Morris, professor of dairy husbandry at Delaware Valley College of Science and Agriculture. He was guest speaker at the annual Summer picnic of the Berks County Holstein Club, which was held near here on July 27.

Morris also pointed out that in the smaller colleges, such as the one he represents, students receive more practical experience in actual management than they would at larger agricultural schools.

The hosts for the Summer picnic were Mr and Mrs Donald Meyer and their three children Introducing them, Berks County Holstein Club President Joe Ruth noted that the family farms approximately 200 acres and keeps 100 head of Holsteins.

A judging contest was one of the highlights of the get-together. Winners were as follows:

In the women's division, Mrs. Alpheus Ruth placed first, followed by Elizabeth Schlappich and LuAnn Herbert. The production winner was Phoebe Troutman.

Harold Heck turned in the highest score among the men, while Earl Rohrbach and Ralph Sanner followed for the second and third placing. Timothy Kissling won the honors in the production category.

Among the youths, Penny Bicksler, Jeff Miller and Sandra Moser were the top three in type judging and Daniel Schuler was high individual in production.

It was annonced that the second annual Berks County Holstein Club Sale will be held August 25 at Kutztown.

Also on hand to make announcements and review dairy programs of various sorts were Berks County's reigning Pennsylvania Dairy Princess, Sandy Miller, the 1978-79 Berks County Dairy Princess, Theresa Wolfskill, and Berks County Agricultural Agent James Haldeman.

Haldeman noted that the DHIA somatic cell testing program has reduced average cell counts significantly. Farmers wishing to participate in the program should contact him.

Changes in store for New England milkshed

NEW YORK – Under a U.S. Department of Agriculture recommended decision, the pricing of milk for Class 1 or fluid-use would be revised under the New England federal milk marketing order.

Herbert L. Forest, dairy official with USDA's Agricultural Marketing Service, said the tentative decision is based on a public hearing last February in Boxborough, Mass.

The decision would increase the rate of plant location adjustments to reflect increased costs of transporting milk from the production area to city bottling plants. These adjustments are added to the "Class 1" price which handlers pay and the "uniform" price which producers receive.

Another change, Forest said, would divide a single pricing zone into several zones. The division of the present zone, made up of Connecticut, Massachusetts, and Rhode Island, would reduce prices in a westerly direction. The revision is needed, Forest said, because distributors in southern New England are now obtaining milk supplies not only from northern New England, which has been the customary supply area, but from eastern New York as well. This change in price structure would reflect the cost of transporting milk from New York to plants in southern New England.

Another change would reduce the order's Class 1 price by a limited amount to provide a better coordination of Class 1 prices applicable at southern New England plants and plants in nearby eastern New York, which is under the New York-New Jersey milk order. Handlers under the two orders have overlapping sales areas in New York.

Complete details on the proposed changes appear in the July 20 Federal Register, and comments may be filed until August 10. Interested persons should send their comments, in four copies, to the Hearing Clerk, Rm. 1077-So. Bldg., USDA, Washington, D.C. 20250, where they may be reviewed by the public.

Copies of the recommended decision may be obtained from Market Administrator Oscar Zucchi, 230 Congress St., Rm. 403, Boston, Mass., 02110; or from the Dairy Division, AMS, USDA, Washington, D.C., 20250

Opinion

Can Mother Nature replace lost soils?

COLLEGE PARK, Md. – A recent study by the Soil Conservation Service confirmed that water is washing away soils on the nation's cropland at an average rate of nine tons per acre per year. This rate is nearly twice the rate considered "acceptable" by soil conservationists. The Middle Atlantic region averaged losses of 14 tons per acre per year from its cropland acreage, according to this study.

Soil losses from U.S. croplands totaled 2.8 billion tons in 1975. Nearly 42 per cent of the 355 million acres of cropland harvested in 1975 were not receiving adequate treatment for soil erosion.

Losing soil at the rate of 10 tons per acre per year would take 15 years to remove one inch of soil from an acre.

Is this loss rate alarmingly high? The annual geologic or natural erosion rate on sloping soils in Maryland under native forested conditions can be guesstimated at rates in the neighborhood of 0.5 tons to 1 ton per acre. Therefore, and erosion rate of 10 tons per acre per year represents a soil loss that is roughly 10 to 20 times the natural soil loss rate.

From soil survey data, Maryland has lost an average of three inches of topsoil since the forests were cleared. For the nearly level and flat acreas of the state, the erosion rate has been relatively low or negligible. But for the steeper and more rolling landscapes, topsoil losses have exceeded this averate. Maryland's Piedmont landscapes have commonly lost 50 per cent or more of the original topsoil (9-14 inches thick) with as much as 6 or more inches having been removed.

How long will it take to replace this soil? How long does it take to form an inch of soil? If we are losing 10 tons of soil per acre per year, can Mother Nature keep up with this rate of soil loss?

For soils on Maryland's Piedmont formed in resistant rocks, the rate of soil formation is slow. Some of these soils have probably taken as much as hundreds of thousands of years to reach their present profile development. These soils are very prone to erosion loss. Annual soil losses at rates of 10 tons per acre exceed their replacement rate manyfold. Even the "acceptable" soil loss tolerances of 3 tons per acre per year are most likely far in excess of the soil formation capabilities of the environmental conditions for many of Maryland's Piedmont soils.

The dilemma facing us today is that a 10 ton per acre soil loss is not an alarmingly high amount of soil loss when such a rate represents "only" 0.07 inches of soil lost per year. It is hard to get excited about losing such a thin layer of soil. We can continue to lose these amounts of soil and not suffer too much in yields. We are, at least partially, substituting energy-intensive resources (e.g. fertilizers for the lost topsoil to sustain high yields. And we can continue to do so for many years.

But we are mining our soils at current loss rates. The piper will have to be paid. It is being paid now with increased energy inputs to sustain yields and environmental degradation caused by the sediment losses. But, perhaps worst of all, the insidious process of erosion is happening before our eyes at a slow enough rate to seduce us into complacency but at rates that are many times faster than what it takes Mother Nature to form new soil to replace what was lost Eventually this policy will catch up with us Future generations will look back at our efforts as stewards of the soil resource. The recent SCS study suggests that they will be disappointed in what history tells them.

Reading Fair returns

READING – The Reading Fair will return this year in its true agricultural tradition. The dates of the Fair will be September 11 thru and including the 16th. This is the same week the Reading Fair used to be traditionally held. It will also be a time when most fruits and vegetables will be plentiful, plus 4-H projects in clothing and etc. finished. It is anticipated that this year's fair will have a record number of entries.

With one of the largest cattle barns under one roof in the state, some 400 dairy animals, and about 50 4-H and F.F.A. steers from Berks and Lehigh Counties, are expected.

Due to the large number of entries and limited space, the swine and sheep exhibit has been limited to Berks County. The deadline for cattle entries is Aug. 18. If in need of entry blanks, please call the Reading Fair office 215-929-9401. All livestock is to be in place by Sunday evening, Sept. 10 at 6 p.m. All other exhibits shall be in place by Monday afternoon 4 p.m.

One of the most popular exhibits, especially among city visitors to the Fair will likely be the Surge milking system supplied by Daniel Wenger of Hamburg. The system, valued at better than $10,000, will allow the public to see exhibitors milk their cows.

The Reading Fair will also feature a State Class AA tractor pull, machinery exhibits, plus many area crfatsmen who will be demonstrating their skills. There will be no charge for admission to the grounds, and no charge for parking.

"Big Bird and the Cookie Monster" will be on the grounds to visit with the children. A Miss Reading Fair contest will again be held with approximately 30-40 girls representing local area businesses, and a Little Miss Reading Fair contest will be held also. For further information, entry forms, or to order tickets for the tractor pull, please call the Reading Fair office 215-929-9401.

"Let us never forget that the cultivation of the earth is the most important labor of man.

Already Quit

On her son's 17th birthday, Mom pleaded. "Promise you'll tell me when you start smoking Don't let me find out from the neighbors"

"No problem, Ma, I quit smoking a year ago."

PURINA HIGH OCTANE COW CHOW 36

THE DAIRY SUPPLEMENT WITH

"milk power"

WHAT GIVES PURINA Hi-O COW CHOW 36 IT'S "MILK POWER"?

Purina Dairy scientists have produced many outstanding Dairy rations through the years, but none offer a greater milk-making potential than Hi-O Cow Chow 36. This "super performing" supplement contains 36% protein. When mixed with grains according to Purina Research approved formulas it produces a "super" energy milking ration.

It is the unique scientific blending of a carefully calculated balance of proteins, minerals, vitamins and extra high energy milk-making ingredients that provides Hi-O Cow Chow 36 with its unusual power to produce extra milk.

Use Hi-O Cow Chow 36 for on-the-farm mixing or let your Purina dealer Check-R-Mix a Purina milking ration for you containing Hi-O Cow Chow 36. He has specific formulas to make a quality milking ration with the right protein level to fit your roughages and your herd.

Records show Hi-O Concentrate 36 not only increases milk production, but dairymen report significant increase in fat test.

PURINA FEEDING PROGRAMS SAVE $$$

YOUR EAR CORN + HI O 36 CONCENTRATE = 16% HIGH ENERGY DAIRY FEED FOR UNDER $127.00 PER TON

PURINA NUTRITIONAL PROGRAMMING TODAY — INSURES YOUR PROGRESS TOMORROW!
